Restoration Of Dialogue:

The Restoration of Dialogue Ronald B. Miller, 1992-01-01 This book is intended as a remedy a bibliotherapy of sorts for a serious malady that afflicts the mental health professions themselves but that remains largely undiagnosed The disorder requiring urgent treatment is the splitting of clinical theory from its historical and logical foundation in Western philosophy the resulting inability to speak effectively about theoretical differences and the fragmentation into rival professions and theoretically isolated schools of treatment What is required as an antidote to this tendency toward a dogmatic schismatic and often cultist approach to clinical theory is the recognition of the philosophical nature of these theoretical disputes and the restoration of philosophical methods of analysis and dialogue to a central role in the development of clinical theory In this manner the energies that currently are invested in the protection of professional turf and ideological diatribe may be devoted instead to collaborative discourse research and action This is what will be required to make genuine headway in understanding that particular form of human misery and suffering that is variously called behavior disorders emotional disturbance problems in living or mental illness PsycINFO Database Record c 2004 APA all rights reserved *Airless Worlds and the Restoration of Psychic Breathing* Steven Stern, 2025-08-11 This book focuses on the recognition and psychoanalytic treatment of a debilitating form of early relational trauma poignantly described by Steven Stern as airless world syndrome A patient can be said to be living in an airless world when one or both parents have failed to recognize or worse actively negated their child's subjective experience and needs instead imposing their subjective reality on the child such that the child had no choice but to adopt the parents reality as their own When a child's mind is captured in this way what Stern calls identification with negation the result is an unconscious bondage to the internalized negating other which can be disabling to the senses of self personal agency and realness With extended clinical examples in every chapter Stern brings the reader into the depths of each patient's airless world and the co created needed relationship that ultimately fitfully transforms it Written in a detailed yet accessible style this book is invaluable to psychoanalysts and psychotherapists in practice and in training

The Palgrave Handbook of Environmental Restorative Justice Brunilda Pali, Miranda Forsyth, Felicity Tepper, 2022-09-19 This handbook explores the dynamic new field of Environmental Restorative Justice. Authors from diverse disciplines discuss how principles and practices of restorative justice can be used to address the threats and harms facing the environment today. The book covers a wide variety of subjects from theoretical discussions about how to incorporate the voice of future generations, nature and more than human animals and plants in processes of justice and repair, through to detailed descriptions of actual practices of Environmental Restorative Justice. The case studies explored in the volume are situated in a wide range of countries and in the context of varied forms of environmental harm from small local pollution incidents to endemic ongoing issues such as wildlife poaching to cataclysmic environmental catastrophes resulting in cascades of harm to entire ecosystems. Throughout it reveals how the relational and caring character of a restorative ethos can be conducive to finding solutions to problems through sharing stories, listening, healing and holding people and organisations accountable for prevention and repairing of harm. It speaks to scholars in Criminology, Sociology, Law and Environmental Justice and to practitioners, policy makers, think tanks and activists interested in the environment.

The Need for Words Patsy Rodenburg, 2023-07-13 As one of the world's leading voice coaches, Patsy Rodenburg describes practical ways to approach language using Shakespeare, Romantic poetry, modern prose and a range of other texts to help each of us discover our own unique need for words. In Part One, Rodenburg attacks the myth that there is only one correct way to speak by clearing away the blocks that can make language inaccessible. Part Two, a series of language and text exercises, connects the voice to the shape and quality of individual words and phrases. Drawing on Rodenburg's time spent coaching in the worlds of business,

and politics this edition reflects on how the way we use words has changed since the book was first published It brings a renewed focus on the language of power spoken in the worlds of politicians and company directors This gives readers an insight into the potency of clear direct communication Language and text exercises provide readers with unmediated access to this new research allowing them to practice and master the language and words that drive the modern world Foreword by Antony Sher
