Large-Scale Evacuation Michael K. Lindell, Pamela Murray-Tuite, Brian Wolshon, Earl J. Baker, 2018-12-07 *Large Scale Evacuation* introduces the reader to the steps involved in evacuation modelling for towns and cities, from understanding the hazards that can require large scale evacuations through understanding how local officials decide to issue evacuation advisories and households decide whether to comply, to transportation simulation and traffic management strategies. The author team has been recognized internationally for their research and consulting experience in the field of evacuations. Collectively, they have 125 years of experience in evacuation, including more than 140 projects for federal and state agencies. The text explains how to model evacuations that use the road transportation network by combining perspectives from social scientists and transportation engineers' fields that have commonly approached evacuation modelling from distinctly different perspectives. In doing so, it offers a step-by-step guide through the key questions needed to model an evacuation and its impacts to the evacuation route system, as well as evacuation management strategies for influencing demand and expanding capacity. The authors also demonstrate how to simulate the resulting traffic and evacuation management strategies that can be used to facilitate evacuee movement and reduce unnecessary demand. Case studies which identify key points to analyze in an evacuation plan, discuss evacuation termination and re-entry, and highlight challenges that someone developing an evacuation

plan or model should expect are also included This textbook will be of interest to researchers practitioners and advanced students

Postcolonial Disaster Pallavi Rastogi, 2020-04-15 Postcolonial Disaster studies literary fiction about crises of epic proportions in contemporary South Asia and Southern Africa the oceanic disaster in Sri Lanka the economic disaster in Zimbabwe the medical disaster in South Africa and Botswana and the geopolitical disaster in India and Pakistan Pallavi Rastogi argues that postcolonial fiction about catastrophe is underpinned by a Disaster Unconscious a buried but mobile agenda that forces disastrous events to narrate themselves She writes that in disaster fiction a literary Story and its real life Event are in constant dialectic tension In recent disasters Story and Event are tied together as the urgency to circulate information and rebuild in the aftermath of the disaster dictates the flow of the narrative As the Story acquires temporal distance from the Event such as the seventy three years since the partition of India in 1947 it plays more with form and theme to expand beyond a tale about an all consuming tragedy Story and Event are in a constant dance with each other and the Disaster Unconscious plays the tune to which they move Rastogi creates a narratology for postcolonial disaster fiction and brings concepts from Disaster Studies into the realm of literary analysis

Promoting the Psychosocial Well Being of Children Following War and Terrorism M.J. Friedman, A. Mikus-Kos, 2005-11-15 This book aims to promote the psychosocial well being of children following war and terrorism Experts from the former Yugoslavia Israel Palestine NATO countries and elsewhere have contributed chapters detailing conceptual models and practical examples of community based interventions for children Some authors are experienced experts with extensive experience in providing community based interventions for children during post war reconstruction Others have scientific experience conducting either research or program evaluation for such interventions A third group of participants has experience in both the provision and evaluation of psychosocial services to children These different perspectives are easy to identify from one chapter to the next and provide a creative tension regarding competing approaches to conceptualizing and implementing the most effective interventions It is clear that such alternative views are complementary rather than contradictory The purpose of this book therefore is to show how community based psychosocial approaches can benefit from a thoughtful synthesis of both experiential and empirical strategies that link individual mental health psychosocial well being with the health and stability of the community
