Rebuilding Urban Neighborhoods Achievements Opportunities And Limits:

Rebuilding Urban Neighborhoods W Dennis Keating, Norman Krumholz, 1999-08-21 Rebuilding Urban Neighborhoods presents a timely look at some of the most troubled neighborhoods in eight American cities Atlanta Camden Chicago Cleveland East Saint Louis Los Angeles Miami and New York City The authors W Dennis Keating and Norman Krumholz review past federal policies and early assessments of the latest federal initiative the Empowerment Zone They find some signs of revival even in the most distressed urban neighborhoods but often as an overlay to persistent poverty and social problems The case studies emphasize the important roles played by Community Development Corporations and the book concludes with an analysis of the future prospects for distressed urban neighborhoods **Loserville** Clayton Trutor, 2022-02 2023 Bell Award for the Best Book on Georgia History A Sports Collectors Digest Best Baseball Book of 2022 A Public Books Public Pick of 2022 In July 1975 the editors of the Atlanta Constitution ran a two part series entitled Loserville U S A The provocatively titled series detailed the futility of Atlanta s four professional sports teams in the decade following the 1966 arrival of its first two major league franchises Major League Baseball s Atlanta Braves and the National Football League s Atlanta Falcons Two years later the Atlanta Hawks of the National Basketball Association became the city s third major professional sports franchise In 1972 the National Hockey League granted the Flames expansion franchise to the city making Atlanta the first southern city with teams in all four of the big leagues The excitement surrounding the arrival of four professional franchises in Atlanta in a six year period soon gave way to widespread frustration and eventually widespread apathy toward its home teams All four of Atlanta s franchises struggled in the standings and struggled to draw fans to their games Atlantans indifference to their new teams took place amid the social and political fracturing that had resulted from a new Black majority in Atlanta and a predominately white suburban exodus Sports could never quite bridge the divergence between the two Loserville examines the pursuit arrival and response to professional sports in Atlanta during its first decade as a major league city 1966 75 It scrutinizes the origins of what remains the primary model for acquiring professional sports franchises offers of municipal financing for new stadiums Other Sunbelt cities like San Diego Phoenix and Tampa that aspired to big league stature adopted Atlanta s approach Like the teams in Atlanta the franchises in these cities have had mixed results both in terms of on field success and financial stability **The Chicago Freedom Movement** Mary Lou Finley, Bernard LaFayette Jr., James R. Ralph Jr., Pam Smith, 2016-04-22 Six months after the Selma to Montgomery marches and just weeks after the passage of the Voting Rights Act of 1965 a group from Martin Luther King Jr s staff arrived in Chicago eager to apply his nonviolent approach to social change in a northern city Once there King s Southern Christian Leadership Conference SCLC joined the locally based Coordinating Council of Community Organizations CCCO to form the Chicago Freedom Movement The open housing demonstrations they organized eventually resulted in a controversial agreement with Mayor Richard J Daley and other city leaders the fallout of which has historically led some to conclude that

the movement was largely ineffective In this important volume an eminent team of scholars and activists offer an alternative assessment of the Chicago Freedom Movement s impact on race relations and social justice both in the city and across the nation Building upon recent works the contributors reexamine the movement and illuminate its lasting contributions in order to challenge conventional perceptions that have underestimated its impressive legacy

The Business of Black Power

Laura Warren Hill, Julia Rabig, 2012 Explores business development in the Black power era and the centrality of economic goals to the larger black freedom movement The Business of Black Power emphasizes the centrality of economic goals to the larger black freedom movement and explores the myriad forms of business development in the Black power era This volume charts a new course for Black power studies and business history exploring both the business ventures that Black power fostered and the impact of Black power on the nation s business world Black activists pressed business leaders corporations and various levels of government into supporting a range of economic development ventures from Black entrepreneurship to grassroots experiments in economic self determination to indigenous attempts to rebuild inner city markets in the wake of disinvestment They pioneered new economic and development strategies often in concert with corporate executives and public officials Yet these same actors also engaged in fierce debates over the role of business in strengthening the movement and some African Americans outright rejected capitalism or collaboration with business The ten scholars in this collection bring fresh analysis to this complex intersection of African American and business history to reveal how Black power advocates or those purporting a Black power agenda engaged business to advance their economic political and social goals They show the business of Black power taking place in the streets boardrooms journals and periodicals corporations courts and housing projects of America In short few were left untouched by the influence of this movement Laura Warren Hill is assistant professor of history at Bloomfield College Julia Rabig is a lecturer at Dartmouth College

Making Our Neighborhoods, Making Our Selves George C. Galster, 2019-03-13 Drawing on economics sociology geography and psychology Galster delivers a clear sighted explanation of what neighborhoods are how they come to be and what they should be Urban theorists have tried for decades to define exactly what a neighborhood is But behind that daunting existential question lies a much murkier problem never mind how you define them how do you make neighborhoods productive and fair for their residents In *Making Our Neighborhoods Making Our Selves* George C Galster delves deep into the question of whether American neighborhoods are as efficient and equitable as they could be socially financially and emotionally and if not what we can do to change that Galster aims to redefine the relationship between places and people promoting specific policies that reduce inequalities in housing markets and beyond

Process and Place in Urban Neighborhoods Geoff Smith, 2000

Activists in City Hall Pierre Clavel, 2013-02-15 In 1983 Boston and Chicago elected progressive mayors with deep roots among community activists Taking office as the Reagan administration was withdrawing federal aid from local

governments Boston's Raymond Flynn and Chicago's Harold Washington implemented major policies that would outlast them. More than reforming governments, they changed the substance of what the government was trying to do: above all, to effect a measure of redistribution of resources to the cities' poor and working classes and away from hollow goals of growth as measured by the accumulation of skyscrapers. In Boston, Flynn moderated an office development boom while securing millions of dollars for affordable housing. In Chicago, Washington implemented concrete measures to save manufacturing jobs against the tide of national policy and trends. *Activists in City Hall* examines how both mayors achieved their objectives by incorporating neighborhood activists as a new organizational force in devising, debating, implementing, and shaping policy. Based in extensive archival research enriched by details and insights gleaned from hours of interviews with key figures in each administration and each city's activist community, Pierre Clavel argues that key to the success of each mayor were numerous factors: productive contacts between city hall and neighborhood activists; strong social bases for their agendas; administrative innovations; and alternative visions of the city. Comparing the experiences of Boston and Chicago with those of other contemporary progressive cities—Hartford, Berkeley, Madison, Santa Cruz, Santa Monica, Burlington, and San Francisco—*Activists in City Hall* provides a new account of progressive urban politics during the Reagan era and offers many valuable lessons for policymakers, city planners, and progressive political activists. **The Politics of Place** Gregory J.

Crowley, 2005-11-04 In urban America, large-scale redevelopment is a frequent news item. Many proposals for such redevelopment are challenged, sometimes successfully and other times to no avail. *The Politics of Place* considers the reasons for these outcomes by examining five cases of contentious redevelopment in Pittsburgh, Pennsylvania, between 1949 and 2000. In four of these cases, the challengers to redevelopment failed to create the conditions necessary for strong democratic participation. In the fifth case, the proposed reconstruction of Pittsburgh's downtown retail district, 1997-2000, challengers succeeded, and Crowley describes the crucial role of independent nonprofit organizations in bringing about this result. At the heart of Crowley's discussion are questions central to any urban redevelopment debate: Who participates in urban redevelopment? What motivates them to do so? and what structures in the political process open or close a democratic dialogue among the stakeholders? Through his astute analysis, Crowley answers these questions and posits a framework through which to view future contention in urban redevelopment. **Environmental Policy Analysis and Practice** Michael R.

Greenberg, 2008-03-13 Pressing environmental challenges are frequently surrounded with stakeholders on all sides of the issues. Opinions expressed by government agencies, the private sector, special interests, nonprofit communities, and the media, among others, can quickly cloud the dialogue, leaving one to wonder how policy decisions actually come about. In *Environmental Policy Analysis and Practice*, Michael R. Greenberg cuts through the complicated layers of bureaucracy, science, and the public interest to show how all policy considerations can be broken down according to six specific factors: 1. the reaction of elected government officials; 2. the reactions of the public and special interests; 3. knowledge developed by

scientists and engineers 4 economics 5 ethical imperatives and 6 time pressure to make a decision The book is organized into two parts with the first part defining and illustrating each one of these criteria Greenberg draws on examples such as nuclear power pesticides brownfield redevelopment gasoline additives and environmental cancer but focuses on how these subjects can be analyzed rather than exclusively on the issues themselves Part two goes on to describe a set of over twenty tools that are used widely in policy analysis including risk assessment environmental impact analysis public opinion surveys cost benefit analysis and others These tools are described and then illustrated with examples from part one Weaving together an impressive combination of practical advice and engaging first person accounts from government officials administrators and leaders in the fields of public health and medicine this clearly written volume is poised to become a leading text in environmental policy
