Religious Objects in Museums Crispin Paine,2020-05-14 In the past museums often changed the meaning of icons or statues of deities from sacred to aesthetic or used them to declare the superiority of Western society or simply as cultural and historical evidence The last generation has seen faith groups demanding to control their objects and curators recognising that objects can only be understood within their original religious context In recent years there has been an explosion of interest in the role religion plays in museums with major exhibitions highlighting the religious as well as the historical nature of objects Using examples from all over the world Religious Objects in Museums is the first book to examine how religious objects are transformed when they enter the museum and how they affect curators and visitors It examines the full range of meanings that religious objects may bear as scientific specimen sacred icon work of art or historical record Showing how objects may be used to argue a point tell a story or promote a cause may be worshipped ignored or seen as dangerous or unlucky this highly accessible book is an essential introduction to the subject Museum Registration Methods John E. Simmons,Toni M. Kiser,2020-06-22 Since the first edition was published in 1958 Museum Registration Methods has defined the profession and served as a fundamental reference for all aspects of collections registration care and management The sixth edition of Museum Registration Methods is a comprehensive guide to registration and collections management for museums from acquisition to use and deaccessioning The authors and other contributors come from a wide variety of museums and specializations The 56 chapters in this edition are either new or updated and include the history of the profession the role of the registrar in the museum managing very large collections developing and implementing collection management policies documentation of collections accessioning condition reports deaccessioning repositories and provenance research Contemporary and digital art living and natural history collections loans exhibitions found in collection objects shipping records management and electronic data management are also addressed along with object handling and numbering digitization condition reporting preventive care storage on and off site inventory moving and packing shipping nationally and internationally couriating risk assessment security insurance integrated pest management ethics sustainability sacred and culturally sensitive objects intellectual property rights appraisal ethical and legal issues and research The book includes a comprehensive resource list glossary hypothetical situations to ponder and model collection forms **Law and Religion in Europe** Norman Doe,2011-08-04 Each state in Europe has its own national laws which affect religion and these are increasingly the subject of political and academic debate This book provides a detailed comparative introduction to these laws with particular reference to the states of the European Union A comparison of national laws on religion reveals profound similarities between them From these emerge principles of law on religion common to the states of Europe and the book articulates these for the first time It examines the constitutional postures of states towards religion religious freedom and discrimination and the legal position autonomy and ministers of religious organizations It also examines the protection of

doctrine and worship the property and finances of religion religion education and public institutions and religion marriage and children as well as the fundamentals of the emergent European Union law on religion The existence of these principles challenges the standard view in modern scholarship that there is little commonality in the legal postures of European states towards religion it reveals that the dominant juridical model in Europe is that of cooperation between State and religion The book also analyses national laws in the context of international laws on religion particularly the European Convention on Human Rights It proposes that national laws go further than these in their treatment and protection of religion and that the principles of religion law common to the states of Europe may themselves represent a blueprint for the development of international norms in this field The book provides a wealth of legal materials for scholars and students The principles articulated in it also enable greater dialogue between law and disciplines beyond law such as the sociology of religion about the role of religion in Europe today The book also identifies areas for further research in this regard pointing the direction for future study

Sacred Space in Israel and Palestine Marshall J. Breger, Yitzhak Reiter, Leonard Hammer, 2013-06-19

The Making of a Postsecular Society Massimo Rosati, 2016-03-03 Drawing on the thought of Durkheim this volume focuses on societal changes at the symbolic level to develop a new conceptualisation of the emergence of postsecular societies Neo Durkheimian categories are applied to the case of Turkey which in recent years has shifted from a strong Republican and Kemalist view of secularism to a more Anglo Saxon perspective Turkish society thus constitutes an interesting case that blurs modernist distinctions between the secular and the religious and which could be described as postsecular Presenting three symbolic case studies the enduring image of the founder of the Republic Atatürk the contested site of Ayasofia and the remembering and commemoration of the murdered journalist Hrant Dink The Making of a Postsecular Society analyses the cultural relationship that the modern Republic has always had with Europe considering the possible implications of the

Turkish model of secularism for a specifically European self understanding of modernity Based on a rigorous construction of theoretical categories and on a close scrutiny of the common challenges confronting Europe and its Turkish neighbour long considered other with regard to the accommodation of religious difference this book sheds light on the possibilities for Europe to find new ways of arranging the relationship between the secular and the religious As such it will appeal to scholars of social theory the sociology of religion secularisation and religious difference and social change
