Rethinking Geographical Inquiry:

Rethinking Geographical Inquiry John Urquhart Marshall, 1982 *Medical Geography (Routledge Revivals)* Michael Pacione, 2014-06-17 Geographers have for a long time contributed much valuable detailed data on the geographical patterns of disease and health care delivery to the medical world On its first publication in 1985 this edited collection addressed the need for a review of progress in the field of medical geography that could also shape further developments Topics under discussion include national systems of health care the utilisation of health services medical planning and medical geography in the developing world This is a comprehensive volume that is it still of great relevance to today s students of medical geography health care and demography *Geography Since the Second World War (RLE Social & Cultural Geography)* Ron Johnston, Paul Claval, 2014-01-23 The discipline of geography has undergone much change and growth in recent years With growth has come diversity Before 1945 there were differences between countries in the emphases on subject matter and research approach although these were all related closely to three main models French German and American Since then the relative importance of French and German influences has declined substantially including within their own national territories and the Anglo American model has grown to world dominance With that model however there is no dominant point of view but rather a multiplicity of competing approaches These various approaches have had a different reception in other parts of the world reflecting the base of pre 1945 geographical scholarship the goals of geographical work set by societies and the nature of the international contacts The result is substantial international diversity in the practice of geography This authoritative volume provides much needed information to make them aware of current international trends

Geographical Thoughts in India Rana Singh, 2009-05-27 This book deals with roots of Indian geographical thoughts with reference to its historical base cultural context and visionary message As a consequence of long cultural history the resultant lifeworld in India converges like a drama and dance of space time function with transference and transformation In the passage of time emerged a metaphysical frame of thought the varieties of heritagescapes and simultaneously grown the senses to heritage ecology Of course attempts have been scanty but the richness always portrayed in literature and literary geography Historical and cultural geographies in India have not caught that much attention in the academia however on micro level distinct attributes are interpreted in the recent literature Going back to the ancient notions of nature theology religioscapes and rituals have developed a complex network of belief systems in the Hindu traditions In these traditions the motherly river Ganga serves as symbol system and metaphor in the Indian culture Continuity of cultural manifestations is actively maintained and continued in the Indian villages where lives three fourths of India s population and serve like a place ballet India s catastrophic march on the road of development and technology is entangled with obstacles and socio spatial gaps that need to be re considered in the light of cultural background and historical legacy All these issues are examined emphasising dualistic and complimentary perspectives in the West and the East Contents Viewpoints on the book v viii List of

 the discipline looking at changes across the broad field of methodological theoretical and geographical plurality Divided into
 three sections Rethinking Architectural Historiography begins by renegotiating foundational and contemporary boundaries of
 architectural history in relation to other fields such as art history and archaeology It then goes on to critically engage with
 past and present histories disclosing assumptions biases and absences in architectural historiography It concludes by
 exploring the possibilities provided by new perspectives reframing the discipline in the light of new parameters and
 problematics This timely and illustrated title reflects upon the current changes in historiographical practice exploring
 potential openings that may contribute further transformation of the disciplines and theories on architectural historiography
 and addresses the current question of the disciplinary particularity of architectural history *Uprooting Geographic*

Thoughts in India Rana Singh, David Sopher, Oskar Spate, 2009-03-26 Under the cultural turn and transformation the new intellectual discourses started in the 21st century to search the roots have cross cultural comparison and to see how the old traditions be used in the contemporary worldviews This book is the first attempt dealing with roots of Indian geographical thoughts since its beginning in 1920 It emphasises identity of India and Indianness and consciousness among dweller geographers in India development and status of geography and its recent trends Gaia theory and Indian context in search of cosmic integrity ecospirituality and global message towards interrelatedness Hindu pilgrimages and its contemporary importance Mahatma Gandhi and his contribution to sustainable environmental development for global peace and humanism and new vision to see meeting grounds of the East and the West on the line of reconstruction and reconciliation in the globalising world These essays are selective and thematic therefore overall view of comprehensiveness is lacking But this book is not the end obviously it is a beginning as already other volumes in sequence and continuity are in progress At the end the lead essays representative of the three eras by Spate 1956 Sopher 1973 and Mukerji 1992 are reprinted with a view to assessing the relevance of their challenging message even today

Routledge Library Editions: Social & Cultural Geography Various Authors, 2022-07-30 Re issuing books originally published between 1969 and 1990 this set of 15 volumes gives a 20 year perspective on the development of the discipline of social geography The books emphasize the increasingly important contribution of geographical theory to the understanding of social change values economic and political organization and ethical imperatives The volumes are authored by well known international geographers and discuss the philosophy and sociology of geography as well as key themes such as the geography of health crime space They also examine the cross over of geography with other disciplines such as literature and history Nature and Identity in Cross-Cultural Perspective A. Buttner, L. Wallin, 2013-04-17 Nature and Identity in Cross Cultural Perspective presents 20 essays which explore diverse cultural interpretations of the earth's surface Contrasted with each other and with the potentially cosmopolitan culture of science these detailed studies of ways in which different cultures conceptualise nature appear in the context of global environmental change Understanding across cultural lines has never been more important This book shows how individual cultures see their own histories as offering protection for nature while often viewing others as lacking such ethical restraints Through such writing a discourse of understanding and common action becomes possible The authors come from the places they discuss and offer passionate as well as scholarly visions of nature within their cultural homes Audience This volume is of interest to academics and professionals working in the fields of cultural geography environmental history environmental studies history of environmental ideas environmental education landscape and literature nature and culture It can be used for courses in the above mentioned areas and seminars in comparative literature It can also be used as a complementary text to provide cultural context to literary readings and for seminars on cultural aspects of the environment **Unifying Geography** David T. Herbert, John A. Matthews, 2004-08-05 It can be argued that the differences in content and approach between physical and human geography and also within its sub disciplines are often overemphasised The result is that geography is often seen as a diverse and dynamic subject but also as a

disorganised and fragmenting one without a focus Unifying Geography focuses on the plural and competing versions of unity that characterise the discipline which give it cohesion and differentiate it from related fields of knowledge Each of the chapters is co authored by both a leading physical and a human geographer Themes identified include those of the traditional core as well as new and developing topics that are based on subject matter concepts methodology theory techniques and applications Through its identification of unifying themes the book will provide students with a meaningful framework through which to understand the nature of the geographical discipline Unifying Geography will give the discipline renewed strength and direction thus improving its status both within and outside geography **Rethinking Development**
