Sowers, 2013-06-29 This book Recent Advances in Geriatrics is based on the proceedings of the 8th Course of the School of Gerontology and Geriatrics held in Erice Trapani Italy at the International Centre for Scientific Culture Ettore Majorana on March 20 25 1997 This international effort was organized jointly by professors from the University of Palermo Italy and from Wayne State University Michigan USA as a result of a cross cultural collaboration of several years _ The increasing average age of the populations in industrialized countries has resulted in increased interest in the different biological medical psychological and economic aspects related to the health and social care of the elderly Physicians and health care

practitioners are realizing the need for a revised approach to geriatric care. Comprising contributions of clinicians and scientists from Italy and North America, the present volume provides a multidisciplinary approach to many gerontological and geriatric problems examined from a scientific and a practical point of view. Several of the most important aspects of the aging process: the genetics of aging, body composition, modification, immunological, endocrinological, and renal physiology changes have been addressed. Data from a multi-center Italian study on centenarians is reported together with an update on clinical and pharmacological approaches to dementia syndromes and economic and social aspects related to the care of the elderly.
