Regeneration The Story Of The Dome:

Regeneration Adam Nicolson, 1999 Adam Nicolson's book is a fascinating picture of the spirit of Britain in the new millennium coupled with a biography of the Dome and an analysis of the political background to its creation The inside story of Britain's first grand project since the 1940s is a picture of vision and idealism muddle and uncertainty and of a journey deeply unfamiliar to the political elite and the people

Cultural Capital Robert Hewison, 2014-11-11 Britain began the twenty first century convinced of its creativity Throughout the New Labour era the visual and performing arts museums and galleries were ceaselessly promoted as a stimulus to national economic revival a post industrial revolution where spending on culture would solve everything from national decline to crime Tony Blair heralded it a golden age Yet despite huge investment the audience for the arts remained a privileged minority So what went wrong In *Cultural Capital* leading historian Robert Hewison gives an in depth account of how creative Britain lost its way From Cool Britannia and the Millennium Dome to the Olympics and beyond he shows how culture became a commodity and how target obsessed managerialism stifled creativity In response to the failures of New Labour and the austerity measures of the Coalition government Hewison argues for a new relationship between politics and the arts

Life Between the Tides Adam Nicolson, 2025-08-22 Adam Nicolson explores the marine life inhabiting seashore rockpools with a scientist's curiosity and a poet's wonder in this beautifully illustrated book The sea is not made of water Creatures are its genes Look down as you crouch over the shallows and you will find a periwinkle or a prawn a claw displaying crab or a cluster of anemones ready to meet you No need for binoculars or special stalking skills go to the rocks and the living will say hello Inside each rock pool tucked into one of the infinite crevices of the tidal coastline lies a rippling silent unknowable universe Below the stillness of the surface course different currents of endless motion the ebb and flow of the tide the steady forward propulsion of the passage of time and the tiny lifetimes of the rock pool's creatures all of which coalesce into the grand narrative of evolution In *Life Between the Tides* Adam Nicolson investigates one of the most revelatory habitats on earth Under his microscope we see a prawn's head become a medieval helmet and a group of winkles transform into a Dickensian social scene with mollusks munching on Stilton and glancing at their pocket watches Or rather is a winkle more like Achilles an ancient hero throwing himself toward death for the sake of glory For Nicolson who writes with scientific rigor and a poet's sense of wonder The American Scholar the world of the rock pools is infinite and as intricate as our own As Nicolson journeys between the tides both in the pools he builds along the coast of Scotland and through the timeline of scientific discovery he is accompanied by great thinkers no one can escape the pull of the sea We meet Virginia Woolf and her *Waves* a young T S Eliot peering into his own rock pool in Massachusetts even Nicolson's father in law a classical scholar who would hunt for amethysts along the shoreline his mind on Heraclitus and the other philosophers of ancient Greece And of course scientists populate the pages not only their discoveries but also their doubts and errors their moments of quiet observation and their thrilling realizations Everything is within the rock pools

Nicolson,2023-10-17 Nicolson crafts a geography of the ancient world and a brilliant exploration of our connections to the past What is the nature of things What is justice How can I be myself How should we treat each other Before the Greeks the idea of the world was dominated by god kings and their priests Twenty five hundred years ago in a succession of small eastern Mediterranean harbor cities a few heroic men and women decided to cast off mental subservience and apply their own thinking minds to the conundrums of life These great innovators shaped the beginnings of western philosophy Through the questioning voyager Odysseus Homer explored how we might navigate our way through the world Heraclitus in Ephesus was the first to consider the interrelatedness of things Xenophanes of Colophon was the first champion of civility On the Aegean island of Lesbos the early lyric poets Sappho and Alcaeus asked themselves How can I be true to myself On Samos Pythagoras imagined an everlasting soul and took his ideas to Italy where they flowered again in surprising and radical forms The award winning writer Adam Nicolson travels with us through this transforming world and asks what light these ancient thinkers can throw on our deepest preconceptions Enhanced with maps photographs and artwork How to Be is an expedition into early ideas Nicolson takes us to the dawn of investigative thought and makes the fundamental questions of the ancient philosophers new again What are the principles of the physical world How can we be good in it And why do we continue to ask these questions It is an enthralling exhilarating journey **Relocating Britishness** Stephen Caunce,2004-11-27
