Berger, 2015-02-23 Discusses the journey of Buddhist ideas on awareness and personhood from India to China Encounters of Mind explores a crucial step in the philosophical journey of Buddhism from India to China and what influence this step once taken had on Chinese thought in a broader scope The relationship of concepts of mind or awareness to the constitution of personhood in Chinese traditions of reflection was to change profoundly after the Cognition School of Buddhism made its way to China during the sixth century India's Buddhist philosophers had formulated the idea that in order for human beings to achieve perfect enlightenment they had to produce a state of awareness through practice that they described as luminous However once introduced to the Chinese tradition the concept of the luminous mind was to become a condition already found within human nature for the possibility of achieving human ideals This notion of the luminous mind was to have far reaching significance both for Chinese Buddhism and for medieval Confucianism Douglas L Berger follows the transforming path of conceptions of the luminosity of consciousness and the perfectibility of personhood in order to bring into clearer relief the history of Indian and Chinese philosophical dialogue as well as in the hope that such dialogue will be reignited **Ernest Nagel: Philosophy of Science and the Fight for Clarity** Matthias Neuber, Adam Tamas Tuboly, 2021-09-21 This volume is dedicated to the life and work of Ernest Nagel 1901 1985 counted among the influential twentieth century philosophers of science Forgotten by the history of philosophy of science community in recent years this volume introduces Nagel's philosophy to a new generation of readers and highlights the merits and originality of his works Best known in the history of philosophy as a major American representative of logical empiricism with some pragmatist and naturalist leanings Nagel's interests and activities went beyond these limits His career

was marked with a strong and determined intention of harmonizing the European scientific worldview of logical empiricism and American naturalism pragmatism His most famous and systematic treatise on The Structure of Science appeared just one year before Thomas Kuhn s even more renowned The Structure of Scientific Revolutions As a reflection of Nagel s interdisciplinary work the contributing authors articles are connected both historically and systematically The volume will appeal to students mainly at the graduate level and academic scholars Since the volume treats historical philosophical physical social and general scientific questions it will be of interest to historians and philosophers of science epistemologists social scientists and anyone interested in the history of analytic philosophy and twentieth century intellectual history
