of the Peacekeeper Thomas W. Britt,Amy B. Adler,2003-09-30 In this remarkable volume a multinational team of scientists catalogs the stressors and benefits for combat trained soldiers deployed on missions where they are told to hold their fire and assume the role of peacekeeper Theory and direct research with peacekeepers is incorporated Missions covered include but are not limited to peacekeeping operations in Haiti Somalia Bosnia Kosovo Iraq and Lebanon The terminology of peacekeeping and military operations is listed The stressors threats dangers frustrations and benefits of the peacekeeper role are described in dramatic detail with additional attention to the Peacekeeper Stress Syndrome With the goal of increasing peacekeeper health and well being which in turn increases the likelihood of establishing a stable peace this volume also addresses interventions and preventative measures The extent of psychological distress and disorders following peacekeeping operations is documented Interventions are recommended for various phases of deployment in order to minimize the likelihood of post deployment psychological problems Experts in social industrial organizational health clinical and cross cultural psychology contribute to a multi dimensional perspective Each chapter author reports psychological

research with military personnel in peacekeeping operations **The United States Army Posture Statement** United States. Dept. of the Army,1998 Made, Not Born Bruce Newsome,2007-09-30 Why do the combat capabilities of individual soldiers vary so much This book seeks to provide an answer to this and other questions about variability in combat performance Some soldiers flee quickly from the battlefield while others endure all hardships until the bitter end Some combat units can perform numerous types of missions while others cannot keep themselves organized during peacetime Some militaries armed with obsolete weapons have out fought enemies with the latest weapons just as some massively outnumbered armies have beaten back much larger opponents In this first social scientific study of the effectiveness of combat troops Newsome evaluates competing explanations for the varying combat capabilities and performances There are four main explanations each emphasizing the influence of a single factor The first focuses on material endowments How well funded are the troops Do they have the latest protective gear and the most advanced weaponry Second some analysts claim that democracies produce better commanders superior strategies more motivated personnel or better managed personnel others however associated those characteristics with more authoritarian forms of government Third is the idea that giving more power to the troops on the ground in individual combat units empowers them with decision making capability and adaptability to fast changing situations and circumstances Newsome presents evidence that decentralized personnel management does correlate with superior combat performance Fourth soldier capabilities and performance often are assumed to reflect intrinsic attributes such as prior civilian values Newsome argues that the capabilities of combat soldiers are acquired through military training and other forms of conditioning but he does not entirely discount the role of a soldier s individual character In the age old nature vs nurture argument he finds that intrinsic qualities do count but that extrinsic factors such as training and environment matter even more **Soldiers** ,1976 *Army Logistician* ,2000 The official magazine of United States Army logistics *Department of Defense Appropriations for 1996: Quality of life, senior enlisted advisors* United States.
