Green, Jeremy Holmes, 2014-05-01 Psychiatry Past Present and Prospect brings together perspectives from a group of highly respected psychiatrists each with decades of experience in clinical practice The topics covered range from scientific discoveries of all kinds advances in treatment and conceptual breakthroughs The highlights are countered by the field's negative sides perennial indecisiveness about the boundaries of psychiatry the limitations of a narrow approach to human suffering the retreat from the hope of a de institutionalised community based psychiatry the divide between biological treatments and psychotherapy the technical and ethical complexities of psychiatric research and the low priority given to psychiatry especially but far from exclusively in less developed countries The result is a text full of collected wisdom which will promote the curiosity of mental health professionals about key developments in psychiatry over the past half century sensitize the next generation of mental health professionals to the role they might play in advancing the state of knowledge about mental illness and its treatment during the course of their careers and serve as a valuable archival resource for scholars This collection of viewpoints from very experienced leaders in the field of psychiatry will prove fascinating reading for psychiatrists and allied mental health professionals such as psychologists psychiatric social workers psychiatric nurses and occupational therapists both trained and in training It will also offer the interested laity a balanced account of psychiatry's evolution since the 1950s and its likely prospects in the 21st century *Ethnopsychiatry* Atwood D. Gaines, 1992-08-17 This book outlines a new ethnopsychiatry one that considers popular or folk ethnomedicines and professional psychiatric systems in the same discourse effacing the traditional distinction between psychiatry and ethnopsychiatry The essays in this volume are from a diverse interdisciplinary group representing history psychology sociology and medicine as well as anthropology The author view both ethnomedical practices and illness as local cultural constructions They consider ideologies and institutions from both professional and popular ethnopsychiatric systems in America Western Europe South Africa the Caribbean Japan and India The book demonstrates that professional and popular psychiatric medicines lie along the same local cultural continua that professional scientific psychiatries and less formalized systems of local popular psychology are epistemological relatives aspects of common cultural discourses on normality and abnormality The essays reject the notion of a universal uniform reality of psychopathology beyond cultural boundaries but the data strongly support the cultural and historically constructed nature of ethnopsychiatry in its illness ideologies and institutions Contributors to this volume include Amy V Blue Thomas Csordas Ellen Dwyer Paul E Farmer M D Atwood D Gaines Helena Jia Hershel Janis Jenkins Pearl Katz
