Restructuring Work And The Life Course:

Restructuring Work and the Life Course Victor W. Marshall, Walter R. Heinz, Helga Krueger, Anil Verma, 2001-01-01 In this multidisciplinary collection of essays forty eight social scientists from seven countries examine changes in the organization of work and their impact on people at various stages of the life course **Handbook of the Life Course** Jeylan T. Mortimer, Michael J. Shanahan, 2007-12-14 This comprehensive handbook provides an overview of key theoretical perspectives concepts and methodological approaches that while applied to diverse phenomena are united in their general approach to the study of lives across age phases In surveying the wide terrain of life course studies with dual emphases on theory and empirical research this important reference work presents probative concepts and methods and identifies promising avenues for future research **Life Course, Work, and Labour in Global History** Josef Ehmer, Carola Lentz, 2023-09-18 This multidisciplinary volume offers unique perspectives across the globe and throughout the centuries on the complexity of the nexus between work and the life course For industrialized regions from Germany and Western Europe to China and Japan it questions the widespread notion of an overall growing working life course instability since the 1970s For unindustrialized or industrializing regions from West Africa to state socialist East Central Europe as well as for transnational and transcontinental labour migrations it shows the enormous influence of the extended family and wider kin on individual pathways into and out of work For early modern Europe India and China and up to twentieth century state socialism and to current welfare states it stresses and concretizes the crucial impact of age and gender for both societal labour relations and individual work related decision making With all chapters based on original research the volume reflects a close cooperation between historians anthropologists and sociologists Its multidisciplinary approach finds expression in its methodological plurality reaching from archival research and sophisticated statistical analyses to biographical interviews and participant observation This mix allows to grasp the interaction between societal change and individual agency *The Structure of the Life Course: Standardized? Individualized? Differentiated?* Ross Macmillan, 2005-07-14 Current debates in life course studies increasingly reference theories of individualization standardization and differentiation in the structure of the life course This volume brings together leading scholars from a variety of fields to assess the theoretical underpinnings the empirical evidence and the implications of existing arguments The contributions include comparative historical work demographic analysis and detailed survey research The topics covered include historical cross cultural and racioethnic variation in the transition to adulthood the school to work transition educational careers retirement activity characteristics over the life span and the life course context of psychological well being The various contributions expand our understanding of the contemporary life course and its implications The authors offer innovative theoretical and methodological approaches that demonstrate the utility of holistic approaches to conceptualizing the life course and understanding its implications for modern society *Social Dynamics of the Life Course* Walter R. Heinz, Victor W. Marshall, In the last two decades research

on the life course has successfully combined and integrated different and rather isolated fields of social concerns such as the labor market family solidarity education employment retirement and social policy It has also developed a special focus on crucial problems of sociological research which includes the understanding of micromacro phenomena the dynamics of social change and international comparisons Contributors to this volume take an international comparative approach in applying the life course theoretical framework to issues of work and career Life course research focuses on the relationship between institutions and individuals across the life span and illuminates the impact of modernization on the shaping of biographies Industrial service societies are characterized by historically new contingencies of living arrangements and biographies These contingencies differ according to the extent to which life course patterns are regulated by social institutions In the continental European context institutional frameworks continue to define the timing and sequencing of transitions across the life course In less regulated market societies like the United States and Great Britain biographies and living arrangements are shaped more by the interaction of markets social networks and individual decisions In active welfare states institutional resources and rules continue to mediate the effects of social change on the life course What the editors and contributors to this fine compendium anticipate is a change on the cultural level toward more equality This trend supports young people and women in particular in their expectations concerning an egalitarian relationship This expectation is not taken for granted from the point of view of the male partner but has to be negotiated in decisionmaking processes as an issue that concerns the couple as a unit Thus the way in which people interact is profoundly impacted by the values and goals of equity demands
