, 1980 **Corporate Responsibility Under the Alien Tort Statute** Michael Koebele, 2009 The Alien Tort Statute also referred to as the Alien Tort Claims Act is a US statute that provides a cause of action for violations of international law While originally used against former dictators and military officials who fled to the U S after the respective governments in their home countries have been removed human rights activists are now targeting transnational corporations or multinational enterprises for human rights violations in connection with their investments made outside the United States This book examines and analyzes corporate liability under the Alien Tort Statute *Business and Human Rights* Dalia Palombo, 2020-02-06 This book analyses the accountability of European home States for their failure to secure the human rights of victims from host States against transnational enterprises It argues for a reconfiguration of the relationship between multinational enterprises and individuals both of which have been profoundly changed by globalisation Enterprises are now supranational entities with numerous affiliates all over the world Likewise individuals are increasingly part of a global community Despite this the relationship between the two is deregulated Addressing this gap this study proposes an innovative business and human rights litigation strategy Human rights advocates could file a test case against a European home State at the European Court of Human Rights for its failure to secure the rights of victims vis vis European multinational enterprises The book illustrates why such a strategy is needed and points to the lack of effective legal remedies against European multinationals The goal is to empower victims from developing countries against European States which are failing to hold multinational enterprises accountable for human rights abuses Company Law Alan Dignam, John P.
