Crawford,2001-11 **Understanding Neighbourhood Dynamics** Maarten van Ham,David Manley,Nick Bailey,Ludi Simpson,Duncan MacLennan,2012-09-26 This rare interdisciplinary combination of research into neighbourhood dynamics and effects attempts to unravel the complex relationship between disadvantaged neighbourhoods and the life outcomes of the residents who live therein It seeks to

overcome the notorious difficulties of establishing an empirical causal relationship between living in a disadvantaged area and the poorer health and well being often found in such places There remains a widespread belief in neighbourhood effects that living in a poorer area can adversely affect residents life chances These chapters caution that neighbourhood effects cannot be fully understood without a profound understanding of the changes to and selective mobility into and out of these areas Featuring fresh research findings from a number of countries and data sources including from the UK Australia Sweden and the USA this book offers fresh perspectives on neighbourhood choice and dynamics as well as new material for social scientists geographers and policy makers alike It enriches neighbourhood effects research with insights from the closely related but currently largely separate literature on neighbourhood dynamics [Urban Warfare](#) Raquel Rolnik, 2019-03-26 How finance and politics have caused the global housing crisis The most comprehensive survey of the current crisis *Urban Warfare* charts how the financial crisis and wider urban politics have left millions homeless and in financial desperation across the world The financialization of housing has become a global catastrophe leaving millions desperate and homeless Since the 2008 financial collapse models of home ownership originating in the US and UK are being exported around the world Using examples from across the globe Rolnik shows how our cities have been sold to construction companies and banks while supported by government facilitated schemes such as the right to buy subsidies and micro financing Our homes and neighbourhoods have become the last subprime frontiers of capitalism organised by those who benefit the most *Successful Mortgage Lending Strategies for the Underserved* David Listokin, 1998 [Urban Politics of Human Rights](#) Janne Nijman, Barbara Oomen, Elif Durmuş, Sara Miellet, Lisa Roodenburg, 2022-11-14 Increasingly urban actors invoke human rights to address inequalities combat privatisation and underline common aspirations or to protect vested private interests The potential and the pitfalls of these processes are conditioned by the urban and deeply political These urban politics of human rights are at the heart of this book An international line up of contributors with long term engagement in this field shed light on these politics in cities on four continents and eight cities presenting a wealth of empirical detail and disciplinary theoreticalisation perspectives They analyse the city society the urban actors involved and the mechanisms of human rights mobilisation In doing so they show the commonalities in rights engagement in today s globalised and often deeply unequal cities characterised by urban law private capital but also communities that rally around concepts as the right to the city Most importantly the chapters highlight the conditions under which this mobilisation truly contributes to social justice be it concerning the simple right to presence cultural rights accessible housing or in times of COVID health care *Urban Politics of Human Rights* provides indispensable reading for anyone with a practical or theoretical interest in the complex deeply political and at times also truly promising interrelationship between human rights and the urban Creative Commons Attribution Non Commercial No Derivatives 4.0 license
