Researching Women And Sport:

Researching Women and Sport Gill Clarke, Barbara Humberstone, 2016-07-27 This book aims to fill an important gap in feminist literature. In so doing it addresses critical issues in feminist research around women's sport, physical activity and PE. All too frequently women's presence in the sporting arena is marginalised and rarely are women's experiences heard and analysed. Drawing on a diversity of women's perspectives and theoretical standpoints this book focuses upon the neglected process of research with women about sport. All contributors to this collection have drawn on their research to illuminate and illustrate the dilemmas and issues involved in researching women's lives. Women in Sport Leadership Laura J.

Burton, Sarah Leberman, 2017-06-26 Although women and girls participate in sport in greater numbers than ever before, research shows there has been no significant increase in women leading sport organizations. This book takes an international evidence-based perspective in examining women in sport leadership and offers future directions for improving gender equity. With contributions from leading international sport scholars and practitioners it explores the opportunities and challenges women face while exercising leadership in sport organizations and evaluates leadership development practices. While positional leadership is crucial, this book argues that some women may choose to exercise leadership in non-positional ways, challenging readers to consider their personal values and passions. The chapters not only discuss key topics such as gender bias, intersectionality, quotas, networking, mentoring and sponsoring but also present a variety of strategies to develop and support the next generation of women leaders in sport. A new model of how to achieve gender equity in sport leadership is also introduced. Women in Sport Leadership: Research and Practice for Change is important reading for all students, scholars, leaders, administrators and coaches with an interest in sport, business, policy and management as well as women's sport and gender studies.

Women in Sports Coaching Nicole M. LaVoi, 2016-03-02 Women in many Westernized countries encounter a wider variety of career opportunities than afforded in previous decades and the percentage of women leaders in nearly every sector is on the rise. Sport coaching, however, remains a domain where gender equity has declined or stalled despite increasing female sport participation. The percentage of women who coach women are in the minority in most sports and there is a near absence of women coaching men. This important new book examines why. Drawing on original, multi-disciplinary research from across the globe including first-hand accounts from practicing coaches, the book illuminates and examines the status of women in coaching, explores the complex issues they face in pursuing their careers and suggests solutions for eliminating the barriers that impede women in coaching. Developing an innovative model of intersectionality and power constructs through which to guide research, the book covers issues including sexual identity, race, motherhood, cross-gender coaching and media coverage to give voice to women coaches from around the world. As such, Women in Sports Coaching is essential reading for serious students and scholars of sports coaching, sport sociology or anyone with an interest in gender and sport. *Women, Sport, and Physical Activity* Helen Lenskyj, Canada. *Fitness and Amateur Sport*, 1991. Tourism Research Methods Brent W. Ritchie, Peter Burns, Catherine Palmer, 2005. Within the tourism industry there is a growing consensus on the need for research to investigate the economic, social and environmental impacts of tourism. However, existing research methods texts are based solely on either the business approach or the social science approach to tourism. This book aims to address this divide by integrating theory with practice through the inclusion of specific tourism research case studies alongside research theory. It

considers a wide range of research issues approaches and techniques with contributions from both experienced and new researchers
