Audiences Ian Christie, 2025-10-01 This timely volume engages with one of the most important shifts in recent film studies the turn away from text based analysis towards the viewer Historically this marks a return to early interest in the effect of film on the audience by psychoanalysts and psychologists which was overtaken by concern with the effects of film linked to calls for censorship and moral panics rather than to understanding the mental and behavioral world of the spectator Early cinema history has revealed the diversity of film viewing habits while traditional box office studies which treated the

audience initially as a homogeneous market have been replaced by the study of individual consumers and their motivations. Latterly there has been a marked turn towards more sophisticated economic and sociological analysis of attendance data. And as the film experience fragments across multiple formats the perceptual and cognitive experience of the individual viewer who is also an auditor has become increasingly accessible. With contributions from Gregory Waller, John Sedgwick and Martin Barker this work spans the spectrum of contemporary audience studies revealing work being done on local non-theatrical and live digital transmission audiences and on the relative attraction of large scale domestic and mobile platforms.

Craig, John Jackson, 2013-01-03 The Handbook of Communication History addresses central ideas, social practices and media of communication as they have developed across time, cultures and world geographical regions. The Handbook editors view communication as encompassing patterns, processes and performances of social interaction, symbolic production, material exchange, institutional formation, social praxis and discourse. As such the history of communication cuts across social, cultural, intellectual, political, technological, institutional and economic history. The volume examines the history of communication, the history of ideas of communication, the history of communication media and the history of the field of communication. Readers will explore the history of the object under consideration, relevant practices, media and ideas, review its manifestations in different regions and cultures, comparative dimensions and orient toward current thinking and historical research on the topic, current state of the field. As a whole the volume gathers disparate strands of communication history into one volume offering an accessible and panoramic view of the development of communication over time and geographical places and providing a catalyst to further work in communication history.
