Recent Developments On Money And Finance:

Recent Developments on Money and Finance Gabriele Camera, 2006-01-09 Assembles theoretical contributions to monetary theory banking and finance This book includes papers spanning themes from monetary policy to the optimal design of financial systems and from the study of the causes of financial crises to payment systems design It serves as a reference to researchers interested in the study of financial systems

Recent Developments in Banking and Finance in the People's Republic of China, Hong Kong, and Taiwan United States. Congress. House. Committee on Banking and Financial Services, 1996 *Current Developments in Monetary and Financial Law, Vol. 4* International Monetary Fund, 2008-11-06 The Legal Department and the Institute of the IMF held their ninth biennial seminar for legal advisors of IMF member countries central banks and the papers published in this volume are based on presentations made by officials attending this seminar The seminar covered a broad range of topics including sovereign debt restructuring money laundering and the financing of terrorism financial system and banking supervision conflicts of interest and market discipline in the financial sector insolvency and other issues related to central banking

Recent Developments in Nonlinear Cointegration with Applications to Macroeconomics and Finance Gilles Dufrénot, Valérie Mignon, 2012-12-06 This book is an introductory exposition of different topics that emerged in the literature as unifying themes between two fields of econometrics of time series namely nonlinearity and nonstationarity Papers on these topics have exploded over the last two decades but they are rarely examined together There is undoubtedly a variety of arguments that justify such a separation But there are also good reasons that motivate their combination People who are reluctant to a combined analysis might argue that nonlinearity and nonstationarity enhance non trivial problems so their combination does not stimulate interest in regard to plausibly increased difficulties This argument can however be balanced by other ones of an economic nature A predominant idea today is that a nonstationary series exhibits persistent deviations from its long run components either deterministic or stochastic trends These persistent deviations are modeled in various ways unit root models fractionally integrated processes models with shifts in the time trend etc However there are many other behaviors inherent to nonstationary processes that are not reflected in linear models For instance economic variables with mixture distributions or processes that are state dependent undergo episodes of changing dynamics In models with multiple long run equilibria the moving from an equilibrium to another sometimes implies hysteresis Also it is known that certain shocks can change the economic fundamentals thereby reducing the possibility that an initial position is re established after a shock irreversibility
