Protection Process Katrin Bain,John Harris,2024-10-18 Despite the pivotal role played by parents in the child protection process little attention has been paid to how social workers perceive them Exploring representations of parents within Children s Services at the levels of policy organisation and frontline practice the concept of citizenship is used to construct a typology with ten variants of parent citizenship The typology reveals the complexities of parental representations and their relationship to the content of policy organisational environments and dominant societal themes as it uncovers how social workers represent parents in their day to day practice The book is a resource that can be used by students practitioners researchers and parent advocacy organisations to evaluate policy and practice and to contribute to the search for the best possible outcomes for families Arguing that parental participation in the child protection process is essential the book increases the visibility of parents and contributes to a much needed dialogue about working with parents in Children s Services **Children and Cross-Examination** J R Spencer,Michael Lamb,2012-06-01 In 2009 Stephen Barker was convicted of rape on the evidence of a little girl who was four and a half years old at the trial and about three and a half when first interviewed by the police The high point of the proceedings was the child s appearance as a live witness in order for Barker s counsel to attempt a cross examination This case focused attention on the need imposed by current English law for even tiny children to come to court for a live cross examination In 1989 the Pigot Committee proposed a scheme under which the whole of a young child s evidence including cross examination would be obtained out of court and in advance of trial In 1999 a provision designed to give effect to this was included in the Youth Justice and Criminal Evidence Act but it has not yet been brought into force The full Pigot proposal was implemented however in Western Australia and similar schemes operate in a number of European jurisdictions This book of essays examines a number of these schemes and argues the case for further reforms in the UK **Restorative Justice & Responsive Regulation** John Braithwaite,2002 Braithwaite s argument against punitive justice systems and for restorative justice systems establishes that there are good theoretical and empirical grounds for anticipating that well designed restorative justice processes will restore victims offenders and communities better than existing criminal justice practices Counterintuitively he also shows that a restorative justice system

may deter incapacitate and rehabilitate more effectively than a punitive system This is particularly true when the restorative justice system is embedded in a responsive regulatory framework that opts for deterrence only after restoration repeatedly fails and incapacitation only after escalated deterrence fails Braithwaite's empirical research demonstrates that active deterrence under the dynamic regulatory pyramid that is a hallmark of the restorative justice system he supports is far more effective than the passive deterrence that is notable in the stricter sentencing grid of current criminal justice systems

Answer to Jung Lynn Brunet, 2018-11-08 The Red Book is C. G. Jung's record of a period of deep penetration into his unconscious mind in a process that he called active imagination undertaken during his mid life period Answer to Jung Making Sense of The Red Book provides a close reading of this magnificent yet perplexing text and its fascinating images and demonstrates that the fantasies in The Red Book are not entirely original but that their plots characters and symbolism are remarkably similar to some of the higher degree rituals of Continental Freemasonry It argues that the fantasies may be memories of a series of terrifying initiatory ordeals possibly undergone in childhood using altered or spurious versions of these Masonic rites It then compares these initiatory scenarios with accounts of ritual trauma that have been reported since the 1980s This is the first full length study of The Red Book to focus on the fantasies themselves and provide such an external explanation for them Sonu Shamdasani describes The Red Book as an incomplete task that Jung left to posterity as a message in a bottle that would someday come ashore Answer to Jung brings its message to shore providing a coherent but disturbing interpretation

of each of the fantasies and their accompanying images Chapters Chapter 4 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
