Railsback, Bret C. Harvey, 2020-05-19

Ecologists now recognize that the dynamics of populations communities and ecosystems are strongly affected by adaptive individual behaviors Yet until now we have lacked effective and flexible methods for modeling such dynamics Traditional ecological models become impractical with the inclusion of behavior and the optimization approaches of behavioral ecology cannot be used when future conditions are unpredictable due to feedbacks from the behavior of other individuals This book provides a comprehensive introduction to state and prediction based theory or SPT a powerful new approach to modeling trade off behaviors in contexts such as individual based population models where feedbacks and variability make optimization impossible Modeling Populations of Adaptive Individuals features a wealth of examples that range from highly simplified behavior models to complex population models in which individuals make adaptive trade off decisions about habitat and activity selection in highly heterogeneous environments Steven Railsback and Bret Harvey explain how SPT builds on key concepts from the state based dynamic modeling theory of behavioral ecology and how it combines explicit predictions of future conditions with approximations of a fitness measure to represent how individuals make good not optimal decisions that

they revise as conditions change The resulting models are realistic testable adaptable and invaluable for answering fundamental questions in ecology and forecasting ecological outcomes of real world scenarios **Stepparenting** Marilyn Ihinger-Tallman, Kay Pasley, 1995-07-30 Pasley and Ihinger Tallman provide a critical analysis of the current literature on stepparenting and summarize the progress made in research theory and practice related to stepfamilies The chapters are written by contributors with expertise in various fields related to stepparenting The contributors discuss a range of concerns and issues theoretical concerns and present models useful to the study of stepparenting research related to relationships within stepfamilies and the development of new roles within stepfamilies and practical considerations related to family therapy stepfamilies and schools and stepparenting and the law **Effects of Individual Retirement Accounts on Resource Allocation Behavior** Chulgi Ko, 1988 Handbook of Marketing Barton A Weitz, Robin Wensley, 2006-08-11 NEW IN PAPERBACK The Handbook of Marketing is different that Barton Weitz and Robin Wensley are its editors should suggest something out of the ordinary A glance at the contributors e g Wilkie Webster Day Shocker Keller Hauser Winer Stewart Parasuraman Zeithaml puts the matter to rest The Handbook is an extraordinary effort The blurb on the dust jacket is an understatement the Handbook will be invaluable to advanced undergraduates graduate students academics and thoughtful practitioners in marketing the book is far more than that in short the Handbook is probably invaluable to all academic researchers Journal of Marketing Handbook of Marketing is a rich compilation of thorough reviews in the field of marketing management The editors have selected premier marketing scholars and have given them the opportunity to examine their area of expertise in a format much less confining than those provided by the major journals in the field The authors have taken this opportunity and have done an outstanding job not only of reviewing and structuring the extensive body of thought in many major areas of marketing management but also of providing valuable suggestions for further research They have brought together major contributions from the field of marketing and from other related disciplines I strongly encourage marketing scholars to consider Handbook of Marketing The text will certainly appeal to those with interests in marketing management it may also be useful to those who are more focused on methodological issues but interested in topics that need additional rigorous investigation In summary Weitz and Wensley should be congratulated for the excellent work in developing Handbook of Marketing The book fills a major void in the marketing literature on marketing management and will serve the discipline for many years to come Journal of Marketing Research This text achieves the rare goal of covering marketing clearly and deeply with no unnecessary examples or pretty pictures For the enquiring mind it is a wonderful link between a basic knowledge of marketing concepts and a grasp of where research in marketing is taking us Ken Simmonds Emeritus Professor of Marketing and International Business London Business School The Handbook of Marketing presents a major retrospective and prospective overview of the field of marketing and provides a landmark reference at a time when many of the traditional boundaries and domains within the marketing discipline have been subject to change A high calibre
