Ways & Power Of Love Pitirim A. Sorokin, 2015-10-22 The Ways and Power of Love was originally published in 1954 when Pitirim Sorokin was in the twilight of his career and leading the Harvard Research Center in Creative Altruism His elaborate scientific analysis of love with regard to its higher and lower forms its causes and effects its human and cosmic significance and its core features constitutes the first study on this topic in world literature to date Sorokin was the one absolutely essential twentieth century pioneer in the study of love at the interface of science and religion Bringing The Ways and Power of Love back into print allows a new generation of readers to appreciate Sorokin s genius and to move forward with his endeavor at a time when civilization itself continues to be threatened by a marked inability to live up to the ideal of love for all humankind It is certainly right to hope with Sorokin that progress in knowledge about love can move humanity forward to a better future Turning the sciences toward the study of love is no easy task but it can and must be done

Sorokin & Civilization Joseph Brandon Ford, Michel Paul Richard, Palmer Talbutt, Pitirim Aleksandrovich Sorokin, Sorokin and Civilization is a festschrift to Pitirim Sorokin one of the most famed figures of twentieth century sociology and first president of the International Society for the Comparative Study of Civilizations ISCSC He was a giant of the twentieth century stage in the larger world as well He debated with Trotsky exchanged ideas with Pavlov and

received a personal invitation to meet with President Masaryk of Czechoslovakia His principled dissent from sociological orthodoxy frequently anticipated that of Charles Wright Mills Alfred McClung Lee and Alexander Solzhenitsyn He was to paraphrase Joseph Ford a scholar among statesmen and a statesmen among scholars      Development of Social Sciences Dr. R. K. Bhatt & Mr. Manish Kumar, 2021-09-10 Development of Social Sciences A Librarian's Companion The present book entitled Development of Social Sciences A Librarian's Companion is an attempt to study the fundamental concept of the umbrella term Social Science which normally consist of four basic disciplines namely Political Science Economics Sociology and History though at a later stage the multidisciplinary approaches have widened the scope of social science thereby resulted into the inclusion of several disciplines which in one context or the other are directly related to the study of human beings The present effort intends to study the role of social science contributors organizations institutions documentation centers and the social science information sources available in the context of the development of social science disciplines The book is divided into five chapters namely i Social Science An Overview ii Social Science Contributors iii Social Science organizations and institutions iv National Documentation Centers in Social Sciences and v Information Sources in Social Science The book will be useful to the students pursuing the studies in the field of library and information science teachers involved in teaching the course which involves the teaching of multidisciplinary content especially the social science vis vis libraries as well as by all those who wants to study and do research the role of libraries and their contribution in the growth and development of social science disciplines      *Renewal* Colbert Rhodes, 2017-07-11 Offering a deep look into the moral uncertainty in the contemporary social sciences and American society this book explores an in depth solution This solution as articulated by Pitirim A Sorokin in the 20th century is the theory of Integralism a perspective dating back to Plato Aristotle and Aquinas Sorokin initially applied Integralism by locating and analyzing three dominant super socio cultural systems over 2500 years of Graeco Roman and Western history Each super system was unified by a central philosophical principle based either on materialism the senses or the rational or the supersensory super rational A super system declines when it reaches the limits of its potential to achieve its true reality and value to be replaced by another super system Sorokin described a trendless rotation of the three super socio cultural systems The current dominant super socio cultural system in the West is a materialist version emphasizing science and technology with little thought given to supersensory super rational reality Sorokin asserted contemporary materialist culture was in a state of collapse due to the breakup of its moral values As a consequence he saw a struggle for power occurring between egoistic individuals and groups often resulting in revolutions wars and inter human strife In response to the one sided materialist view of reality the goal of Integralism is to unify all three forms of reality into an integral culture that harmoniously balances materialist and supersensory super rational orientations A solution to the contemporary moral confusion Sorokin argued can be found in the application of supra conscious intuition that would enable a human to know what is eternal in the ordinary and reach the transcendent an experience not accessible

to the senses or the rational intellect alone The supra conscious is the source for reaching the supreme moral value creative unselfish altruism which can be shared by all cultures to produce peace and harmony in the world

**In a Dark Wood** Alston Chase, 2017-07-12 *In a Dark Wood* presents a history of debates among ecologists over what constitutes good forestry and a critique of the ecological reasoning behind contemporary strategies of preservation including the Endangered Species Act Chase argues that these strategies in many instances adopted for political rather than scientific reasons fail to promote biological diversity and may actually harm more creatures than they help At the same time Chase offers examples of conservation strategies that work but which are deemed politically incorrect and ignored *In a Dark Wood* provides the most thoughtful and complete account yet written of radical environmentalism And it challenges the fundamental but largely unexamined assumptions of preservationism such as those concerning whether there is a balance of nature whether all branches of ecology are really science and whether ecosystems exist In his new introduction Chase evaluates the response to his book and reports on recent developments in environmental science policy and politics *In a Dark Wood* was judged by a recent national poll to be one of the one hundred best nonfiction books written in the English language during the twentieth century A smashing good read this book will be of interest to environmentalists ecologists philosophers biologists and bio ethicists and anyone concerned about ecological issues
