Rethinking The Fifth Discipline:

Rethinking the Fifth Discipline Robert L. Flood, 1999 Explains the ideas of The Fifth Discipline and critiques the ideas in straightforward terms Flood establishes crucial developments in this area in the context of the learning organisation including creativity and organisational change

The Magic Ring Piero Mella, 2014-05-06 This book presents a gradual path toward educating readers in understanding how Control Systems truly operate and in recognizing simulating and improving them in all fields of activity Starting from the hypothesis that knowledge of Control Systems is not only a technical fact but also represents a discipline that is A discipline is a developmental path for acquiring certain skills or competencies To practice a discipline is to be a lifelong learner You never arrive you spend your life mastering disciplines Senge 2006 p 10 Piero Mella has set the objective of making Control Systems a topic that is in a certain sense simple and attractive by turning to the effective symbolism typical of Systems Thinking models and avoiding too technical and formal a treatment of the subject Thus readers should know that this is not an engineering physics biology or economics text nor a mathematics one either Technical or mathematical tools are not necessary to construct Control Systems instead the book adopts a highly simple and universal logic behind the notion itself of control process and the simple and universal action of the Control Systems that produce this process The Magic Ring Systems Thinking Approach to Control Systems is divided into 10 chapters Chapter 1 seeks to review the basic language of Systems Thinking and the models it allows us to create while Chapter 2 introduces the control process presenting the theoretical structure of four simple Control Systems we all can observe and manage In Chapter 3 a general typology of Control Systems is proposed with examples taken from observations of reality The view of Control Systems is broadened in Chapter 4 by introducing two important generalizations 1 multi lever Control Systems with levers that are independent or dependent of each other 2 multi objective systems with independent or interdependent objectives Chapter 5 outlines the guidelines for recognizing observing or designing Control Systems and presents the problems that arise regarding their logical realization introducing the fundamental distinction between symptomatic and structural control Chapters 6 9 undertake a mental journey through various environments increasingly broader in scope suggesting to the reader how to recognize therein Control Systems that by their ubiquitous presence make the world possible in all its manifestations Finally Chapter 10 covers ideas about a Discipline of Control Systems and the human aspects of control

Building In Research and Evaluation Yoland Wadsworth, 2016-06-16 Yoland Wadsworth's ground breaking proposition is that the act of inquiry is the way by which every living organism and all collective human life goes about continuously learning improving and changing Building in Research and Evaluation explores this new approach a basic theory of human understanding and action By deepening our understanding about the cyclical processes of acting observing questioning feeling reflecting thinking planning and acting again Wadsworth identifies how new life might be brought to what we do both professionally and personally Far from being dry academic theory she shows how this practice

derived evaluative inquiry process can drive progress toward social justice and human betterment This book will open new vistas of thought and new methods of inquiry for the reflective practitioner in health human services education social sciences It is the theoretical capstone of a trilogy of best selling books by Wadsworth which also includes *Everyday Evaluation on the Run* and *Do it Yourself Social Research* ***Comprehending the Complexity of Countries*** Hans Kuijper, 2022-01-18 This book argues for computer aided collaborative country research based on the science of complex and dynamic systems It provides an in depth discussion of systems and computer science concluding that proper understanding of a country is only possible if a genuinely interdisciplinary and truly international approach is taken one that is based on complexity science and supported by computer science Country studies should be carefully designed and collaboratively carried out and a new generation of country students should pay more attention to the fast growing potential of digitized and electronically connected libraries In this frenzied age of globalization foreign policy makers may to the benefit of a better world profit from the radically new country studies pleaded for in the book Its author emphasizes that reductionism and holism are not antagonistic but complementary arguing that parts are always parts of a whole and a whole has always parts

Mechanism Design for Total Quality Management: Using the Bootstrap Algorithm for Changing the Control Game Petter Ogland, 2017-11-10 This PhD thesis contributes to the theory of information infrastructures by explaining how to use game theory and genetic algorithms for turning the pseudo code of the bootstrap algorithm into proper code The study is the first known study to analyse the bootstrap algorithm from an action research perspective and it has become an important reference for further research on how to bootstrap information infrastructures ***The Power of Technology for Learning***

Noah P. Barsky, Mike Clements, Jakob Ravn, Kelly Smith, 2008-09-17 In today's dynamic global business environment where knowledge is a main asset and learning becomes the most important process Business Education needs to employ the right practices to develop future leaders Businesses require graduates that become true experts But can business schools indeed create learning experiences that address the needs of the global marketplace Can they teach students to build learning organizations The articles in this volume detail successful approaches developed by business educators and researchers The approaches have been implemented to solve real problems and to provide students with the ethical and analytical abilities they will need to both compete and contribute to the betterment of others The thematic part of this volume focuses on the potential of interactive on line activities to promote business and economics education They demonstrate the benefits that learning technologies can bring and show how to overcome potential problem issues ***The Oxford Handbook of the Learning Organization***

Anders Örtengren, 2019-12-12 The concept of the learning organization is one of the most popular management ideas of the last few decades Since it was conceived as an idea in its own right it has been given various definitions and meanings such that we are still faced with the question as to whether any unified understanding of what the learning organization really is can be established This Handbook offers extensive reviews of both new and traditional

perspectives on the concept and provides suggestions for how the learning organization can best be defined practiced studied and developed in future research With contributions from long standing scholars in the field as well as those new to the area this book aims to bridge the gap between traditional and more critical perspectives and in doing so find alternative features and angles to take the idea forward In addition to elaborating on and developing older definitions of the learning organization and suggesting updated and even new definitions the chapters also provide focused explorations on pertinent aspects of the learning organization such as ambidexterity gender inclusivity and systems thinking They also survey organizations that have made efforts towards becoming learning organizations how the learning organization can best be measured and studied and the universality of the idea itself Some of the questions raised in this book are answered or at least given tentative answers while other questions are left open In this way the book has the ambition to take the learning organization an important step further whilst having no intentions to take any final step instead the intention is that others will endeavour to continue where this book stops

Network Theory in the Public Sector Robyn Keast, Myrna P Mandell, Robert Agranoff,2013-10-23 Networks have

been described in terms of metaphors governance arrangements and structural or institutional arrangements These different perspectives of networks come out of a variety of disciplines including political science public administration urban affairs social welfare public management and organizational sociological research This wealth of research while contributing to a deeper understanding of networks presents a dilemma which is addressed by this book That is the question of whether there is a theory of public networks that informs networks in their various forms and is there a need for a new theory of networks More importantly is network research still relevant to practice Does network theory improve the process of governance Are different terms and or approaches actually the same or different What do these different approaches mean to theory This book deeply explores and integrates existing network theory and related theories from a number of perspectives levels and jurisdictions to develop a framework to guide network design governance and management The book focuses on the important issue of network performance looking at networks as bounded and consciously arranged the actors who participate in them design the relationships among a bounded set of individual organizations to pursue common objectives Finally the chapters tease out the variety of governance modes or regimes that intersect with network governance This book offers a comprehensive integrative interdisciplinary approach that enables specialists practitioners and administrators across a wide array of interests and fields to formulate and work on problems using a common language analytical framework and theoretical basis

Traditions of Systems Theory Darrell Arnold, 2013-12-17 The term systems theory is used to characterize a set of disparate yet related approaches to fields as varied as information theory cybernetics biology sociology history literature and philosophy What unites each of these traditions of systems theory is a shared focus on general features of systems and their fundamental importance for diverse areas of life Yet there are considerable differences among these traditions and each tradition has developed its own methodologies journals and forms of analysis This book explores this terrain and provides an overview of and guide to the traditions of systems theory in their considerable variety The book draws attention to the traditions of systems theory in their historical development especially as related to the humanities and social sciences and shows how from these traditions various contemporary developments have ensued It provides a guide for strains of thought that are key to understanding 20th century intellectual life in many areas

The Sustainability

Curriculum John Blewitt, Cedric Cullingford, 2013-06-17 The links between education and sustainable development are deepening although subject to much controversy and debate The success of the sustainability discourse depends both on the pedagogic and research functions of higher education Similarly for higher education itself to remain relevant and engaged it faces pressure not only to integrate the insights and lessons drawn from the perspective of sustainable development but also to be responsive to scrutiny of its own practices in relation to sustainability Among professionals in higher education sustainable development has its supporters and detractors It is embraced by some individuals and departments while being perceived by others as a threat to the coherence of particular disciplines Although it is not currently an academic discipline

in its own right increasing public and professional familiarity with the term and the increasing urgency of global calls for the implementation of sustainable development mean that this is rapidly changing This volume analyses the impact of the concepts and practices of sustainability and sustainable development on various academic disciplines institutional practices fields of study and methods of enquiry The contributors drawn from a wide range of disciplines perspectives educational levels and institutional contexts examine the purpose of the modern university and the nature of sustainable education which includes exploring links to social movements for sustainability projects curriculum change culture and biodiversity values relating to gender equality and global responsibility and case studies on the transformation or otherwise of some specific disciplines

The Power of Collaborative Leadership Bert Frydman,Iva Wilson,JoAnne Wyer,2000 This volume seeks to help business leaders to realize the promise of organizational learning by sharing lessons insights and best practices It aims to make organizational principles and concepts more concrete by grounding them in the practical experiences of two major companies

Professional Journal of the United States Army ,2011 Combined Arms Center (CAC) Research and Publication Index ,2011 Index to selected publications of the Combined Arms Center **Military Review** ,2011 A Call to Be Whole Barbara J. Sowada,2003-07-30 Examines the complex interrelationships that inform the health care system Health care like all social systems is a product of thought Up to now our collective thinking has been based on trying to manage parts not the whole This book inquires into four age old questions that shape all health care systems What is health What is care Who is responsible How much is enough Americans have the wealthiest health care system in the world yet the health status of Americans ranks in the lowest quartile among the world s 25 industrialized nations and 45 million Americans are without health insurance Today s cost quality and access problems are inter related and can be traced to taken for granted assumptions and health care s outmoded organizing concepts reductionism and materialism Greater fragmentation of care an over dependence on technology inattention to social and environmental determinants of health and serious economic and moral dilemmas are some of the results of the last 40 years of piecemeal political and economic reform This book has three purposes The first is to help the reader see healthcare as a complex system a part in a larger whole and to show how answers to the questions What is health What is care Who is responsible How much is enough implicitly define the purpose effectiveness efficiency and fairness of a health care system The second is to show that today s access cost and quality problems are interrelated and arise from outmoded concepts unquestioned assumptions and a long trail of inconsistent and contradictory answers to the four questions The third purpose is to acquaint readers with both the personal and societal challenges of finding coherent answers to the four questions raised above and to describe some of the budding experimental solutions that challenge traditional conventions and assumptions
