Conclusion

Environmental Human Rights in the Anthropocene Walter F. Baber, James R. May, 2023-03-09 Human rights and environmental protection are closely intertwined and both are critically dependent on supportive legal opportunity structures These legal structures consist of access to the courts legal stock or the set of available standards and precedents on which to base litigation and institutional receptiveness to potential litigation These elements all depend on a variety of social political and economic variables This book critically analyses the complexities of uniting human rights advocacy and environmental protection Bringing together international experts in the field it documents the current state of our environmental human rights knowledge strategically critical questions that remain unanswered and the initiatives required to develop those answers It is ideal for researchers in environmental governance and law as well as interested practitioners and advanced students working in public policy political science and environmental studies

Environmental Human Rights Markku Oksanen, Ashley Dodsworth, Selina O'Doherty, 2017-09-05 The nature of environmental human rights and their relation to larger rights theories has been a frequent topic of discussion in law environmental ethics and political theory However the subject of environmental human rights has not been fully established among other human rights concerns within political philosophy and theory In examining environmental rights from a political theory perspective this book explores an aspect of environmental human rights that has received less attention within the literature In linking the constraints of political reality with a focus on the theoretical underpinnings of how we think about politics this book explores how environmental human rights must respond to the key questions of politics such as the state and sovereignty equality recognition and representation and examines how the competing understandings about these rights

are also related to political ideologies Drawing together contributions from a range of key thinkers in the field this is a valuable resource for students and scholars of human rights environmental ethics and international environmental law and politics more generally *Elder Law* Ann Numhauser-Henning, 2017-02-24 The ageing population poses a huge challenge to law and society carrying important structural and institutional implications This book portrays elder law as an emerging research discipline in the European setting in terms of both conceptual and theoretical perspectives as well as elements of the law Bonhoeffer and the Responsibility for a Coming Generation Robert Vosloo, Teddy Sakupapa, Karola Radler, Ashwin Thyssen, 2024-07-25 This volume draws together a selection of high quality presentations at the 13th International Bonhoeffer Congress held in January 2020 in Stellenbosch South Africa The theme of the conference was How a coming generation is to go on living Bonhoeffer and the response to our present crisis and hope The selected essays engage thoroughly and creatively with this concern to take responsibility not only for our own personal and communal life in all of its complexity and richness but also for the ethos and society that future generations will inherit from us The pertinence of Bonhoeffer's question is addressed in these contributions anew as we experience threats on a global level to socio political economic and inter religious stability and solidarity Attention is also given to some important challenges experienced in the so called global South and the reality of climate change and ecological devastation implies that the question of how future generations are going to go on living is linked to the fact that we live on a planet that is in jeopardy Also included as an appendix is the powerful sermon preached by the South African Anglican archbishop of Cape Town Thabo Makgoba at the opening worship service of the congress *Genethics* David Heyd, 2023-04-28 Unprecedented advances in medicine genetic engineering and demographic forecasting raise new questions that strain the categories and assumptions of traditional ethical theories Heyd's approach resolves many paradoxes in intergenerational justice while offering a major test case for the profound problems of the limits of ethics and the nature of value This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1992 **Moral and Political Reasoning in Environmental Practice** Andrew Light, Avner De-Shalit, 2003 Essays showing how environmental philosophy can have an impact on the world by integrating abstract reasoning with actual environmental practice **The Human Factor in Ecological Research** Carol Eckhardt, 1998 **The Breathless Dilemma: Ruminating Air Pollution's Philosophical Quandaries** Raleigh Huff, In this thought provoking book delve into the intersection of philosophy and the intricate issue of air pollution The author takes you on a philosophical journey allowing you to explore various perspectives and ponder the ethical implications of this prevalent environmental issue By examining the fundamental principles of philosophy you will be challenged to think critically about the complex relationship between human actions and the health of

our planet As you embark on this exploration be prepared to have your beliefs questioned your thoughts expanded and your understanding of air pollution deepened **Deliberative Democracy for the Future** Genevieve Fuji Johnson,2008-01-01

The theory of deliberative democracy promotes the creation of systems of governance in which citizens actively exchange ideas engage in debate and create laws that are responsive to their interests and aspirations While deliberative processes are being adopted in an increasing number of cases decision making power remains mostly in the hands of traditional elites In *Democratic Illusion* Genevieve Fuji Johnson examines four representative examples participatory budgeting in the Toronto Community Housing Corporation Deliberative Polling by Nova Scotia Power Incorporated a national consultation process by the Canadian Nuclear Waste Management Organization and public consultations embedded in the development of official languages policies in Nunavut In each case measures that appeared to empower the public failed to challenge the status quo approach to either formulating or implementing policy Illuminating a critical gap between deliberative democratic theory and its applications this timely and important study shows what needs to be done to ensure deliberative processes offer more than the illusion of democracy Future Freedoms Elizabeth K. Markovits,2017-10-02

What do present generations owe the future In *Future Freedoms* Elizabeth Markovits asks readers to consider the fact that while democracy holds out the promise of freedom and autonomy citizens are always bound by the decisions made by previous generations Motivated by the contemporary political and theoretical landscape Markovits examines the relationship between democratic citizenship and time by engaging ancient Greek tragedy and comedy She reveals the ways in which democratic thought in the West has often hinged on ignoring intergenerational relationships and the obligations they create in favor of an emphasis on freedom as sovereignty She claims that democratic citizens must develop a set of self directed practices that better acknowledge citizens connections across time cultivating a particular orientation toward themselves as part of much larger transgenerational assemblages As celebrations and critiques of Athenian political identity the ancient plays at the core of *Future Freedoms* remind readers that intergenerational questions strike at the heart of the democratic sensibility This invaluable book will be of interest to students researchers and scholars of political theory the history of political thought classics and social and political philosophy **Ethics in Planning** Martin Wachs,2017-07-28

Some planners limit discussions of ethics to simple though important questions about the propriety of their daily activities This approach to ethics restricts discussion of professional ethics to the propriety of everyday social and professional relationships It ignores the broader ethical content of planning practice methods and policies While narrow definitions of ethical behavior can easily preoccupy public officials and professional associations they divert attention from more profound moral issues Martin Wachs argues that ethical issues are implicit in nearly all planning decisions For illustrative and educational reasons it is useful to divide ethics in planning into four distinct categories The first category includes the moral implications of bureaucratic practices and rules of behavior regarding clients and supervisors The second category includes ethical judgments which planners make in exercising their

administrative discretion More complex and represented by a third category are the moral implications of methods and the ethical content of criteria built into planning techniques and models The final type represents the basic choices which society makes those inherent in the consideration of major policy alternatives Ethics in Planning contains a variety of representative papers to capture the current state of thinking This book will be important as a text for survey classes in professional ethics given by university planning programs It should also supplement short courses in planning ethics for practicing professionals and provide source materials for discussions of planning ethics sponsored by local chapters of the American Planning Association and similar organizations It gathers together exemplary and critical works thus it will also interest individual planners in a field that only continues to grow in recognition and importance
