Mao's Invisible Hand Sebastian Heilmann, Elizabeth J. Perry, 2020-10-26 Observers have been predicting the demise of China s political system since Mao Zedong s death over thirty years ago The Chinese Communist state however seems to have become increasingly adept at responding to challenges ranging from leadership succession and popular unrest to administrative reorganization legal institutionalization and global economic integration What political techniques and procedures have Chinese policymakers employed to manage the unsettling impact of the fastest sustained economic expansion in world history As the authors of these essays demonstrate China s political system allows for more diverse and flexible input than would be predicted from its formal structures Many contemporary methods of governance have their roots in techniques of policy generation and implementation dating to the revolution and early PRC techniques that emphasize continual experimentation China s long revolution had given rise to this guerrilla style decisionmaking as a way of dealing creatively with pervasive uncertainty Thus even in a post revolutionary PRC the invisible hand of Chairman Mao tamed tweaked and transformed plays an important role in China s adaptive governance

The Chinese Economy in Crisis Xiaohu (Shawn) Wang, An'gang Hu, 2015-04-29

The authors of this work argue strongly that the decentralization that has taken place in China over the past two decades threatens to undermine the future of reform and perhaps even the state itself. They contend that reform has undermined state capacity in China and that the state's fiscal revenues as a percentage of GNP have declined and will continue to decline into the foreseeable future, thereby weakening China's ability to mobilize resources for modernization. *Chinese Provincial Leaders* Alan M. Glassman, Deane Zell, Shari Duron, 2005. An emergent approach to organizational strategy making assumptions that few organizations actually realize the goal of deliberative top down strategic planning and that effective strategy making occurs on a continual basis and is a shared activity of the entire organization. This innovative book provides the first in depth look at how real organizations are formulating and implementing strategic change under this new paradigm. The authors have dug deep into three large and varied organizations: Hewlett Packard, the California State University system and the County of Los Angeles and identified each one's efforts to develop a new strategic planning process better suited to match the current pace of change and environmental unpredictability. The book is filled with vignettes, quotes and real world examples that illustrate the trend toward faster more adaptive strategic planning processes. It is relevant for a wide range of business, governmental and non profit settings and should be required reading in any course on strategic planning.

Assessing the Balance of Power in Central-Local Relations in China John Donaldson, 2016-07-01 How do we understand the evolution of central local relations in China during the reform period This book addresses this question by focusing on eight separate issues in which the central local relationship has been especially salient government finance investment control regional development administrative zoning implementation culture social welfare and international relations Each chapter introduces a sector and the way the center and various local

governments have shared or divided power over the different periods of China's reform era. The balance of power is gauged dynamically over time to measure the extent to which one level of government dominates influences or shares power in making decisions in each of these particular domains as well as what is likely to occur in the foreseeable future. The authors assess the winners and losers of these changes among key actors in China's society.
