Reducing the Barriers to International Trade in Accounting Services Lawrence J. White, 2008 Accounting has been a lead sector in the General Agreement on Trade in Services GATS negotiations to reduce barriers to trade in professional services This is no accident Accounting already has a substantial international component the largest accounting firms have major international presences and have been eager to operate in less restrictive environments Accounting is coming to be understood as a vital infrastructural element of financial services and as finance becomes more global accounting too should become more global Similarly as large businesses enterprises generally have become more international their need for more international accounting services has grown But despite the considerable international presences of the major accounting firms virtually all countries maintain various types of restrictions that impede the flow of accounting services across borders The consequences have been higher costs poorer service to clients and reduced efficiency as well as lower quality accounting auditing standards in many countries Substantial progress can and should be made to reduce the current barriers to freer trade in accounting services
