Political Space in Pre-industrial Europe Beat Kümin, 2016-04-22 Social and cultural studies are experiencing a spatial turn Micro sites localities empires as well as virtual or imaginary spaces attract increasing attention In most of these works space emerges as a social construct rather than a mere container This collection examines the potential and limitations of spatial approaches for the political history of pre industrial Europe Adopting a broad definition of political the volume concentrates on two key questions Where did political exchange take place How did spatial dimensions affect political life in different periods and contexts Taken together the essays demonstrate that pre modern Europeans made use of a much wider range of political sites than is usually assumed not just palaces town halls and courtrooms but common fields as well as back rooms of provincial inns and that spatial dimensions provided key variables in political life both in terms of territorial ambitions and practical governance and in the more abstract forms of patronage networks representations of power and the emerging public sphere As such this book offers a timely and critical engagement with the spatial turn from a political perspective Focusing on the distinct constitutional environments of England and the Holy Roman Empire one associated with early centralization and strong parliamentary powers the other with political fragmentation and absolutist tendencies it bridges the common gaps between

The Orders of Knighthood and the Formation of the British Honours System, 1660-1760 Antti Matikkala, 2008 Sheds considerable new light on the nature development and functions of the orders in a key phase of their history and goes a long way to explaining how such archaic institutions could flourish in a culture that is commonly thought anti traditional and especially hostile to the middle ages Professor JONATHAN BOULTON University of Notre Dame This is the first comprehensive study to set the British orders of knighthood properly into the context of the honours system by analysing their political social and cultural functions from the Restoration of the monarchy to the end of George II s reign It examines the revival of the Order of the Garter and the proposals to establish the Orders of the Royal Oak and the Esquires of the Martyred King at the Restoration the foundation 1687 and the revival 1703 4 of the Order of the Thistle as well as the foundation of the Order of the Bath 1725 It establishes just how central a part the orders played in the British high political life and its comprehensive and multidimensional approach carefully contrasts the idealistic discourse of virtue and honour to the real workings of the honours system it also makes the case for the Chivalric Enlightenment The orders over the water the Garter and the Thistle conferred by the Jacobite claimants are discussed for the first time in the context of the established British honours system Overall the comparison between the socially very restricted British and the increasingly meritocratic Continental orders highlights the isolation of the British honours system from the European tendencies
