USITC Publication, 1997 **American Foreign Policy, Current Documents**, 1969 **Trust and the Islamic Advantage** Avital Livny, 2020-09-03

In much of the Muslim world, Islamic political and economic movements appear to have a comparative advantage. Relative to similar secular groups, they are better able to mobilize supporters and sustain their cooperation long term. Nowhere is this more apparent than in Turkey, a historically secular country that has experienced a sharp rise in Islamic-based political and economic activity. Drawing on rich data sources and econometric methods, Avital Livny challenges existing explanations such as personal faith for the success of these movements. Instead, Livny shows that the Islamic advantage is rooted in feelings of trust among individuals with a shared religious group identity. This group-based trust serves as an effective substitute for more generalized feelings of interpersonal trust, which are largely absent in many Muslim plurality countries. The book presents a new argument for conceptualizing religion as both a personal belief system and collective identity.
