Reasons And Knowledge:

Reasons and Knowledge Marshall Swain, 1981 Rules, Reason, and Self-Knowledge Julia Tanney, 2013-01-08 Tanney challenges not only the cognitivist approach that has dominated philosophy and the special sciences for fifty years but metaphysical empirical approaches to the mind in general Rules Reason and Self Knowledge advocates a return to the world involving circumstance dependent normative practices where the rational mind has its home *Reason and the Search for Knowledge* D. Shapere, 2012-12-06 An impressive characteristic of Dudley Shapere's studies in the philosophy of the sciences has been his dogged reasonableness He sorts things out with logical care and mastery of the materials and with an epistemological curiosity for the historical happenings which is both critical and respectful Science changes and the philosopher had better not link philosophical standards too tightly to either the latest orthodox or the provocative up start in scientific fashions and yet as critic the philosopher must not only master the sciences but also explicate their meanings not those of a cognitive never never land Neither dreamer nor pedant Professor Shapere has been able to practice the modern empiricist's exercises with the sober and stimulating results shown in this volume he sees that he can be faithful to philosophical analysis engage in the boldest rational reconstruction of theories and experimental measurements and faithful too empirically faithful we may say to both the direct super highways and the winding pathways of conceptual evolutions and metaphysical revolutions Not least Shapere listens To Einstein and Galileo of course but to the workings of the engineers and the scientific apprentices too and to the various philosophers now and of old who have also worked to make sense of what has been learned and how that has happened and where we might go wrong Knowledge First J. Adam Carter, Emma C. Gordon, Benjamin Jarvis, 2017-11-10 Knowledge First constitutes what is widely regarded as one of the most significant innovations in contemporary epistemology in the past 25 years Knowledge first epistemology is the idea that knowledge *per se* should not be analysed in terms of its constituent parts e.g justification belief but rather that these and other notions should be analysed in terms of the concept of knowledge This volume features a substantive introduction and 13 original essays from leading and up and coming philosophers on the topic of knowledge first philosophy The contributors essays range from foundational issues to applications of this project to other disciplines including the philosophy of mind the philosophy of perception ethics and action theory Knowledge First Approaches in Epistemology and Mind aims to provide a relatively open ended forum for creative and original scholarship with the potential to contribute and advance debates connected with this philosophical project *The Self and Self-Knowledge* Annalisa Coliva, 2012-04-19 Investigates philosophical issues to do with the self and self knowledge It focuses on two main problems how to account for I thoughts and the consequences that doing so would have for our notion of the self and how to explain subjects ability to know the kind of psychological states they enjoy Knowledge and Evidence Paul K. Moser, 1989 Philosophers have sought to define knowledge since the time of Plato This inquiry outlines a theory of rational belief by challenging prominent skeptical claims

that we have no justified beliefs about the external world **The Fate of Knowledge** Helen E. Longino, 2018-06-05 Helen Longino seeks to break the current deadlock in the ongoing wars between philosophers of science and sociologists of science academic battles founded on disagreement about the role of social forces in constructing scientific knowledge While many philosophers of science downplay social forces claiming that scientific knowledge is best considered as a product of cognitive processes sociologists tend to argue that numerous noncognitive factors influence what scientists learn how they package it and how readily it is accepted Underlying this disagreement however is a common assumption that social forces are a source of bias and irrationality Longino challenges this assumption arguing that social interaction actually assists us in securing firm rationally based knowledge This important insight allows her to develop a durable and novel account of scientific knowledge that integrates the social and cognitive Longino begins with a detailed discussion of a wide range of contemporary thinkers who write on scientific knowledge clarifying the philosophical points at issue She then critically analyzes the dichotomous understanding of the rational and the social that characterizes both sides of the science studies stalemate and the social account that she sees as necessary for an epistemology of science that includes the full spectrum of cognitive processes Throughout her account is responsive both to the normative uses of the term knowledge and to the social conditions in which scientific knowledge is produced Building on ideas first advanced in her influential book *Science as Social Knowledge* Longino brings her account into dialogue with current work in social epistemology and science studies and shows how her critical social approach can help solve a variety of stubborn problems While the book focuses on epistemological concerns related to the sociality of inquiry Longino also takes up its implications for scientific pluralism The social approach she concludes best allows us to retain a meaningful concept of knowledge in the face of theoretical plurality and uncertainty

The Knowledge of Divine Things from Revelation, Not from Reason Or Nature John Ellis, 1837 Externalism about Knowledge Luis R. G. Oliveira, 2023-07-02 Externalism about knowledge is thriving in contemporary epistemology Nonetheless externalism is too often caricatured as merely reliabilism too often reduced to simply externalism about justification and rarely considered as a cohesive family of related but importantly different views Externalism About Knowledge addresses all of these issues by bringing new essays from leading externalist epistemologists working on seven different branches of this tradition process reliabilism tracking views safety views virtue epistemology proper functionalism naturalized epistemology and knowledge first epistemology This collection highlights their unity their differences their interconnections and their most recent challenges developments and extensions *Knowledge Automation* Alan N. Knowledge Rodrigo Borges,Claudio de Almeida,Peter D. Klein,2017-11-24 The Gettier Problem has shaped most of the fundamental debates in epistemology for more than fifty years Before Edmund Gettier published his famous 1963 paper it was generally presumed that knowledge was equivalent to true belief supported by adequate evidence Gettier presented a powerful challenge to that presumption This led to the development and refinement of many prominent epistemological theories for example defeasibility theories causal theories conclusive reasons theories tracking theories epistemic virtue theories and knowledge first theories The debate about the appropriate use of intuition to provide evidence in all areas of philosophy began as a debate about the epistemic status of the Gettier intuition The differing accounts of epistemic luck are all rooted in responses to the Gettier Problem The discussions about the role of false beliefs in the production of knowledge are directly traceable to Gettier's paper as are the debates between fallibilists and infallibilists Indeed it is fair to say that providing a satisfactory response to the Gettier Problem has become a litmus test of any adequate account of knowledge even those accounts that hold that the Gettier Problem rests on mistakes of various sorts This volume presents a collection of essays by twenty six experts including some of the most influential philosophers of our time on the various issues that arise from Gettier's challenge to the analysis of knowledge Explaining Knowledge sets the agenda for future work on the central problem of epistemology *Rescuing Reason* R. Nola,2012-12-06 Do knowledge and science arise from the application of canons of rationality and scientific method Or is all our scientific knowledge caused by socio political factors or by our interests in the socio political the view of sociologists of knowledge Or does it result from interplay of relations of power the view of Michel Foucault Or does our knowledge arise from the will to power the view of Nietzsche This volume sets out to

critically examine the theses of those who would debunk the idea of rational explanation The book is wide ranging The theories of method of Quine Kuhn Feyerabend amongst others are discussed and related to the views of Marx Foucault Wittgenstein and Nietzsche as well as sociologists of science such as Mannheim and Bloor The author provides a wide interpretative framework which links the doctrines espoused by many of these authors it is argued that they inherit many of the difficulties in the Strong Programme in the sociology of knowledge and that they fail to reconcile the normativity of knowledge with their naturalism It is argued that neither relativists sceptics nihilists sociologists of knowledge nor the postmodernists successfully debunk the claims of rational explanation far from it these theorists presuppose much of the theory of methodology they deny *The Routledge Companion to Epistemology* Sven Bernecker, Duncan Pritchard, 2011-01-19 Epistemology the philosophy of knowledge is at the core of many of the central debates and issues in philosophy interrogating the notions of truth objectivity trust belief and perception The Routledge Companion to Epistemology provides a comprehensive and the up to date survey of epistemology charting its history providing a thorough account of its key thinkers and movements and addressing enduring questions and contemporary research in the field Organized thematically the Companion is divided into ten sections Foundational Issues The Analysis of Knowledge The Structure of Knowledge Kinds of Knowledge Skepticism Responses to Skepticism Knowledge and Knowledge Attributions Formal Epistemology The History of Epistemology and Metaepistemological Issues Seventy eight chapters each between 5000 and 7000 words and written by the world's leading epistemologists provide students with an outstanding and accessible guide to the field Designed to fit the most comprehensive syllabus in the discipline this text will be an indispensable resource for anyone interested in this central area of philosophy The Routledge Companion to Epistemology is essential reading for students of philosophy **The Knowledge of Divine Things from Revelation, Not from Reason Or Nature ... his identity as a professional intellectual with the languages that were at hand A tightly focussed series of essays by scholars of international reputation and younger experts in the field John Donne s Professional Lives contains new discoveries and fresh interpretations It offers a revisionist interpretation of Donne s career and makes a polemical case for studying the full range of his writings Contributors JAMES CANNON DAVID CUNNINGTON LOUISA KNAFLA PETER MCCULLOUGH JESSICA MARTIN JEREMY MAULE MARY MORRISSEY STEPHEN PENDER JEANNE SHAMI ALISON SHELL JOHANN P SOMMERVILLE DAVID COLCLOUGH is a lecturer at Queen Mary University of London
