## **Restructuring The Labor Market The Implications For Youth:**

Young People in the Labour Market Andy Furlong, John Goodwin, Henrietta O'Connor, Sarah Hadfield, Stuart Hall, Kevin Lowden, Réka Plugor, 2017-10-12 Levels of suffering among young people have always been much higher than governments suggest. Indeed, policies aimed at young workers have often been framed in ways that help secure conformity to a new employment landscape in which traditional securities have been progressively removed. Increasingly punitive welfare regimes have resulted in new hardships, especially among young women and those living in depressed labour markets. Framed by the ideas of Norbert Elias, *Young People in the Labour Market* challenges the idea that changing economic landscapes have given birth to a Precariat and argues that labour insecurity is more deep-rooted and complex than others have suggested. Focusing on young people and the ways in which their working lives have changed between the 1980s recession and the Great Recession of 2008-2009 and its immediate aftermath, the book begins by drawing attention to trends already emerging in the preceding two decades. Drawing on data originally collected during the 1980s recession and comparing it to contemporary data drawn from the UK Household Longitudinal Study, the book explores the ways in which young people have adjusted to the changes, arguing that life satisfaction and optimism are linked to labour market conditions. A timely volume, this book will be of interest to undergraduate and postgraduate students as well as postdoctoral researchers who are interested in fields such as Sociology, Social Policy, Management and Youth Studies.

Young People in the Workplace Christina Cregan, 1999. Based on a five-stage survey of a large cohort of early school leavers carried out in London over the years 1978-81, it examines patterns of continuity and change with respect to gaining work and training, promotion opportunities, reasons for union membership, quit decisions, and job mapping behaviour and its outcomes.

**Restructuring the Labour Market** D. Ashton, M. Maguire, M. Spilsbury, 2016-07-27. This book represents an advance in our knowledge of the labour market. For the first time, it combines the analysis of both quantitative and qualitative data to produce an explanation of the main changes which have transformed the labour market during the recession. For the first time, it demonstrates the segmented character of the youth labour market and the significance of the local labour markets. The result is a substantial contribution to labour market segmentation theory and to the analysis of social policy in this field.

Youth at the Margins ELENA SÁNCHEZ-MONTIJANO, Jose SÁNCHEZ GARCÍA, 2019-01-23. The 2011 Arab uprisings led to a great proliferation of studies on the situations in the Arab countries of the Mediterranean, with particular attention given to their young people whose role was particularly central. Eight years on, in-depth exploration is still needed of the conditions in which millions of mainly young people demanded change. In this context, this volume examines the state and diversity of the forms of socioeconomic, political, and cultural marginalization facing the region's young men and women, as well as the strategies and routes of contestation by which they escape them. Through the interdisciplinary empiricism of this book, based on the results emerging from the SAHWA Project funded by the European Commission under the Seventh Framework Programme grant agreement no 613174.

we aspire to build a complex description and analysis of the current situation of the Arab Mediterranean youth. The aim is to fathom out young people's patterns, agency and living conditions, focusing on the relational character of the juvenile worlds actively constructed by themselves. The authors explore the main trends that are reflected in the social strategies, cultural constructions and changes within the Arab youth population and whether the creation of new lifestyles and the emergence of youth cultures are an indicator of sociopolitical transitions. To answer all these questions, the researchers have conducted a comprehensive study in five Arab Mediterranean countries: Algeria, Egypt, Lebanon, Morocco, and Tunisia. Based on mixed method research, the data collection is composed of two primary sources: the SAHWA Youth Survey 2016-2017 in which 10,000 young people were interviewed and the SAHWA Ethnographic Fieldwork 2015 involving more than 200 young people.

**The Handbook for the Future of Work** Julie MacLeavy, Frederick Harry Pitts, 2024-12-26. The Handbook for the Future of Work offers a timely and critical analysis of the transformative forces shaping work and employment in the twenty-first century. Focusing on the past two decades, the handbook explores how technological advancements, automation, and a shifting capitalist landscape have fundamentally reshaped work practices and labour relations. Beyond simply outlining the challenges and opportunities of automation, the handbook integrates these emerging realities with established discussions of work. Importantly, it moves beyond dominant technology-centric narratives, probing into broader questions about the nature of capitalism in a time of crisis and the contestation for alternative economic models. With contributions from established and emerging authors based in institutions around the world, the handbook offers a systematic overview of the developments that have sparked radical shifts in how we live and work and their multifaceted impacts upon social relations and identities, practices, and sectors, politics, and environments. The handbook is unique in its exploration of the potential for economic transformations to reshape the centrality of work in our social and political imaginaries. A useful resource for students and researchers, the handbook serves as an essential guide to this new intellectual landscape.

**Research Handbook on Decent Work in a Post-COVID-19 World** Jason Heyes, Janine Leschke, Kirsty Newsome, Michael Reich, Adrian Wilkinson, 2025-01-09. The Research Handbook on Decent Work in a Post-COVID-19 World is an essential read assessing prospects for employment, labour standards, and the organisation of work in the wake of the pandemic. Contributing authors cover key developments and challenges in the field, from low pay to social protection.

**Youth in India** Nitin Bisht, Falguni Pattanaik, 2023-09-29. This book provides an overview of youth labour force and workforce participation in India and explores the dynamics of a changing youth labour market. Despite notifying a demographic dividend phase, a significant share of youth witnessed higher exclusion, unemployment, and not-in-employment education or training from the Indian labour market. Therefore, this book investigates the role of education in the labour market and examines open unemployment. It conceptualizes the not-in-employment education or training (NEET) status of youth in the Indian context and explores the heterogeneity of NEET youth by analysing the push and pull role of demographic and socio-economic variables. Furthermore, this book examines the

nexus of youth labour market status and economic growth in India to provide plausible recommendations for youth's higher inclusive and sustained participation in the labour market and the country's development pathway. The book creates room for necessary policy interventions considering the changing dynamics of youth labour market and contemplating the challenges of skill technology and Industry 4.0 which entails a higher emphasis on re-shape, re-focus and re-share for enhanced and sustained inclusion of youth in labour market. It is a necessary resource for students, researchers, policymakers and industry partners interested in exploring and understanding the political economy of youth labour market in India.

Understanding Youth In Late Modernity France, Alan, 2007-04-01. Understanding Youth in Late Modernity is a highly readable book which lends itself both as a solid introduction and a reference point to the historical developments and theoretical debates taking place within the discipline of youth studies. This book provides a highly accessible text for anybody interested in the subject of youth and its changing role in late modernity. I thoroughly recommend it. *Journal of Contemporary European Studies*. This illuminating new book embeds our understanding of the youth question within a historical context. It shows how the ideas of past political action in conjunction with the diverse paradigms of social science disciplines have shaped modern conceptions of the youth question. This relationship between the political and the academic is then explored through a detailed examination of contemporary debates about youth in areas such as transitions, education, crime, policy and criminology, consumption and youth culture. From this analysis, the book is able to show how the youth question in late modernity is being shaped. This important text includes a historical overview of the making of modern youth, identifying major changes that took place over three centuries. Examples of how political and academic responses construct youth as a social problem. An evaluation of the impact of social change in late modernity on our understanding of the youth question and the everyday lives of the young. The book concludes by suggesting that in contemporary understandings of the youth question, significant differences exist between the political and the academic. Major challenges exist if this gap is to be addressed and a new public social science needs to emerge that reconstitutes debates about youth within a form of communicative democracy. Understanding Youth in Late Modernity is key reading for students and academics interested in the historical conception of the youth problem, its evolution throughout modernity and endeavours to find a solution.

Youth, The 'Underclass' and Social Exclusion Robert MacDonald, Robert Macdonald, 2020-07-24. The idea that Britain, the US and other western societies are witnessing the rise of an underclass of people at the bottom of the social heap, structurally and culturally distinct from traditional patterns of decent working class life, has become increasingly popular in the 1990s. Anti-work, anti-social and welfare-dependent cultures are said to typify this new, dangerous class, and dangerous youth are taken as the prime subjects of underclass theories. Debates about the family and single parenthood, about crime and about unemployment and welfare reforms have all become embroiled in underclass theories which, whilst highly controversial, have had remarkable influence on the politics and policies of governments in Britain and the US. Youth, the Underclass and Social Exclusion constitutes the

first concerted attempt to grapple with the underclass idea in relation to contemporary youth It focuses upon unemployment training the labour market crime homelessness and parenting and will be essential reading for students of social policy sociology and criminology

**Young People, Welfare and Crime** Ross Fergusson,2017-06-30 Offers a challenging interpretation of the ways in which young people s non participation is becoming marginalised and criminalised It re examines the causes and consequences of youth unemployment in and beyond the UK from an unusually wide range of social science disciplines and perspectives

*Elgar Encyclopedia on Gender in Management* Jean Helms Mills,Albert J. Mills,Kristin S. Williams,Regine Bendl,2025-01-09 Bringing together an expert team of international contributors this Encyclopedia showcases key aspects of gender in management including women s leadership mentoring women managerial style and sexual harassment

**England & Wales Youth Cohort Study** Kenneth Roberts,Cherie Chadwick,1991

**Global Youth Unemployment** Ross Fergusson,Nicola Yeates,2021-04-30 This timely book introduces a fresh perspective on youth unemployment by analysing it as a global phenomenon Ross Fergusson and Nicola Yeates argue that only by incorporating analysis of the dynamics of the global economy and global governance can we make convincing comprehensive sense of these developments The authors present substantial new evidence spanning a century pointing to the strong relationships between youth unemployment globalisation economic crises and consequent harms to young people s social and economic welfare worldwide The book notably encompasses data and analysis spanning the Global South as well as the Global North

Young People and Social Change Andy Furlong,Fred Cartmel,2006-12-16 Reviews of the first edition Not only does the clarity of the authors writing make the book very accessible but their argument is also illustrated throughout with a broad range of empirical material undoubtedly a strong contribution to the study of both contemporary youth and late modern society Youth Justice A very accessible well evidenced and important book It succeeds in raising important questions in a new and powerful way Journal of Education and Work the book will be very popular with students and with academics The clarity of the organization expression and argument is particularly commendable I have no doubt that Young People and Social Change will rightly find its way onto the recommended reading lists of many in the field Professor Robert MacDonald University of Teesside A welcome update to one of the most influential and authoritative books on young people in modern societies With a fuller theoretical explanation and drawing on a comprehensive range of studies from Europe North America Australia and Japan the second edition of Young People and Social Change is a valuable contribution to the field The authors examine modern theoretical interpretations of social change in relation to young people and provide an overview of their experiences in a number of key contexts such as education employment the family leisure health crime and politics Building on the success of the previous edition the second edition offers an expanded theoretical approach and wider coverage of empirical data to take into account worldwide developments in the field Drawing on a wealth of research evidence the book highlights key differences between the experiences of young people in different countries in

the developed world Young People and Social Change offers a wide ranging and up to date introductory text for students in sociology of youth sociology of education social stratification and related fields *Training and Employment Report of the Secretary of Labor* United States. Dept. of Labor,1998 *Education, Training and the Future of Work I* John Ahier, Geoff Esland,2013-10-18 A central claim of this volume is that public policy in education and training can only be properly understood if it is seen in relation to prevailing economic and employment conditions It has become increasingly apparent that the neo liberal economic policies pursued by Western governments during the 1980s and 1990s have led to a growing world wide work crisis Unemployment levels particularly in Europe remain persistently high and for those in employment job insecurity and long working hours have become the norm The response of UK governments has been to promote flexibility in employment practices while proclaiming the importance of improving skill levels through education and training This volume challenges the adequacy of such an approach and asks whether reliance on education and training reforms without additional political intervention in economic processes is capable of reversing current trends Issues covered in this reader include the impact of globalization on employment trends neo liberal and neo Keynesian approaches to employment policy political reforms in education and training institutions the impact of flexibilization on private life and the family The two volumes in this series are readers for the Open University course Education Training and the Future of Work E837 a module of the MA in Education The companion volume is Education Training and the Future of Work II Developments in Vocational Education and Training John Ahier is Lecturer in Education at the Open University Geoff Esland is Director of the Centre for Sociology and Social Research at the Open University and Course team Chair of E837

**Sociology, Youth and Youth Work Practice** Simon Bradford,2012-09-24 How can sociology inform our understanding of young people s experiences Introducing core theories by drawing on a range of cultural resources from pioneering research to genre defining films this book demonstrates how a sociological imagination can enhance informal educational and social welfare approaches to work with young people

**ASPER Research and Evaluation Projects 1970-79** United States. Department of Labor. Office of the Assistant Secretary for Policy, Evaluation, and Research,1980 Annotated bibliography of evaluation and research reports emanating from the USA department of labor asper on the labour market economic policy employment and vocational training programmes for the period from 1970 to 1979

**Rights Of Passage** Irwin, Sarah,Sarah Irwin University of York.,2013-11-05 First Published in 1995 This original and timely analysis of the transition from youth to adulthood breaks with traditional ideas about the labour market and demographic processes and makes an important and general contribution to understanding social change Significant developments in the timing and experience of transition have not been satisfactorily addressed nor understood in relation to general change in household and employment structure Using primary data gathered in a survey of young adults and their parents and existing evidence on the organisation of employment and demographic trends the author analyses developments in the social organisation of dependence independence and obligation

Delayed parenting and other aspects of the rights of passage are explored in depth and explained within their wider social context Labor Market Developments During Economic Transition Jan J. Rutkowski, 2006 The paper reviews labor market developments in the transition economies of Europe and Central Asia It argues that the scarcity of productive job opportunities and the growing labor market segmentation are the two main labor market problems facing the transition economies In the European transition economies the lack of jobs has led to persistent open unemployment In the Commonwealth of Independent States CIS it has led to hidden unemployment underemployment and low productivity employment Unemployment in the European transition economies is supported by the developed social safety net In contrast in the CIS for most workers unemployment is not an affordable option They either stick to their old unproductive jobs in unrestructured enterprises or work in the informal sector or resort to subsistence agriculture Thus underemployment in the CIS is a mirror image of unemployment in the European transition economies Accordingly the high employment to population ratios in many CIS countries do not necessarily signify favorable labor market performance Instead they often indicate delayed enterprise restructuring the maintenance of unsustainable jobs in uncompetitive firms and the existence of a large informal sector as an employer of last resort Labor market segmentation has been caused by a sharp increase in earnings differentials and the attendant increase in the incidence of low paid jobs by the polarization of regional labor market conditions and finally by the growth of the informal sector offering casual low productivity jobs Labor market segmentation and accompanying inequalities are more pronounced in the CIS than in the European transition economies World Bank web site
