Fairholm,2013-06-20 This book is about values and principles that have formed the backbone of the exceptionality of America These values and principles have shaped the way leadership in America has evolved and prescribed the way leaders have practiced their craft It is about what both leaders and their followers implicitly know about what a good leader is and does and about why they follow one leader and not another The book is about how leaders in all facets of society think or should think about their interrelationships with other human beings For relationships is the essence of leadership We can only lead those in some kind of association with us as Only together can we do whatever task the leader of our particular organization asks of us today and every day of our lives This is true not just at work but in the family our collective social and recreational pursuits and even when alone doing something we want to get done Because all we do ultimately will impact our attitudes and actions or those of others For that finally is what leadership is impact on another This book identifies the values and principles of leadership the founding leaders identified and used and that have marked American culture for over two centuries in all dimensions of life It defines and delimits the actions and attitudes of mind of the exceptional leaders who first articulated and then led in terms of those values as they made America The ideas about exceptional leadership discussed are taken from their own leadership example and from their thoughtful conclusions The ideas are fully American These first leaders drew up the blueprint for what America is and has become Their creation has survived countless challenges over the two hundred years of its creation to become the United States of America Cultural Values in Strategy and Organization T. K. Das,2021-06-01 The field of strategy science has grown in both the diversity of issues it addresses and the increasingly interdisciplinary approaches it adopts in understanding the nature and significance of problems that are continuously emerging in the world of human endeavor These newer kinds of challenges and opportunities arise in all forms of organizations encompassing private and public enterprises and with strategies that experiment with breaking the traditional molds and contours The field of strategy science is also perhaps inevitably being impacted by the proliferation of hybrid organizations such as strategic alliances the upsurge of approaches that go beyond the customary emphasis on competitiveness and profit making and the intermixing of time honored categories of activities such as business industry commerce trade government the professions and so on The blurring of the boundaries between various areas and types of human activities points to a need for academic research to address the consequential developments in strategic issues Hence research and thinking about the nature of issues to be tackled by strategy science should also cultivate requisite variety in issues recognized for research inquiry including the conceptual foundations of strategy and strategy making and the examination of the critical roles of strategy makers strategic thinking time and temporalities business and other goal choices diversity in organizing modes for strategy implementation and the complexities of managing strategy to name a few This book series on Research in Strategy Science aims to provide

an outlet for ideas and issues that publications in the field do not provide either expressly or adequately especially as regards the comprehensive coverage deserved by certain emerging areas of interest The topics of the volumes in the series will keep in view this objective to expand the research areas and theoretical approaches routinely found in strategy science the better to permit expanded and expansive treatments of promising issues that may not sufficiently align with the usual research coverage of publications in the field Cultural Values in Strategy and Organization contains contributions by leading scholars on the role of cultural values in the field of strategy science research The 11 chapters in this volume cover the topics of ecological organizing and evolving cultural values corporate cultural responsibility cultural integration in mergers and acquisitions culture and paradoxical frames cultural values in the fair trade market national culture and legitimacy family businesses as values driven organizations cultural intelligence of executives building an alliance culture personal values of civil engineers and architects and cultural characteristics of Chilean and Brazilian workforces The chapters collectively present a wide ranging review of the noteworthy research perspectives on the role of cultural values in strategy and organization

Fairholm, 1997-03-25 This book seeks to promote a new spiritual approach to organizational leadership that goes beyond visionary management to a new focus on the spiritual for both leader and led Reflecting on the current crisis of meaning in America this book takes up the search for significance in peoples worklives in the products they produce and in the services they offer Recognizing that the new corporation has become the dominant community for many commanding most of our waking hours by providing a focus for life a measure of personal success and a network of personal relationships Fairholm calls on business leaders to focus their attention on the processes
