Turner, 2021-11-16 Since the early 1990s there has been a persistent drive towards professionalising the education sector with a particular focus on those responsible for teaching the post fourteen age group. This shift towards recognition of the sector in terms of the professionals who teach within it has led to constant repetitive revision of teaching standards, the regulation and subsequent de-regulation of the teaching qualifications and the introduction of professional bodies. This book aims to explore the way that professional identity develops for trainee teachers in the FE and Skills sector with a particular emphasis on the role that incidental learning has in this development. The author argues for a more holistic approach to the development of professionalism through these informal learning experiences as opposed to a criteria based approach.

Through the offenders' perspective, often quoting their candid responses, Stickle explores the motivations for metal theft as well as the techniques and methods for successfully committing theft. The book discusses how these methods and techniques are learned and identifies ways often through the thieves' own words to prevent metal theft.
