Gender Disparities in Africa's Labor Market Jorge Saba Arbache, Alexandre Kolev, Ewa Filipiak, 2010-08-05 Women's earnings are a fraction of male's earnings in several African countries It is tempting to conclude that this wage gap is a sign of discrimination against women in the labor market Yet this book uses new datasets to show that the gap is not simply the result of discrimination in the labor markets but rather the result of multiple factors including access to education and credit cultural values and household duties and above all labor market conditions It shows that gender disparities grow when economies are not functioning well and labor markets are tiny More than the effect of discrimination it seems that job rationing causes those with better human capital and those with more power in the household usually the men to take the few jobs that are available It is hardly surprising then that in a region where only a fraction of the labor force finds jobs in the formal sector gender disparities in earnings are so high The book further documents that firm level and sector characteristics are additional powerful factors in explaining the gender disparities in the labor market As the causes are not simple neither are the solutions multifaceted strategies are needed By providing environments that support economic growth and more importantly job creation as well as by promoting equal access for women to education and rethinking the attitudes that limit what women may achieve governments in the region will substantially improve the well-being of all their peoples Gender Disparities in Africa's Labor Market helps to fill the knowledge gap and identify the links between gender disparities and poverty reduction The work was implemented in collaboration with a range of poverty and labor market studies to maximize its usefulness for policy dialogue in specific countries This book will be of interest to policy makers students academics gender experts and all those interested in gender issues and development

Dutta, 2001-05-24 Covers such topics as financial meltdown and industrial development money and financial markets exchange rates capital flows economic reforms human capital development impact of the financial crisis on growth and poverty incidence as well as other development problems in Asia Pacific countries *Books in Print Supplement*, 1985 *International Congress Calendar*, 1996 **The Times Index**, 1998 Indexes the Times Sunday times and magazine Times literary supplement Times educational supplement Times educational supplement Scotland and the Times higher education supplement *Restructuring Asian Economics for the New Millennium*, 2001 Business Groups in East Asia Sea-Jin Chang, 2006-03-02 The 1997 Asian Crisis principally affected Thailand Indonesia Malaysia and Korea as well as other East Asian countries heavily dependent on intra regional trade Banks and other financial institutions quickly become insolvent and heavily indebted industrial firms went bankrupt Many of these firms were affiliated with the business groups of this region yet most groups did not immediately collapse indeed they proved remarkably robust some surviving and even prospering This book examines these East Asian business groups and their subsequent restructuring following the Asian Crisis East Asian nations embarked on very different trajectories to this common external shock The Asian Crisis affected the inter relationships among the socio cultural environment the state and

the market of each country quite differently and had distinct effects on the operations of these countries business groups. This slow yet divergent pattern of development provides evidence against theories of rapid global convergence. Yet East Asian business groups face an uncertain future. Foreign investors' influence has increased substantially since the crisis as East Asian governments had to accommodate their demands to keep attracting foreign capital. Governments supervise banks more closely and have loosened restrictions on mergers and hostile takeovers further strengthening the discipline of the market. Various entry barriers that had inhibited foreign multinationals from competing in national markets were lifted exposing business groups to intensified foreign competition. Under these new conditions business groups in East Asia should reconfigure their business structures and adjust their corporate governance systems to regain momentum for further growth. Business groups will continue to be important vehicles for the sustained future growth of this region and this book presents a substantial amount of new data on this which will be of interest to academics, researchers and advanced students of East Asian business and business practitioners working within the region.

The Asian Economic Catharsis Frank-Jürgen Richter, 2000-09-30. One result of the Asian economic crisis has been to shatter the belief that Asian ways of management are superior to Western ways. Now just to survive Asian firms have come to rethink their entire way of managing and in his latest book Richter assisted by his contributing authors gives a sharply focused analysis of how they are doing it. Emerging questions are how do Asian firms adjust to the new economic realities and How do they develop their management style. There are plenty of new opportunities in Asia to play the new game but they must be grasped and productively channeled. Richter and his contributors conclude that in the end the Asian economic crisis or catharsis may well be a blessing in disguise. It provides an opportunity to completely review the way things stand in Asia. Like entrepreneurs who built the Asian economies today's firms have the opportunity to lead a revival if they can redirect their businesses. This is an important resource for professionals in all multinational organizations and for academics and their upper level students of international business.

The Years of Living Dangerously Stephen Vines, 2000. Is the financial crisis in Asia really over. In this study of the Asian financial crisis Vines argues that the 1997 collapse of Asia's economy could be repeated because many Asian companies remain fundamentally weak.

Although the crisis did not originate in Asia Asian economies and financial markets felt its impact which is likely to deepen significantly in the coming years. The book brings to light not only the cyclical impacts of the crisis but also those that could influence the long term growth rate and structure of economies.
