Globalization Gernot Kohler, Emilio José Chaves, 2003 The majority of people around the world are experiencing oppressive and destructive forces which manifest themselves in starvation income polarisation joblessness stress violence and so on What is the nature of these forces If we call them globalisation can there be good globalisation as well as bad globalisation Is this a new phenomenon or just a continuation of history as it has always been This book brings together a wide range of expertise addressing these problems from a world systems perspective

Democracy and National Identity in Thailand Michael Kelly Connors, 2003-09-02 This book seeks to illuminate how Thai elites have used democracy as an instrument for order and discipline Drawing on interviews numerous Thai language sources and critical theory the author reveals a remarkable adaptation of the idea of democracy in the Thai context Connors shows how elites have drawn on Western political theory to design projects to create modern citizens He argues that it is possible to see the idea and practice of elite liberal democracy in Thailand and elsewhere as a key ideological resource in the project of securing hegemony over undisciplined populations In this perspective the ideas of civil society civic virtue social capital and democracy itself are all part of the weaponry deployed in an effort to create good citizens who act as guardians of the elite defined common good

From People's War to People's Rule Timothy J. Lomperis, 2000-11-09 Timothy Lomperis persuasively argues the ironic point that the lessons of American involvement in Vietnam are not to be found in any analysis of the war by itself Rather he proposes a comparison of the Vietnam experience with seven other cases of Western intervention in communist insurgencies during the Cold War era China Indochina Greece the Philippines Malaya Cambodia

and Laos Lomperis maintains that popular insurgencies are manifestations of crises in political legitimacy which occur as a result of the societal stresses caused by modernization Therefore he argues any intervention in a people s war will succeed or fail depending on how it affects this crisis The unifying theme in the cases Lomperis discusses is the power of land reform and electoral democracy to cement political legitimacy and therefore deflect revolutionary movements Applying this theory to the ongoing Sendero Luminoso insurgency in Peru Lomperis makes a qualified prediction of that conflict s outcome He concludes that a global trend toward democratization has produced a new era of people s rule

Social Change and Planning , Power, Protest and Participation Subrata K. Mitra,2021-09-05 This book first published in 1992 examines the attitudes of local elites the hinge between Indian state and rural society towards protest and participation in development illuminating arguments about the nature of the state as well as the development process It looks at the role of local elites in India both as the representatives of the state and of the rest of rural society and explains their importance in the country s development The book deals with the elites contribution to the credibility of the state and examines the strategies through which they manipulate the allocation of resources and influence the pace and direction of social change It contrasts the rural elites in two areas one more economically advanced than the other The elites in the first area were shown to be capable of combining institutional participation with radical protest whilst in the other they tended to rely on state channels to achieve reform The author concludes that despite the different settings both groups were informed active and responsive to political conditions This contrasts with the conventional view that local elites of the dominant castes oppress the lower ones by obstructing reforms for reasons of self interest

Against Islamophobia Arno Tausch,2007 In this book the author presents optimistic

socio liberal conclusions about Islam in the world system Countering some alarmist voices in the West neither migration nor Muslim culture are to be blamed for the contemporary crisis but the very nature of unequal capitalist accumulation and dependency that is at the core of the world capitalist system For one the analysis is based on current thinking on Kondratiev waves of world political development inherent in recent work by IIASA and the NATO Institute for Advanced Studies Analyses are also presented on the framework of the debate on cross national determinants of human well being in the world system While the author is cautiously optimistic about a socio liberal non interventionist policy alternative he has come to the conclusion that present patterns of global governance modeled around the neo liberal Washington Consensus and American hyperpower are doomed for failure A new socio liberal global consensus on global migration global order and global governance could emerge instead
