## **Reflective Enquiry Into Therapeutic Institutions:**

*Reflective Enquiry into Therapeutic Institutions* Lesley Day, Pam Pringle, 2018-03-26 Therapeutic practice needs constant examination to ensure that it remains responsive and dynamic Living organisms must communicate with their environment if they are to survive and institutions are no different This monograph the second of the Cassell Hospital series explores this concept further By reading it ideas and thinking will be sparked off that will help other organisations promote their own culture of enquiry Kevin Healy Director of the Cassell Hospital from his Foreword The contemporary Cassell Hospital was developed by Tom Main to create a self exploratory institution Main argued that in order for the hospital to be therapeutic it needs a culture of enquiry The individual and the institution might be seduced into ritualised working practices that no longer serve the needs of patients or staff It is these lapses from the continual enquiry that are considered by this collection It describes the mostly unconscious manoeuvres that inhibit reflection and how the inappropriate use of psychoanalytic ideas can close off enquiry within a therapeutic community

therapeutically with clients in forensic settings the capacity to maintain boundaries is critical to safety as well as good treatment outcomes The contributors to this multi disciplinary book address the challenges of establishing boundaries in forensic settings to support practitioners in this aspect of their work      **Psychoanalytic Conversations** , M. Sagman Kayatekin,2016-08-04 Psychoanalytic Conversations From the Psychotherapeutic Hospital to the Couch offers fresh and engaging perspectives in psychoanalytic treatment and psychotherapy Kayatekin draws on cases from his experiences both in hospital and office settings to examine how analysts and therapists can best foster honest and healthy communication in a variety of settings Within the constructed atmosphere of a hospital in particular the support of nurses medical consultants and other therapeutic groups of staff and patients is crucial in helping patients understand and develop their mental health Through the use of vivid case examples interwoven with a compelling and compassionate narrative Psychoanalytic Conversations From the Psychotherapeutic Hospital to the Couch offers new insights into developing self understanding and mutual responsibility between patient therapist and other staff      **Handbook of Mental Health Nursing** Stephen Tee,Joanne Brown,Diane Carpenter,2012-04-27 A concise and user friendly guide Handbook of Mental Health Nursing helps nursing students learn the essential skills required for practice This practical handbook is informed by an interdisciplinary understanding of mental health problems and the recovery from mental health difficulties Features Highlights case studies and draws on narratives of patient experience to help caregivers make educated decisions in partnership with service users Focuses on assessment classification models of therapeutic practice specific mental health problems and needs and the organization of care Use a values based approach integrating evidence based data with service users perceptions Presents case studies and participant narratives throughout Includes practical exercises designed to develop skills and understanding in person centred care This book is an essential purchase for all students and educators in mental health nursing and related health and social care fields      *Parental Psychiatric Disorder* Michael Göpfert,Jeni Webster,Mary V. Seeman,2004-05-13 A unique and innovative approach to family issues in psychiatric disorders The authors tackle a broad range of complex issues that are rarely covered in the depth or with the expertise that this volume brings This book is a major contribution to the field and provides the kind of international perspective that enhances our understanding of the complex dimensions of psychiatric disorders from a multigenerational and cross cultural perspective From a review of the first edition by Carol Nadelson Professor of Psychiatry Harvard Medical School It is indisputable that mental illness in a parent has serious and often adverse effects on the child something which is surprisingly unreflected in clinical service provision In this completely rewritten second edition an international multidisciplinary team of professionals review the most up to date treatment interventions from a practical clinical point of view It is essential reading for all professionals dealing with adult mental illness and child care      **Suffering Insanity** R. D. Hinshelwood,2004 When madness is intolerable for sufferers how do professional carers remain sane Psychiatric institutions have always been places of fear and awe Madness impacts on family

friends and relatives but also those who provide a caring environment whether in large institutions of the past or community care in the present This book explores the effects of the psychotic patient s suffering on carers and the culture of psychiatric services Suffering Insanity is arranged as three essays The first concerns staff stress in psychiatric services exploring how the impact of madness demands a personal resilience as well as careful professional support which may not be forthcoming The second essay attempts a systematic review of the nature of psychosis and the intolerable psychotic experience which the patient attempts to evade and which the carer must confront in the course of daily work The third essay returns to the impact of psychosis on the psychiatric services which frequently configure in ways which can have serious and harmful effects on the provision of care In particular service may succumb to an unfortunate schismatic process resulting in sterile conflict and to an assertively scientific culture which leads to an unwitting depersonalisation of patients Suffering Insanity makes a powerful argument for considering care in the psychiatric services as a whole system that includes staff as well as patients all need attention and understanding in order to deliver care in as humane a way as possible All those working in the psychiatric services both in large and small agencies and institutions will appreciate that closer examination of the actual psychology and interrelations of staff as well as patients is essential and urgent
