Franklin, 2012-10-12 Planning undertaking and completing a research project from dissertations to presentations can be a daunting undertaking for any student involving a number of easily taken mis steps for those without adequate guidance The objective of any research project is to gather data analyse it based on your research question and present your findings and conclusions For students having the right approach to these steps can mean the difference between an easily handled process resulting in a well argued and presented project or panicked flailing misdirection and confusion For those fearful of not getting enough research done doing it the wrong way putting it together incorrectly or unsure of what the end result will be then Understanding Research is an invaluable guide to getting it right and putting fears to bed Successfully completing a research project is a major milestone in most university degrees and it should be daunting although not unassailable This book provides students with the guidance necessary to start undertake and present their research project in social science or the humanities This text addresses Where do I start How do I begin my research and pull it together into a research question takes the student through the process of project design starting research and gaining confidence in their choices Am I Researching the right things Is it taking me in the direction I want to go What direction is it taking me in explores the decision making process at all points of a research project and the implications of these decisions in the longer term Am I researching in the right way should I be conducting interviews reading articles or collecting statistical data outlines the practical and philosophical conundrums around specific techniques for gathering and analysing data Focussed explicitly on the needs and experiences of students and including a wealth of practical tips this work is an essential resource for all students embarking on a research project Understanding Research includes 90 illustrations 2 tables 21 text boxes Glossary Further Reading guides for each chapter **International Handbook of Internet Research** Jeremy Hunsinger, Lisbeth

Klastrup, Matthew Allen, 2010-06-17 Internet research spans many disciplines From the computer or information sciences through engineering and to social sciences humanities and the arts almost all of our disciplines have made contributions to internet research whether in the effort to understand the effect of the internet on their area of study or to investigate the social and political changes related to the internet or to design and develop software and hardware for the network The possibility and extent of contributions of internet research vary across disciplines as do the purposes methods and outcomes Even the epistemological underpinnings differ widely The internet then does not have a discipline of study for itself It is a

for research Baym 2005 an open environment that simultaneously supports many approaches and techniques not otherwise commensurable with each other There are of course some inhibitions that limit explorations in this field research ethics disciplinary conventions local and national norms customs laws borders and so on Yet these limits on the internet as a field for research have not prevented the rapid expansion and exploration of the internet After nearly two decades of research and scholarship the limits are a positive contribution providing bases for discussion and interrogation of the contexts of our research making internet research better for all These limits challenges that constrain the theoretically limitless space for internet research create boundaries that give definition to the field and provide us with a particular topography that enables research and investigation
