Silas Mary

Reflection And Beyond:

Beyond the Reflection's Edge Bryan Davis, 2009-05-26 Sixteen year old Nathan Shepherd has a great life traveling where the careers of his father an investigator and mother a renowned violinist take him until his parents are found murdered Left with only a mirror and notes from his father s last case Nathan goes into hiding at the remote country home of Tony his father s college buddy and Tony s teenage daughter Kelly The mysterious mirror must be a clue to what happened to his parents and when images appear in it people and things that don t exist Nathan and Kelly painstakingly gather evidence But the killers want the mirror too and danger threatens the teens at every turn As it becomes evident that Nathan s father had stumbled upon dark forces at work in the world several questions arise Could it be that the mirror is a portal to a parallel world Could this technology be used for evil purposes And could his parents still be alive trapped in another dimension Nathan and Kelly struggle to solve the mystery before they too become victims This chilling hair raising adventure is jam packed with action in a fantastical world where nothing is as it seems and even mirrors tell lies

Beyond Reflective Practice Helen Bradbury, Nick Frost, Sue Kilminster, Miriam Zukas, 2012-09-11 Reflective practice has moved from the margins to the mainstream of professional education However in this process its radical potential has been subsumed by individualistic rather than situated understandings of practice Presenting critical perspectives that challenge the current paradigm this book aims to move beyond reflective practice It proposes new conceptualisations and offers fresh approaches relevant across professions Contributors include both academics and practitioners concerned with the training and development of professionals Definitions of reflection which are often implicit often focus on the individual s internal thought processes and responsibility for their actions The individual what they did thought felt is emphasised with little recognition of context power dynamics or ideological challenge This book presents the work of practitioners educators academics and researchers who see this as problematic and are moving towards a more critical approach to reflective practice With an overview from the editors and fourteen chapters considering new conceptualisations professional perspectives and new practices Beyond Reflective Practice examines what new forms of professional reflective practice are emerging It examines in particular the relationships between reflective practitioners and those upon whom they practise It looks at the ways in which the world of professional work has changed and the ways in which professional practice needs to change to meet the needs of this new world It will be relevant for those concerned with initial and ongoing professional learning both in work and in educational contexts

Bruce King,2009-01-16 One of the landmarks in the history of mathematics is the proof of the nonexistence of algorithms based solely on radicals and elementary arithmetic operations addition subtraction multiplication and division for solutions of general algebraic equations of degrees higher than four This proof by the French mathematician Evariste Galois in the early nineteenth century used the then novel concept of the

permutation symmetry of the roots of algebraic equations and led to the invention of group theory an area of mathematics now nearly two centuries old that has had extensive applications in the physical sciences in recent decades The radical based algorithms for solutions of general algebraic equations of degrees 2 quadratic equations 3 cubic equations and 4 quartic equations have been well known for a number of centuries The quadratic equation algorithm uses a single square root the cubic equation algorithm uses a square root inside a cube root and the quartic equation algorithm combines the cubic and quadratic equation algorithms with no new features The details of the formulas for these equations of degree d $d = 2, 3, 4$ relate to the properties of the corresponding symmetric groups S_d which are isomorphic to the symmetries of the equilateral triangle for $d = 3$ and the regular tetrahedron for $d = 4$
