Researching Race And Racism:

Researching Race and Racism Martin Bulmer, John Solomos, 2004-07-31 This new work brings together contributions from some of the leading researchers in the field using the benefit of their experience to explore the practical and ethical issues involved in researching in this often controversial field

Racing Research, Researching Race France Winddance Twine, Jonathan Warren, 2000 This book is an examination of what it means to be conscious of race when one is doing research There are those who argue that just to acknowledge race is to perpetuate the biological myth of race But this book warns that is to confuse the biological with the social further arguing that the race of the researcher can be a significant factor in what information is revealed by interviewees and that this needs to be considered when planning a study or reviewing its results This book is the authors attempt to initiate a serious discussion of the potential ethical emotional analytical and methodological dilemmas generated by racial subjectivities racial ideologies and racial disparities in research

Researching 'Race' and Ethnicity Yasmin Gunaratnam, 2003-08-07 Gunaratnam's framework is rich in its examination and synthesis of approaches to the study of race the reward for the reader who does pick up the book is that the author deftly articulates the complicated view of research on race first from the quantitative perspective and then skilfully moves the reader to issues of race in qualitative research

Studies in Ethnicity and Nationalism This is a welcome book for those engaged in policy and empirical work with an active research agenda there is a level of theoretical sophistication in the text which is often missing from texts concerned with methods in this area

Race Relations Abstracts The particular value of this book to readers lies in the discussion of race ethnicity and research issues within a political and social context The author states her intention to explore some of the theoretical and practical dilemmas of researching race and ethnicity This is without question achieved I recommend it as essential reading for those concerned with increasing their awareness of issues relating to race ethnicity and research practice

Nurse Researcher This is a thought provoking and challenging book which demonstrated the fractured and fluid nature of difference and power in the research process Importantly it offers a guide to the ways in which research can be effectively and productively used in challenging the status quo

Diversity in Health and Social Care

Researching Race and Ethnicity provides an innovative discussion of the methodological epistemological and ethical challenges of doing qualitative research that is informed by questions of race ethnicity and social difference By identifying and challenging categorical thinking and many longstanding assumptions about the meanings of race and ethnicity the author gets to the heart of many of the everyday dilemmas and difficulties that researchers confront in the field but are rarely theorised or openly discussed

Yasmin Gunaratnam's insistence that race and ethnicity are a significant part of all qualitative research and are not the specialist concerns of those whose work is explicitly focussed upon race provokes a radical rethinking of current methodological debates How do racial and ethnic categories inform our approaches to research How does the racialised identity of the researcher and the research participants affect the research interaction and the

knowledge that we produce What are the assumptions that are made about racialised subjectivity and inter subjectivity How can we make sense of accounts in which race and ethnicity are silent or are non manifest How can we work ethically across difference In examining these and other questions the wide ranging discussions in the book are animated by examples drawn from the author s ethnographic research with white and minoritized research participants Through these examples readers will be able to engage with some of the complexities of research relationships power relations and ethical concerns about engagement disconnection and complicity in research The attention that the book gives to the excluded experiences of minoritized researchers will be of particular value to many readers Researching Race and Ethnicity is essential reading for students and academics in the social sciences

Researching Racism Muzammil Quraishi, Rob Philburn, 2015-04-21 A welcome and overdue contribution to the field Identifying a need for an empirical guide to complement the abundant theoretical literature this book combines a variety of practical avenues of advice with analytical sophistication without losing any of the subject matter s complexities The contextual chapters are well judged and informative while readers will surely find the careful selection and very clear presentation of the case studies particularly useful in thinking through the projects from start to completion Steve Garner Open University This book offers a one stop guide to the meaning of racism key studies in the field core methodologies and an agenda for research for the future Discussing the salient aspects of race and racism in contemporary society alongside methodological and practical considerations of qualitative research in the field Researching Racism is not only an original textbook but also a crucial guide for anyone beginning their own research on racism Based on Muzammil Quraishi and Rob Philburn s extensive background as researchers supervisors and teachers this book offers a clear and accessible account of an interdisciplinary and complex topic incorporates historical legislative and international dimensions of race and racism outlines and illustrates a range of qualitative research methods provides case studies and engaging examples includes a tool kit for researchers of racism This is an indispensable guide for students wanting to research race and racism across the social sciences

Researching Race and Racism Martin Bulmer, John Solomos, 2004 This new work brings together contributions from some of the leading researchers in the field using the benefit of their experience to explore the practical and ethical issues involved in researching in this often controversial field

Condition or Process? Researching Race in Education Adrienne D. Dixon, Gloria J. Ladson-Billings, Cecilia E. Suarez, William T. Trent, James D. Anderson, 2021-01-18 The question of why we need to think about how we research race demands a conceptualization of race that captures both its social construction and its temporal evolution We need both an understanding of race and clarity about how we talk about it in our design and conduct of research and in how we interpret and apply it in our findings As a field we can use research on race and racism in education to help construct social change Our purpose with this volume is to underscore the persistence of the discriminatory actions processes and the normalization of the use of race and class conditions to justify the existing and growing disparity between the quality of life and opportunity

for middle class and more affluent Whites and that for people of color and people of color who live in poverty As editors of this volume we wonder what more we could learn and understand about the process and condition of race if we dare to ask bold questions about race and racism and commit to methods and analyses that respect the experiences and knowledges of our research participants and partners

Researching Race in Education Adrienne D. Dixon, 2014-06-01 In traditional educational research race is treated as merely a variable In 1995 Gloria Ladson Billings and William F Tate IV argued that race is under theorized in education and called for educational researchers to pay closer attention to the relationship between race and educational inequity Ladson Billings and Tate 1995 In particular they argued drawing on legal scholar Derrick Bell s notion of Racial Realism Bell 1995 that racialized inequities are not accidental or aberrant rather racialized educational inequities are the result of particular and specific policies and practices that are designed to maintain particular forms of dominance and marginalization More specifically Bell and later Ladson Billings and Tate argue that racial inequity persists despite liberal policies and legislation that were ostensibly designed to eradicate it The Racial Realist perspective takes into the consideration the longevity and history of racism racial inequity and White supremacy in the U S and serves as a mirror to reflect back the limitations of proposed policies and legislation that fail to address those issues In this way Critical Race Theory and the scholars who draw on CRT view our work as an important check and balance in the effort toward racial equality

Condition Or Process? Researching Race in Education Adrienne Dixson, William Trent, Gloria Ladson-Billings, James Anderson, Cecilia Suarez, 2020-04 The question of why we need to think about how we research race demands a conceptualization of race that captures both its social construction and its temporal evolution We need both an understanding of race and clarity about how we talk about it in our design and conduct of research and in how we interpret and apply it in our findings As a field we can use research on race and racism in education to help construct social change Our purpose with this volume is to underscore the persistence of the discriminatory actions processes and the normalization of the use of race and class conditions to justify the existing and growing disparity between the quality of life and opportunity for middle class and more affluent Whites and that for people of color and people of color who live in poverty As editors of this volume we wonder what more we could learn and understand about the process and condition of race if we dare to ask bold questions about race and racism and commit to methods and analyses that respect the experiences and knowledges of our research participants and partners

Researching Race Hasmita Ramji, 2009 Social sciences Rethinking Race and Ethnicity in Research Methods John H Stanfield II, 2016-06-03 This collection of original work demonstrates the new ways in which particular research methodologies are used valued and critiqued in the field of race and ethnic studies Contributing authors discuss the ways in which their personal and professional histories and experiences lead them to select and use particular methodologies over the course of their careers They then provide the intellectual histories strengths and weaknesses of these methods as applied to issues of race and ethnicity and discuss the ethical practical and epistemological

issues that have influenced and challenged their methodological principles and applications Through these rigorous self examinations this text presents a dynamic example of how scholars engage both research methodologies and issues of social justice and ethics This volume is a successor to Stanfield s landmark *Race and Ethnicity in Research Methods* **Racing Research, Researching Race** France Winddance Twine, Jonathan W. Warren, 2000 A white woman studies upper class eighth grade girls at her alma mater on Long Island and finds a culture founded on misinformation about its own racial and class identity A black American researcher is repeatedly assumed by many Brazilian subjects to be a domestic servant or sex worker *Racing Race Researching Race* is the first volume of its kind to explore how ideologies of race and racism intersect with nationality and gender to shape the research experience Critical work in race studies has not adequately addressed how racial positions in the field as inflected by nationality gender and age generate numerous methodological dilemmas *Racing Research Researching Race* begins to fill this gap by infusing critical race studies with more empirical work and suggesting how a critical race perspective might improve research methodologies and outcomes The contributors to the volume encompass a wide range of disciplinary backgrounds including anthropology sociology ethnic studies women s studies political science and Asian American studies *Researching Racism* Muzammil Quraishi, Rob Philburn, 2015-04-21 A welcome and overdue contribution to the field Identifying a need for an empirical guide to complement the abundant theoretical literature this book combines a variety of practical avenues of advice with analytical sophistication without losing any of the subject matter s complexities The contextual chapters are well judged and informative while readers will surely find the careful selection and very clear presentation of the case studies particularly useful in thinking through the projects from start to completion Steve Garner Open University This book offers a one stop guide to the meaning of racism key studies in the field core methodologies and an agenda for research for the future Discussing the salient aspects of race and racism in contemporary society alongside methodological and practical considerations of qualitative research in the field *Researching Racism* is not only an original textbook but also a crucial guide for anyone beginning their own research on racism Based on Muzammil Quraishi and Rob Philburn s extensive background as researchers supervisors and teachers this book offers a clear and accessible account of an interdisciplinary and complex topic incorporates historical legislative and international dimensions of race and racism outlines and illustrates a range of qualitative research methods provides case studies and engaging examples includes a tool kit for researchers of racism This is an indispensable guide for students wanting to research race and racism across the social sciences *The ethics of researching the far right* Antonia Vaughan, Joan Braune, Meghan Tinsley, Aurelien Mondon, 2024-05-07 At a time when far radical and extreme right politics are becoming increasingly mainstream globally sometimes with deadly consequences research in these fields is essential to understand the most effective ways to combat these dangerous ideologies Yet engaging with texts and movements that do physical and verbal violence raises a number of urgent ethical issues Until recently this has remained understudied as

scholarship on the far right rarely delves explicitly and critically into the ethics of research This book seeks to remedy this significant gap in an otherwise extensive and growing literature Originating from a workshop series in 2020 in which an international group of academics at various career stages shared the ethical challenges and best practices they had developed in their research this edited collection draws together insights from these ongoing conversations offering urgent critical reflections on key ethical issues

Critical Issues in Anti-racist Research Methodologies George Jerry Sefa Dei, Gurpreet Singh Johal, 2005 Anti racism studies have blossomed over the years with scholarship and political work reinforcing each other to cement anti racist change But how do we understand anti racist research How is anti racist research methodology different from other methods of research investigation What are the principles of anti racism research This edited collection attempts to provide some answers by bringing together works that examine the perils and desires of anti racist research with a particular focus on the notion of difference and a serious consideration of the race gender class and sexuality intersections implications of educational research

Researching 'Race' and Ethnicity Yasmin Gunaratnam, 2003-09-03 Drawing upon ethnographic research the author uses detailed case study examples to show how race and ethnicity is produced negotiated and resisted in qualitative research encounters

Researching the Far Right Stephen D. Ashe, Joel Busher, Graham Macklin, Aaron Winter, 2020-11-09 Researching the Far Right brings together researchers from across the humanities and social sciences to provide much needed discussion about the methodological ethical political personal practical and professional issues and challenges that arise when researching far right parties their electoral support and far right protest movements Drawing on original research focussing mainly on Europe and North America over the last 30 years this volume explores in detail the opportunities and challenges associated with using ethnographic interview based quantitative and online research methods to study the far right These reflections are set within a wider discussion of the evolution of far right studies from a variety of disciplinary viewpoints within the humanities or the social sciences tracing the key developments and debates that shape the field today This volume will be essential reading for students and scholars with an interest in understanding the many manifestations of the far right and cognate movements today It also offers insight and reflection that is likely to be valuable for a wider range of students and scholars across the humanities and social sciences who are carrying out work of an ethically politically personally practically and professionally challenging nature

The SAGE Handbook of Race and Ethnic Studies Patricia Hill Collins, John Solomos, 2010-05-17 The SAGE Handbook of Race and Ethnic Studies is one of the best handbooks outlining the latest thinking on race and ethnic studies published in recent years The breadth of themes and the depth of discussion are ambitious offering the reader an A Z guide of contemporary thinking on race and ethnicity a valuable resource for scholars and activists alike Runnymede Bulletin What is the state of race and ethnic studies today How has the field emerged What are the core concepts debates and issues This panoramic critical survey of the field supplies researchers and students with a vital resource It is a rigorous focused

examination of the central questions in the field today The text examines The roots of the field of race and ethnic studies The distinction between race and ethnicity Methodological issues facing researchers Intersections between race and ethnicity and questions of sexuality gender nation and social transformation The challenge of multiculturalism Race ethnicity and globalization Race and the family Race and education Race and religion Planned and edited by a distinguished team of Anglo American scholars the Handbook pools an impressive range of international world class expertise and insight It provides a landmark work in the field which will be the measure of debate and research for years to come **Researching**

Marginalized Groups Kalwant Bhopal, Ross Deuchar, 2015-07-16 This edited collection explores issues that arise when researching hard to reach groups and those who remain socially excluded and marginalized in society such as access the use of gatekeepers ethical dilemmas voice and how such research contributes to issues of inclusion and social justice The book uses a wide range of empirical and theoretical approaches to examine the difficulties dilemmas and complexities surrounding research methodologies with particular groups It emphasizes the importance of national and international perspectives in such discussions and suggests innovative methodological procedures Doing Research on Crime and Justice Roy
