Recent Advances In Blood Coagulation:

Recent Advances in Blood Coagulation Leon Poller, 1969 **Recent Advances in Blood Coagulation** L. Poller, 1981 Recent Advances in Thrombosis and Hemostasis K. Tanaka, E.W. Davie, 2009-01-15 Now more than ever thrombotic and thromboembolic disorders as well as related diseases such as malignancies arteriosclerosis diabetes mellitus hypertension and obesity are the leading causes of morbidity and mortality They have become urgent medical problems with serious economic consequences in industrialized and developing countries alike At the same time the impact of molecular biology and genetics on our understanding of thrombosis and hemostasis is rapidly growing stronger as well as our knowledge of regeneration and development of specific tissues organs and embryos Researchers are also constantly learning more about cardiovascular diseases as well as regulatory mechanisms for various intrinsic and extrinsic stimuli in viable tissues In this volume our intention has been to present the latest relevant information in molecular biology and genetics as well as the clinical implications of a better understanding of pathophysiology novel diagnostic methodologies and therapeutic applications for new methods of prevention in thrombosis hemostasis and related disorders including atherosclerosis The dramatic advances in knowledge of thrombosis hemostasis and vascular biology since the first publication of *Recent Advances in Thrombosis and Fibrinolysis* edited with Japanese colleagues in 1991 have required extensive revision in order to highlight and review recent progress in the field The editors also gratefully welcome the seven distinguished non Japanese authors who with their valuable contributions on subjects beyond the coverage by Japanese authors have made this new edition truly international **Recent Advances in Blood Coagulation** L. Poller, 1993 Recent Advances in Clinical Pathology Sidney Campbell Dyke, 1973 **E. Merck's Annual Report of Recent Advances in Pharmaceutical Chemistry and Therapeutics**, 1911 *Recent Advances in Anaesthesia and Intensive Care: Volume 23* J. N. Cashman, R. M. Grounds, 2005-01-06 *Recent Advances in Anaesthesia and Intensive Care* presents topics for anaesthetists from some of the world's leading authorities in their subjects **Merck's Annual Report of Recent Advances in Pharmaceutical Chemistry and Therapeutics**, 1913 **Recent Advances in Blood Coagulation** Poller, Leon Poller, C. A. Ludlam, 1996-01 This volume of the series discusses blood coagulation covering topics such as clinical fibrinolysis in vivo coagulation and thrombosis lupus anticoagulants antiplatelet agents non heparin glycosaminoglycans as antithrombotic agents and tissue factor pathway inhibitor Current Catalog National Library of Medicine (U.S.), 1969 Includes subject section name section and 1968 1970 technical reports *Index of NLM Serial Titles* National Library of Medicine (U.S.), 1981 A keyword listing of serial titles currently received by the National Library of Medicine **Recent advances in the treatment of epilepsy** Khojasteh Malek Mohammad, Mahmoud Rafieian-Kopaei, Antonella Riva, 2024-07-22 Epilepsy is one of the most common neurological chronic disorders characterized by unpredictable recurrent seizures which leads to brain dysfunction cognitive psychological and social disorders Various treatment options for epilepsy are antiepileptic drugs surgery neuromodulation

gene therapy and ketogenic diet However definitions diagnosis and treatment of epilepsy are still challenging issues for clinicians and researchers Antiepileptic drugs play a central and crucial role in the treatment of epilepsy patients Brivaracetam Cannabidiol CBD Cenobamate Everolimus and Fenfluramine are the five novel anticonvulsant drugs during the last 5 years Brivaracetam anticonvulsant effects are due to its highly selective affinity for synaptic vesicle protein 2A SV2A in the brain It is act as an SV2A ligand Among these drugs Cannabidiol is one of the prominent phytocannabinoids derived from the cannabis sativa The anticonvulsant mechanisms of action of CBD including antagonism of G protein coupled receptor 55 GPR55 desensitization of transient receptor potential vanilloid type 1 TRPV1 channels and potentiation of adenosine mediated signaling through inhibition of the equilibrative nucleoside transporter 1 ENT 1 and enhancement of GABAergic transmission The mechanisms of the antiseizure effect of Cenobamate are increasing the inactivated state of voltage gated sodium channels and acting as a positive allosteric modulator of the GABA A receptors by binding at a non benzodiazepine site Everolimus is a mammalian target of rapamycin mTOR inhibitor Fenfluramine is able to enhance extracellular serotonin levels modulate serotonergic and other neurologic receptors Nevertheless the exact mechanism of action of most of these drugs is unknown At least 30% of people with epilepsy have drug resistant epilepsy DRE therefore non pharmacological treatments have been considered the Vagus Nerve Stimulation VNS Trigeminal Nerve Stimulation TNS Transcranial Direct Current Stimulation tDCS Transcranial Magnetic Stimulation TMS are the most common neuromodulation based approaches Also in recent years a new field of GABA adenosine galanin and neuropeptide Y based cell and gene therapies for refractory epilepsy has emerged In spite of these advances significant gaps in knowledge still remain In particular the mechanisms underlying epilepsy including status epilepticus drug and surgical treatments are still not well elucidated Novel insights on pathophysiological mechanisms of epilepsy and new treatment options prompted us to collect the most recent publications on pharmacological and non pharmacological treatments of epilepsy So in this Research Topic we will focus on the advances in the field of treatment in epilepsy the pathophysiology and molecular aspects of seizure attacks and novel antiseizure medications *Hemostasis and Thrombosis* ,1966 Monthly with annual cumulation Recurring bibliography from MEDLARS data base Index medicus format Entries arranged under subject review and author sections Subject author indexes

National Library of Medicine Current Catalog National Library of Medicine (U.S.),1969 First multi year cumulation covers six years 1965 70 Fibrinolysis, Thrombolysis, and Blood Clotting: a Bibliography ,1966 **Care of the Critically Ill Patient** J. Tinker,M. Rapin,2013-04-17 During the past decade there has been a considerable expansion in the understanding assessment and treatment of critically ill patients An attempt to portray our present knowledge of this diverse field in a comprehensive textbook is therefore a formidable and daunting undertaking However many colleagues in different disciplines and from different countries convinced us of the need for such a work and greatly encouraged by their interest we embarked upon the project Any single text even a very long one cannot cover every aspect of critical illness Our first task

was therefore to define those areas of the subject that had to be included This we did on a systematic basis and although the final emphasis of the book is very largely directed to clinical matters we felt it pertinent to include in some detail accounts of relevant physiology and technology Care of the Critically Ill Patient is divided into twelve sections each concerned with major facets of critical illness each of the sixty eight chapters includes a topical and often extensive bibliography The many chosen contributors form an international group of specialists whose combined expertise embraces the topics that we have selected
