Respect For Nature A Theory Of Environmental Ethics:

Respect for Nature Paul W. Taylor, 1986 Respect for Nature defends a biocentric theory of environmental ethics Without making claims for the moral rights of plants and animals Paul Taylor offers a reasoned alternative to the prevailing anthropocentric view according to which the natural environment and its wild biotic communities are valued only as objects for human use or enjoyment

Respect for Nature Paul W. Taylor, 1986 The Description for this book Respect for Nature A Theory of Environmental Ethics will be forthcoming

Respect for Nature Paul W. Taylor, 2011-04-11 What rational justification is there for conceiving of all living things as possessing inherent worth In Respect for Nature Paul Taylor draws on biology moral philosophy and environmental science to defend a biocentric environmental ethic in which all life has value Without making claims for the moral rights of plants and animals he offers a reasoned alternative to the prevailing anthropocentric view that the natural environment and its wildlife are valued only as objects for human use or enjoyment Respect for Nature provides both a full account of the biological conditions for life human or otherwise and a comprehensive view of the complex relationship between human beings and the whole of nature This classic book remains a valuable resource for philosophers biologists and environmentalists alike along with all those who care about the future of life on Earth A new foreword by Dale Jamieson looks at how the original 1986 edition of Respect for Nature has shaped the study of environmental ethics and shows why the work remains relevant to debates today

A Non-Philosophical Theory of Nature A. Smith, 2013-07-18 Utilizing Fran ois Laruelle s non philosophical method Smith constructs a unified theory of philosophical theology and ecology by challenging environmental philosophy and theology claiming that and engagement with scientific ecology can radically change the standard metaphysics of nature as well as ethical problems related to the natural

The Intrinsic Value of Nature Leena Vilkkä, 2021-11-15 What is intrinsic value What is the origin of value Are people always superior to nature This book is a philosophical analysis of the human relationship to the non human world It is a pioneering study of the philosophy of nature conservation in relation to the discussion of intrinsic value Vilkkä develops a naturalistic or naturocentric theory of value that is based on ethical extensionism and pluralism Vilkkä analyzes natural values and environmental attitudes zoocentrism biocentrism and ecocentrism This book forms a taxonomy for nature having intrinsic value The theory of intrinsic value is based on naturocentric and naturogenic values The book questions the thesis of weak anthropocentrism that denies the existence of naturogenic values In Vilkkä's theory animals and nature are the origin of value She defends the existence of zoogenic and biogenic values in the non human world and discusses the possibility of ecogenic value nature as a whole having value independent of human or animal minds Vilkkä analyzes the goodness and rights of nature the problem of priorities and ecological humanism A naturocentric recommendation is that the well being of animals and nature should have priority over human values at least in some real decision contexts Ecological humanism recommends an attitude of respect for people animals and nature The book includes an extensive glossary index and bibliography

Regarding Nature Andrew McLaughlin, 1993-01-01 McLaughlin philosophy City U of New York argues that industrialism is the cause of our current environmental crisis and that the solution requires a fundamental change in how we understand nature and humanity He reviews the capitalist socialist industrial and scientific views of nature the ideology of control anthropocentrism and other topics Paper edition unseen 16 95 Annotation copyright by Book News Inc Portland OR

A Radical Green Political Theory Alan Carter, 2013-12-16 This volume is the first systematic comprehensive and cogent environmental political philosophy It exposes the relationships between the ever worsening environmental crises the nature of prevailing economic structures and the role of the modern state and concludes that the combination of these factors is driving humanity towards destruction Innovative provocative and cutting edge A Radical Green Political Theory will be of enormous value to all those with an interest in the environment political theory and moral and political philosophy

Nature Alive Adam Scarfe, 2018-04-18 This volume pays homage to Alfred North

Whitehead's 1861-1947 profound lecture and essay entitled *Nature Alive* which was one of his most mature expressions of his process relational metaphysics a holistic conceptual framework that renders vivid the dynamic character of the natural world and the intrinsic purposiveness selective agency and creativity of living organisms Inspired by but not beholden to Whitehead's process metaphysical lens the contributors to this volume bring a multiplicity of philosophical orientations to the table in challenging the mechanistic and reductionistic neo Darwinian paradigm that is still dominant today in the life sciences Mechanistic neo Darwinism views nature and living organisms as machines namely as networks of externally related and linear causal switches dials levers pulleys and gears that are at the ready for technological and biotechnological manipulation Seeking a conceptual framework and a language that are more adequate to the study of the natural world and of living creatures than the mechanistic orientation the contributors to this volume explore several of the New Frontiers of Biology which are areas of biology whose findings to some extent go beyond the explanatory confines of the Modern Synthesis of natural selection and genetics Most notably emergence theory the theory of organic selection epigenetics homeostasis chronobiology and autopoiesis research can provide us with key insights that can assist us in explaining how living agents emerged including the evolutionary origins of mentality consciousness and mind Moreover attention to the New Frontiers of Biology can serve to re-enchant our understanding of the natural world and to prevent ecological devastation through a restoration to objectivity of notions such as intrinsic purposiveness selective agency creativity and intrinsic value

The Politics of Nature Andrew Dobson, Paul Lucardie, 2002-11 A balanced and comprehensive survey of current green political ideas their varying responses to fundamental problems in political theory and their relationships with other ideological traditions

Political Theory and the Environment Matthew Humphrey, 2020-04-22 This collection offers a sympathetic but critical perspective on contemporary ecological political theory and gives proposals for a reorientation of some of its key aspects

Nature and the Environment in Contemporary Religious Contexts Thomas Donlin-Smith, Muhammad Shafiq, 2018-06-11 This collection of essays discusses the human relationship with and responsibilities toward the natural environment from the perspective of religions and the social sciences The chapters examine a variety of conditions that have contributed to the contemporary environmental crisis including abuse of power economic greed industrialization deforestation and unplanned waste management They then discuss concepts from several different religious texts and traditions that promote environmental protection as a sacred moral duty for all humanity Religious concepts such as dharma duty toward Mother Earth tikkun Olam repair of the world khalifa people as deputies of God on earth amanah the universe as a trust in human hands and paticca samuppada dependent co-arising are employed to argue that all the components of the biosphere are integral to the cosmos each piece with its own value and role in the harmony of the whole The book makes it clear that religions can become more green and play a helpful role in raising our ecological consciousness and supporting preservation of the environment into the future

The Human Relationship to Nature Matthew R. Foster, 2016-11-02

Growing alarm over the harm done by humans to the natural world and even to the viability of our own industrial civilization compels us to ask the deeper moral question What should be the human relationship to nature Matthew R Foster starts by assessing three contrasting patterns of moral reasoning the Progress Ethic that created the world we live in the biblically inspired Stewardship Ethic and the Connection Ethic based on scientific understanding of the interdependence of all natural entities Critical analysis reveals that none of these ethics is able to sustain the values it advocates due to two unsupportable presumptions that the norms of human morality are commensurate with the natural world and that the value of an entity is an intrinsic property Foster argues that in order for a future environmental ethic to be both logically coherent and environmentally constructive it must start from unconventional notions First because nature will never be commensurate with human moral reasoning non rational resources must be employed despite the risks involved Second value resides in the relationship of one entity to another and does not belong intrinsically to either in short value is foremost a verb rather than a noun Foster proposes a new paradigm attentive to the realm of value relations among all natural entities one which offers mediating opportunities between nature and morality In this new ethic there are no shoulds Rather moral responsibilities to the natural entities around us are elective placing us in an unfamiliar yet potentially liberating network of relationships This book will be of interest to scholars both instructors and students of environmental ethics philosophy religion and intellectual history and all who are concerned about the environmental challenges of our time *A Theory of Environmental Leadership* Mark Manolopoulos, 2021-03-15 In *A Theory of Environmental Leadership* Mark Manolopoulos draws on his original model of leading outlined in his cutting edge book *Following Reason* to derive and develop the first properly systematic model of eco leadership Suppose humanity's relation with the Earth may be described in terms of leadership stages or modalities once upon a time the Earth led or ruled humanity and now we humans rule or lead the Earth When the Earth led the Earth flourished now that humankind leads the Earth flounders ecological crises multiply and intensify However there might be a third stage or modality of leadership humanity leading for the Earth leading in a way that allows the world including humans to re flourish What would be the nature of this truly environmental form of leadership *A Theory of Environmental Leadership* identifies and critically analyzes the two basic and incompatible positions associated with the way we construe and interact with the non human anthropocentrism human supremacism and ecocentrism ecological egalitarianism By rigorously analyzing and leveraging this polarity this book outlines an innovative theory of eco leadership together with some of its confronting but necessary measures Expansive and incredibly timely *A Theory of Environmental Leadership* is ideal for a range of audiences from scholars and students of environmental leadership studies to activists and policymakers The book's remarkable clarity and engaging character also makes it suitable for the general public *Duties Regarding Nature* Toby Svoboda, 2015-06-26 In this book Toby Svoboda develops and defends a Kantian environmental virtue ethic challenging the widely held view that Kant's moral philosophy has little to offer environmental ethics On the contrary Svoboda contends that

on Kantian grounds there is good moral reason to care about non human organisms in their own right and to value their flourishing independently of human interests since doing so is constitutive of certain environmental virtues Svoboda argues that Kant's account of indirect duties regarding nature can ground a compelling environmental ethic the Kantian duty to develop morally virtuous dispositions strictly proscribes unnecessarily harming organisms and it also gives us moral reason to act in ways that benefit such organisms Svoboda's account engages the recent literature on environmental virtue including Rosalind Hursthouse Philip Cafaro Ronald Sandler Thomas Hill and Louke van Wensveen and provides an original argument for an environmental ethic firmly rooted in Kant's moral philosophy
