Engberg,Iben Have,Birgitte Stougaard Pedersen,2022-12-30 This volume offers a critical overview of digital reading  
practices and scholarly efforts to analyze and understand reading in the mediatized landscape Building on research about  
digital reading born digital literature and digital audiobooks The Digital Reading Condition explores reading as part of a  
broader cultural shift encompassing many forms of media and genres Bringing together research from media and literary  
studies digital humanities scholarship on reading and learning as well as sensory studies and research on multimodal and  
multisensory media reception the authors address and challenge print biased conceptions of reading that are still prevalent  
in research whether the reading medium is print or digital They argue that the act of reading itself is changing and rather  
than rejecting digital media as unsuitable for sustained or focused reading practices they argue that the complex media  
landscape challenges us to rethink how to define reading as a mediated practice Presenting a truly interdisciplinary  
perspective on digital reading practices this volume will appeal to scholars and graduate students in communication media
