Reconceptualising Professional Learning develops these issues through specific contemporary cases focused on one of the book's three main themes 1 professionals knowing in practice 2 professionals work arrangements and technologies or 3 professional responsibility Each chapter draws upon innovative theory to highlight the sociomaterial webs through which professional learning may be reconceptualised Authors are based in Australia Canada Italy Norway Sweden and the USA as well as the UK and their cases are based in a range of professional settings including medicine teaching nursing engineering social services the creative industries and more By presenting detailed accounts of these themes from a sociomaterial perspective the book opens new questions and methodological approaches These can help make more visible what is often invisible in today's messy dynamics of professional learning and point to new ways of configuring educational support and policy for professionals
