The Central Nervous System of Vertebrates, Vol. 3/I H. Kuhlenbeck, 1970-05-27 In 1927 Hartwig Kuhlenbeck published a series of lectures on the central nervous system of vertebrates and gave neurobiology its standard reference for decades The present work now complete in 5 volumes represents a monumental expansion of the early lectures Headless Males Make Great Lovers Marty Crump, 2024-05-31 The natural world is filled with diverse not to mention quirky and odd animal behaviors Consider the male praying mantis that continues to mate after being beheaded the spiders insects and birds that offer gifts of food in return for sex the male hip pocket frog that carries his own tadpoles the baby spiders that dine on their mother the beetle that craves excrement or the starfish that sheds an arm or two to escape a predator's grasp Headless Males Make Great Lovers and Other Unusual Natural Histories celebrates the extraordinary world of animals with essays on curious creatures and their amazing behaviors In five thematic chapters Marty Crump a tropical field biologist well known for her work with the reproductive behavior of amphibians examines the bizarre conduct of animals as they mate parent feed defend themselves and communicate Crump's enthusiasm for the unusual behaviors she describes from sex change and free love in sponges to aphrodisiac concoctions in bats is visible on every page thanks to her skilled storytelling which makes even sea slugs dung beetles ticks and tapeworms fascinating and appealing Steeped in biology Headless Males Make Great Lovers points out that diverse and unrelated animals often share seemingly bizarre behaviors evidence Crump argues that these natural histories though outwardly weird are successful ways of living Illustrated throughout and filled with vignettes of personal and scientific interest Headless Males Make Great Lovers will enchant the general reader with its tales of blood squirting horned lizards and intestine ejecting sea cucumbers all in the service of a greater appreciation of the diversity of the natural histories of animals **Medical Books and Serials in Print**, 1984 **Aquatic Oligochaetes** Brenda M. Healy, Trefor B. Reynoldson, Kathryn A. Coates, 2012-12-06 The book contains papers on the biology of aquatic oligochaetes and some related groups They cover a wide range of topics including phylogeny taxonomy geographic distribution freshwater and marine ecology population dynamics histology and ultrastructure physiology and behaviour The wide scope is in line with recent trends in annelid research with less emphasis on pollution studies and faunistics and a renewed interest in experimental biology using new techniques **Medical and Health Care Books and Serials in Print**, 1986 **Textbook of Neural Repair and Rehabilitation: Volume 2, Medical Neurorehabilitation** Michael E.
