Rethinking Urban Transitions Andrés Luque-Ayala, Simon Marvin, Harriet Bulkeley, 2018-03-15 Rethinking Urban Transitions provides critical insight for societal and policy debates about the potential and limits of low carbon urbanism. It draws on over a decade of international research undertaken by scholars across multiple disciplines concerned with analysing and shaping urban sustainability transitions. It seeks to open up the possibility of a new generation of urban low carbon transition research which foregrounds the importance of political geographical and developmental context in shaping the possibilities for a low carbon urban future. The book's contributions propose an interpretation of urban low carbon transitions as primarily social, political and developmental processes. Rather than being primarily technical efforts aimed at measuring and mitigating greenhouse gases, the low carbon transition requires a shift in the mode and politics of urban development. The book argues that moving towards this model requires rethinking what it means to design, practise and mobilize low carbon in the city while also acknowledging the presence of multiple and contested developmental pathways. Key to this shift is thinking about transitions not solely as technical, infrastructural or systemic shifts but also as a way of thinking about collective futures, societal development and governing modes, a recognition of the political and contested nature of low carbon urbanism. The various contributions provide novel conceptual frameworks as well as empirically rich cases through which we can begin to interrogate the relevance of socio-economic, political and developmental dimensions in the making or unmaking of low carbon in the city. The book draws on a diverse range of examples including world cities and ordinary cities from North America, South America, Europe, Australia, Africa, India and China to provide evidence that expectations, aspirations and plans to undertake purposive socio-technical transitions are both emerging and encountering resistance in different urban contexts. Rethinking Urban Transitions is an essential text for courses concerned with cities, climate change and environmental issues in sociology, politics, urban studies, planning, environmental studies, geography and the built environment.

Rethinking Urban Green Spaces Cecil Konijnendijk, 2024-02-12 Proposing and demonstrating the ways in which we need to rethink urban green spaces as cities, societies and environments evolve, renowned scholar Cecil C. Konijnendijk explores urban green spaces as essential parts of cities. Chapters offer a comprehensive look at how their roles have changed over time and will continue to do so, moving from their conventional purpose as areas for recreation to become spaces contributing to climate adaptation, biodiversity conservation and economic development.

Urban Economics and Urban Policy Paul C. Cheshire, Max Nathan, Henry G. Overman, 2014-05-30 This groundbreaking book will prove to be an invaluable resource and a rewarding read for academics, practitioners and policymakers interested in the economics of urban policy, urban planning and development as well as international studies and innovation.

Advances in Human Factors in Architecture, Sustainable Urban Planning and Infrastructure Jerzy Charytonowicz, 2020-06-29 This book presents human factors research focused on achieving and assessing sustainability in the built environment and architecture. It reports on advanced engineering methods for architecture and design and on assessments of the social, environmental and economic

impacts of various designs and projects The book covers a broad range of practical studies relating to ergonomic design and assessment of public and private places urban ecological constructions and urban planning for smart city Further topics include green area planning environmentally responsive architecture and conservation and adaptation of vernacular architectures in modern design Based on the AHFE 2020 Virtual Conference on Human Factors in Architecture Sustainable Urban Planning and Infrastructure held on July 16 20 2020 this book offers a wealth of perspectives on sustainability and ergonomics in architecture and urban planning As such it represents a timely source of inspiration for designers architects urban planners as well as civil and environmental engineers and other professionals including policy makers seeking for developing sustainable buildings and infrastructure Urban Planning and Real Estate Transformations for the Future John Ratcliffe, Michael Stubbs, 2023-07-31 This book presents fresh ways of thinking about the future for all those involved in conceiving planning designing funding constructing occupying and managing the built environment to face the challenges and grasp the opportunities that lie ahead over the next few decades Four major themes form the basis of the volume 1 Future Awareness and a New Sense of Place 2 Global Governance and Anticipatory Leadership 3 Innovation Reform and Exemplars 4 Urban Planning and Real Estate Transformations Within these structural themes are a diverse range of Discourses addressing many of the big questions and driving forces that face us together with a proposed methodology Strategic Foresight and an array of practical illustrations viewing what can be done today whether by organisations individuals cities or communities to positively shape a preferred future and manipulate us towards achieving it It will be important reading for students practitioners agencies and corporations across the built environment especially in the fields of urban planning real estate development architecture civil engineering and construction *Handbook of Quality of Life and Sustainability* Javier Martinez, Claudia Andrea Mikkelsen, Rhonda Phillips, 2020-10-30 This handbook provides the latest research related to quality of life and sustainability taking into account social economic environmental and political governance aspects as well as specific socio spatial contexts The volume includes contributions from established and upcoming scholars from various disciplines and geographical contexts Global South and North The varying cultural and socio spatial contexts of the authors in the selected cases contribute to first hand knowledge on the realities of sustainability issues affecting the quality of life The authors apply a wide diversity of methods and tools which facilitates a unique understanding of the interlinkages between quality of life and sustainability The chapters are grouped in three main sections concepts and foundations tools techniques and applications and innovations The authors provide their own view and theoretical approximation of the dimensions of sustainability in particular on how these dimensions play out in relation to quality of life The combination of sustainability and quality of life concepts and perspectives is particularly important in unravelling the multi faceted nature of human urban rural spatial development **Questioning Proximity - Opportunities and Challenges for Urban Planning and Mobility Policies** Paola Pucci, Giovanni Vecchio, 2024-08-28 The book discusses some

of the issues related to proximity challenges an acritical use of the concept and highlights several dimensions that may better frame the actual contribution of proximity to urban and mobility planning in different places The contributions address the conditions required for ensuring accessibility by proximity and the different planning dimensions that can support its promotion addressing issues related to the inclusiveness of this model as well as the scalability and metrics of proximity we need to deal with in several different contexts The first part of the book introduces some experimental approaches aimed at operationalising accessibility by proximity while the second part discusses several planning issues related to the implementation of proximity at different scales *Rethinking Nature* Aurélie Choné, Isabelle Hajek, Philippe Hamman, 2017-05-18

Contemporary ideas of nature were largely shaped by schools of thought from Western cultural history and philosophy until the present day concerns with environmental change and biodiversity conservation There are many different ways of conceptualising nature in epistemological terms reflecting the tensions between the polarities of humans as masters or protectors of nature and as part of or outside of nature The book shows how nature is today the focus of numerous debates calling for an approach which goes beyond the merely technical or scientific It adopts a threefold critical historical and cross disciplinary approach in order to summarise the current state of knowledge It includes contributions informed by the humanities especially history literature and philosophy and social sciences concerned with the production and circulation of knowledge about nature across disciplines and across national and cultural spaces The volume also demonstrates the ongoing reconfiguration of subject disciplines as seen in the recent emergence of new interdisciplinary approaches and the popularity of the prefix eco e g ecocriticism ecospirituality ecosophy and ecofeminism as well as subdivisions of ecology including urban ecology industrial ecology and ecosystem services Each chapter provides a concise overview of its topic which will serve as a helpful introduction to students and a source of easy reference This text is also valuable reading for researchers interested in philosophy sociology anthropology geography ecology politics and all their respective environmentalist strands *Dwelling Urbanism* Christian von Wissel, 2019-09-23

City dwellers are direct agents in the making of cities yet how do they actually constitute and sustain the urban and its forms How do they practice the urban and through this practice shape the city in the making that emerges along with them on the backs of their working bodies *Dwelling Urbanism* re thinks the urban from this perspective of corporeal making and with regard to the cityness that it bears It delves into the thick of life in the periphery of Mexico City uncovering the everyday actions and efforts that practitioners of space accomplish when building houses creating jobs and putting themselves to work as infrastructure How are consequential conjunctions how is access to and presence in the city actively grown And what does such thinking the city as a verb as citying imply for urban planning *Rethink the City* Anja van der Watt, Luz María Vergara, Igor Tempels Moreno Pessoa, Caroline Newton, 2024-03-07 In light of rapid urbanisation and the accelerating threats of climate change scale and multitude are what set the Global North and South apart Yet as this course exposes the issues faced by urban areas have

resembling themes and characteristics regardless of economic status or geographic location Therefore in the context of sustainable urban development the binary dichotomy of the terms Global North and Global South must be contested While a focus on Africa Latin America and the Caribbean Asia and the MENA region Rethink the City attempts to understand the transboundary nature of urban issues and provide a platform to gather insights beyond borders It is only by learning from other narratives that we can collectively address the complex challenges ahead *Urban Planning in Lusophone African Countries* Carlos Nunes Silva, 2016-03-09 Urban planning on the five Lusophone African countries Angola Cape Verde Guinea Bissau Mozambique and Sao Tome and Principe has so far been relatively overlooked in planning literature Bringing together a team of leading scholars this book fills the gap by providing an in depth analysis of key issues in the history of urban planning and discussing the key challenges confronting contemporary urban planning in these countries The book argues that urban planning is a non neutral and non value free kind of public action and therefore ideology planning theories urban models and the ideological role urban planning has played are some of the key issues addressed For that reason the practice of Urban Planning is also seen as the outcome of a complex interrelationship between structure and agency with the role of key planners being examined in some of the chapters The findings and insights presented by the contributing authors confirm previous research on urban planning in the colonial and postcolonial periods in Lusophone African countries and at the same time break fresh ground and offer additional insights as new evidence has been collected from archives and in fieldwork carried out by a new generation of researchers In addition it outlines possible directions for future research
