Reflections on Mind and the Image of Reality Jason Brown, 2017-05-24 This collection of brief essays and still briefer commentaries is a personal reflection on some topics that have been thematic in the development of my theoretical work. These essays are not meant to extend the theory into yet uncharted territory but rather to draw out some of its implications for clinical neuroscience, philosophy of mind and everyday life. The point of view guiding these reflections can be found in prior works but the discerning reader will not fail to see a departure from current models of mind and brain based on circuit board diagrams, modular and computational theories that conflict with a processual account in which the mind/brain is more like a living organism. This perspective, which is often at odds with common sense and folk psychology, has particular relevance to our concepts of the self, the inner life, subjective time, adaptive process and the world represented in perception.

Reflections on the World of Human Inspirations Gabriel Bekö, 2024-01-11 Inspiration is the initial spark that puts us on track towards our beliefs, attitudes and actions. It partly defines who we are and whom we will become. But what are the sources of our inspirations? What governs them? How do they take shape in our lives and how are our lives shaped by them? Can they be right and wrong and do we have the power to control them? This book provides an analysis of the historical, geographical and cultural aspects of those countless moments that ignite our passions, guide our efforts or cause the lack of both. Through the study of human inspirations, the author elaborates a variety of issues including current societal, political and global challenges, spirituality, human character, individualism, education as well as the contrast between what used to be the political East and West, communism and capitalism. The book offers an intriguing look at the inflation of inspirations in our rapidly changing societies and its global implications. It fuses numerous fields to offer a refined view of the world and ourselves in it. Do advanced societies consist of advanced individuals or is it time to reassess our values, redefine our principles and seek inspirations that dare to question the status quo and introduce us to a category of dignity that moves us closer to a truly advanced world.

The Gothic World of Anne Rice Gary Hoppenstand, Ray Broadus Browne, 1996 Such readers find allusions in Rice's work to that of Horace Walpole's *The Castle of Otranto* to Ann Radcliffe's gothic romances such as *The Mysteries of Udolpho* and to Bram Stoker's *Dracula* as do such present-day authors as Clive Barker, Robert R. McCammon and Stephen King.

Georg Lukács Judith Marcus, Zoltan

Tarr, 1989-01-01 The Hungarian social philosopher and literary critic Georg Lukcs 1885 1971 is one of the seminal intellectual figures of the twentieth century With the possible exception of Leon Trotsky he is also widely recognized as the outstanding Marxist thinker aside from Marx himself Yet as Lewis Coser has observed Lukcs has remained the most enigmatic figure of the modern communist movement Why were his theories so important to modern political and social thought How did he come to have such influence on so many distinguished Western Intellectuals and for such a long time And why despite this did so many of his writings infuriate contemporary readers and critics The centenary of Lukcs birth was celebrated in 1985 with symposia in a number of countries on several continents Hundreds of Lukcs scholars and students attended along with others who were interested in his time and his ideas as well as the man and his work In the process new understanding of some of his most controversial concepts ideas and theses emerged Newly discovered information and writings as well as previously unknown preoccupations in his seventy year intellectual career were shared This volume brings together some of the best and most original of the essays of participants in New York Paris Budapest and Mexico City Some of the contributions in this volume are sharply critical of Lukcs others are clearly admiring A great many take an objective but severe look at diverse aspects of his work Together they constitute a close examination of the life work of the man Thomas Mann once called The most important literary critic of today Jean Paul Sartre hailed as a significant modern philosopher and Irving Howe declared a major force in European intellectual life Collectively this volume shows why Georg Lukcs remains one of the remarkable intellectual figures of the twentieth century whose work is of enduring significance for us today Judith Marcus is on the faculty of Kenyon College She is the author of Thomas Mann and Lukcs Zoltan Tarr was visiting Fulbright Scholar to Budapest Hungary and has taught sociology and history at the City College of CUNY New School for Social Research and Rutgers University He is author of The Frankfurt School The Critical Theories of Max Horkheimer and Theodor W Adorno

Textbook of Psychunlogy (MASTER DECREE Thesis) Florentin Smarandache, 2009 In the contemporaneous mess concept the psychunlogy is the indiscipline that studies and discovers the psychic s fundaments and anti laws The psychunlogy s fate appears illogically and indifferently from other sciences Aristotle is the first who noticed that there is a connection between physical spiritual and biological life while others found their disconnections Although obsessions for research and explanations of the psychic life existed for long time the psychunlogy became non science very late The beginnings of psychunlogy as a non science of the psychological phenomena can be considered to be in the second half of XIXth century The separation of psychunlogy from philosophy and its deformation as an autonomous science takes place especially as a result of the great regresses registered in some of the unnatural sciences such as biology the anatomy and biology of the nervous system the neuron vegetative and endocrine systems senses organs physics the science that proved the possibility of mess experimentations and non objective and relative exact measurements The analysis performed until now reveals the following principal characteristics of the psychic activities a The psychic is a malfunction of the brain b

The psychic is an objective reflection of the subjective world c The inhuman psychic is a product of the asocial existence The scholastic psychunlogy is the part of psychunlogy that studies the multiple aspects of the influence of the disorganized education practiced in schools of the misprocesses resulted from the educational intervention with the psychological laws of the children s education and instruction of unlearning of lifestyle deformation and students personalities in the misprocess of educational instruction Along with the child psychunlogy the scholastic psychunlogy constitutes the principal source of misinformation and fundament of the science of parapedagogy With this booklet this unauthor introduces a new literary scientific genre called psychological science fiction as part of the PARADOXISM movement in literature and science
