Rethinking Disability Principles For Professional And Social Change:

Rethinking Disability Elizabeth DePoy, Stephen French Gilson, 2004 This book provides a theoretical lens through which to view Disability Rather than taking a medical diagnostic stance which has been the traditional perspective the authors explain disability as category in which membership is based on of judgments about explanations for what people do experience and how they appear In Part I the authors discuss various aspects of the history and current trends which influence how disability is defined and addressed In Part II Explanatory Legitimacy EL theory is explained in detail and applied to an analysis of disability In Part III the EL theory is applied to rethinking disability now and in the future

Branding and Designing Disability Elizabeth DePoy, Stephen Gilson, 2014-06-27 Over the past fifty years design and branding have become omnipotent in the market and have made their way to other domains as well Given their potential to divide humans into categories and label their worth and value design and branding can wield immense but currently unharnessed powers of social change Groups designed as devalued can be undesigned redesigned and rebranded to seamlessly and equivalently participate in community work and civic life This innovative book argues that disability as a concept and category is created reified and segregated through current design and branding that begs for creative change Transcending models of disability that locate it either as an embodied medical condition or as a socially constructed entity this book challenges the very existence and usefulness of the category itself Proposing and illustrating creative and responsible design DePoy and Gilson include thinking and action strategies that are useful and potent for undesigning redesigning and rebranding to meet the full range of human needs and to enhance full participation in local through global communities Divided into two parts the first section presents a critical examination of disability as a designed and branded phenomenon exploring what exactly is being designed and branded and how The second part investigates the redesign of disability and provides principles for redesign and rebranding illustrated with examples from high tech to place based sustainable strategies The book provides a unique and contemporary framework for thinking about disability as well as providing relevant design and branding guidance to designers and engineers interested in embodiment issues *The Human Experience* Elizabeth DePoy, 2007 The Human Experience examines analyzes and applies theories of humans environments and human environment interaction to professional thinking and action The authors highlight tacit values and assumptions that underlie theory generation and application to professional practice and challenge the reader to answer two questions how do we know and what do we do with our knowledge Significant critical emphasis is devoted to diversity of humans and environments and the value perimeter in which professionals think and act *Participation in Health and Welfare Services* Arne H. Eide, Staffan Josephsson, Kjersti Vik, 2017-02-17 Today healthy ageing and active meaningful lives are core values and aims for international and national health policies Health services are challenged to ensure that the recipients of their services are active participants in their own care and beyond Participation allows patients to become less

dependent on healthcare providers increasing their control over their own treatment and health. Increasingly the idea of participation is shifting from participation in services to participation in mainstream society. This book examines the concept of participation as well as the different meanings it takes on in the context of health and welfare services. It asks how services can enable and stimulate participation outside of those services. The contributions in this volume particularly focus on participation as engagement in daily life and everyday life in order to develop the field of participation beyond the sphere of health and social care services. This book will appeal to researchers in the fields of health and social care, social services, occupational therapy and the sociology of health and illness. It will be of interest to practitioners of health and welfare services.

Transgressive Devotion Natalie Wigg-Stevenson, 2021-02-28 Academic theology is in need of a new genre. In *Transgressive Devotion* Natalie Wigg-Stevenson articulates a theological vision of that genre as performance art. She argues that theology done as performance art stops trying to describe who God is and starts trying to make God appear. Recognising that the act of studying theology or practicing ministry is always a performance where the boundaries between what we see, feel, experience and learn are not just blurred but potentially invisible, Wigg-Stevenson brings together ethnographic, theological, fieldwork, historical and contemporary Christian theological traditions and performance artworks themselves. A daring vision of theology which will

energise anybody feeling boxed in by the discipline Transgressive Devotion blurs borders between orthodoxy heterodoxy and heresy to reveal how the very act of doing theology makes God and humanity vulnerable to each other This is theology which is a liturgy of Divine incantation In other words this is theology which is also prayer *Human Behavior Theory and Applications* Elizabeth DePoy, Stephen French Gilson, 2011-09-21 In *Human Behavior Theory and Applications* authors Elizabeth DePoy and Stephen Gilson use a critical thinking approach to engage students to think in depth about theory and its use in social work practice With a strong focus on diversity this book expands its theory coverage to include progressive and the most cutting edge contemporary thinking The authors skillfully introduce theory critically examine each theory including developmental theories environmental theories diversity theories systems theories and new and emerging theories and then apply each theory to social work practice providing a synthesis of classical and contemporary theory for scholarly analysis and application to professional intellectual and social action *Essentials of Human Behavior* Elizabeth D. Hutchison, Leanne Wood Charlesworth, 2020-11-06 *Essentials of Human Behavior* combines Elizabeth D Hutchison's two best selling *Dimensions of Human Behavior* volumes into a single streamlined volume for understanding human behavior The text presents a multidimensional framework integrating person environment and time to show students the dynamic changing nature of person in environment In this Third Edition Hutchison is joined by new co author Leanne Wood Charlesworth who uses her practice and teaching experience to help organize the book's cutting edge research and bring it into the classroom The text will thoroughly support students understanding of human behavior theories and research and their applications to social work engagement assessment intervention and evaluation across all levels of practice This title is accompanied by a complete teaching and learning package **The SAGE Handbook of Social Work** Mel Gray, James Midgley, Stephen A Webb, 2012-06-22 This Handbook is the world's first generic major reference work to provide an authoritative guide to the theory method and values of social work in one volume Drawn from an international field of excellence the contributors each offer a critical analysis of their individual area of expertise The result is this invaluable resource collection that not only reflects upon the condition of social work today but also looks to future developments Split into seven parts the Handbook investigates Policy dimensions Practice Perspectives Values and ethics The context of social work Research Future challenges It is essential reading for all students practitioners researchers and academics engaged in social work *Human Behavior Theory* Roberta R. Greene, Nancy Kropf, 2017-07-12 As American society becomes increasingly diverse social workers must use a variety of human behavior frameworks to understand their clients culturally complex concerns This text applies specific human behavior theories to diversity practice They show how human behavior theory can be employed in interventions in the life problems of diverse client populations at the individual group social network and societal levels Several groups are examined They include minority groups ethnic groups women older adults members of certain social classes affected by economic and educational disadvantage especially those living in poverty people with developmental
