ideology of Richard Dawkins is invariably assumed to be a defence of religious faith Nothing could be further from the truth in this case This book equates faith with insanity Instead it argues that we live in the hyperrational reality of ontological mathematics We attack the scientific dogma of Dawkins and his fellow travellers for being incompatible with ontological mathematics and in fact constituting a quasi religious hence mad faith in empiricism materialism randomness and meaninglessness nihilism all of which are refuted by ontological mathematics which reflects the principle of sufficient reason Are you rational enough for the truth Are you intelligent enough to be an ontological mathematician Many are called few are chosen

Simplicius: On Aristotle Physics 1.3-4 Simplicius, 2014-04-22 In this volume Simplicius deals with Aristotle's account of the Presocratics and for many of them he is our chief or even sole authority He quotes at length from Melissus Parmenides and Zeno sometimes from their original works but also from later writers from Plato onwards drawing particularly on Alexander's lost commentary on Aristotle's Physics and on Porphyry Much of his approach is just scholarly but in places he reveals his Neoplatonist affiliation and attempts to show the basic agreement among his predecessors in spite of their apparent differences This volume part of the groundbreaking Ancient Commentators on Aristotle series translates into English for the first time Simplicius commentary and includes a detailed introduction extensive explanatory notes and a bibliography
