The Report: Mongolia 2013, *Carl Crow - A Tough Old China Hand* Paul French, 2006-10-01 Carl Crow arrived in Shanghai in 1911 and made the city his home for the next quarter of a century working there as a journalist newspaper proprietor and groundbreaking adman He also did stints as a hostage negotiator emergency police sergeant gentleman farmer go between for the American government and propagandist As his career progressed so did the fortunes of Shanghai The city transformed itself from a dull colonial backwater when Crow arrived to the thriving and ruthless

cosmopolitan metropolis of the 1930s when Crow wrote his pioneering book 400 Million Customers that encouraged a flood of businesses into the China market in an intriguing foreshadowing of today's boom. Among Crow's exploits were attending the negotiations in Peking that led to the fall of the Qing Dynasty, getting a scoop on Japanese interference in China during the First World War, negotiating the release of a group of Western hostages from a mountain bandit lair, and being one of the first Westerners to journey up the Burma Road during the Second World War. He met most of the major figures of the time, including Sun Yat-sen, Chiang Kai-shek, the Soong sisters, and Mao's second in command, Zhou En-lai. During the Second World War, he worked for American intelligence alongside Owen Lattimore, coordinating US policies to support China against Japan. The story of this one exceptional man gives us a rich view of Shanghai and China during those tempestuous years. This is a book for all with an interest in Shanghai and China of this period and those with an interest in the development of journalism and business there.

Bioremediation and Bioeconomy Majeti Narasimha Vara Prasad, 2015-10-03. Bioremediation and Bioeconomy provides a common platform for scientists from various backgrounds to find sustainable solutions to environmental issues, including the ever-growing lack of water resources, which are under immense pressure due to land degradation, pollution, population explosion, urbanization, and global economic development. In addition, large amounts of toxic waste have been dispersed in thousands of contaminated sites, and bioremediation is emerging as an invaluable tool for environmental clean-up. The book addresses these challenges by presenting innovative and cost-effective solutions to decontaminate polluted environments, including usage of contaminated land and waste water for bioproducts such as natural fibers, biocomposites, and fuels to boost the economy. Users will find a guide that helps scientists from various backgrounds find sustainable solutions to these environmental issues as they address the topical issues crucial for understanding new and innovative approaches for sustainable development. Provides a compilation of new information on phytoremediation not found in other books in the present market. The first book to link phytoremediation and the bioeconomy. Includes strategies to utilize contaminated soils for producing bioresources and co-generation of value chain and value-added products.
