The Lupin Genome Karam B. Singh, Lars G. Kamphuis, Matthew N. Nelson, 2020-01-30 This book on lupin genomics primarily focuses on the narrow leafed lupin NLL and details the genomic resources that have been developed and how they are currently being used to help advance both fundamental and applied research on NLL in areas ranging from its domestication to plant microbe interactions and syntenic relationships between NLL and other legume crops It also reports on genomic efforts being pursued with regard to other lupin crops Lupins are important ecological engineers they can colonise and thrive in low nutrient soils due to their ability to fix atmospheric nitrogen in symbiosis with bacteria and efficiently take up phosphorous Recently lupins have attracted considerable interest not only because of their value for sustainable farming as a break crop but also as a potential super food for fighting major health issues in connection with diabetes and obesity Narrow leafed lupin is the main grain legume crop grown primarily in Australia and was therefore selected for the development of a reference lupin genome and associated genomic resources Its genome has recently been sequenced with a focus on the gene rich space which has advanced the development of new breeding tools for the improvement of NLL and related lupin crops

Advances in Plant Physiology (Vol. 11) A. Hemantaranjan, 2009-01-01 The configuration of Volume 11 of the International Treatise Series has been absolutely due to praiseworthy contributions from Scientists of global eminence This programme has been undertaken with a view to reinforce the indistinguishable efforts to recognize the outcome of scrupulous research in some of the very rational and stirring areas of Environmental and Molecular Physiology of Plants In order to sustain and further advance it is committed to maintain the originality and the introduction of novel ideas ensuring that the treatise welcomes the best science done across the full extent of modern plant biology in general and plant physiology in particular Indeed within the time span of twelve years this treatise has been duly recognized

through Current Book Contents and other academic periodicals in the minds of distinguished readers and has beyond doubt achieved the international status. It is reiterated that in spite of handiness of quick accessibility of vast literature from internet this treatise series in the field of life sciences has been realized over and above to be like a true guide friend and philosopher continually enlightening the most hidden perceptible nerves of an individual worker which is beyond the competence of mere internet web service. It is glory to record that in Volume 11 with inventive applied research attempts have been made to bring together much needed fifteen review articles by Fifty eight contributors from Brazil China Egypt France Germany India Switzerland and Tunisia duly evaluated by Consulting Editors of international stature from India U K U S A Argentina Australia France Germany Japan Spain Portugal Israel and Morocco and rationally disseminated in Seven Sections Creditably in this volume over five important reviews belong to the field of Environmental Stresses besides covering significant areas of research. In genuineness the treatise is an achievement for interdisciplinary exchange of information. It would be extremely a significant book and a voluminous reference material for acquiring advanced knowledge by post graduate and Ph D scholars in response to the innovative courses in Plant Physiology Plant Biochemistry Plant Molecular Biology Plant Biotechnology Environmental Sciences Plant Pathology Microbiology Soil Science Agricultural Chemistry Agronomy Horticulture and Botany besides fulfilling needs for research teams and scientists engaged in various facets of research in Molecular Physiology and Biology of Plants in traditional and agricultural universities institutes and research laboratories throughout the world.
