Intelligent Data-Driven Marketing: When Physicists Start Thinking about Marketing Mathias Elsässer,2022-03-22

Following Einstein's sentence Everything should be made as simple as possible but not simpler If you can't explain it simply you don't understand it well enough this book puts a spotlight on the complex marketing ecosystem from a physicist's point of view Today's marketing world is overcomplex CMOs face the challenge to transform their current target operating models towards a 100% customer centric and data driven way of working A journey from good old mad men toward math men marketing This book consists of three parts The first part strips down the complexity of the marketing universe to the leanest frame of reference and then brings back the complexity step by step in single dimensions Part two and three just follow these thoughts and provide a detailed description of 56 small atoms that can be used in a maturity assessment of your marketing How to use them in a broader transformation concludes the book In summary An end 2 end guideline how to pursue and master the transformation from mad men towards a math men marketing operating model *College Credit*

KNOWCON 2023 Michal Müller,Pavla Slavičková, The publication is the proceedings of the international scientific conference KNOWCON 2023 Knowledge on Economics and Management held by the Department of Economic and Managerial Studies Palack University Olomouc on December 7 and 8 2023 This collection of conference proceedings

presents a diverse range of research papers spanning various dimensions of economics and management. It provides insights into the dynamic landscape of contemporary issues and opportunities. The topics explored in these papers encompass a wide spectrum from the impact of reduced value added tax rates on cultural services as a means of indirect public funding in the creative industries to the analysis of disinvestments in Central and Eastern European countries. Furthermore, the papers delve into areas such as digital transformation of business processes during the COVID 19 crisis, life cycle assessment, integration for sustainable decision making, social entrepreneurship strategies in the context of actual challenges, and the critical role of soft skills for the post 2022 world. This compilation is a testament to the diversity and depth of research in these fields and underscores the importance of multidisciplinary exploration in today's ever-changing global landscape.

Sustainable Food Networks: Chains of Values and Food Transitions Carolina Yacamán-Ochoa, José Luis Sánchez-Hernández, Javier Sanz-Cañada, 2025-06-12. Sustainable Food Networks (SFNs) are emerging as pivotal value chains for agroecological and food transitions in both urban and rural territories. These networks aim to create a healthy, fair, localized, and inclusive food supply model standing in contrast to the dominant corporate food system characterized by long-haul, complex, and fragile supply chains. Despite their potential, SFNs such as community-supported agriculture, farmers' markets, and urban agriculture have not been thoroughly examined through the lens of economic geography and related interdisciplinary perspectives. The current globalized food system is fraught with economic, social, and environmental issues, including the marginalization of family farming, environmental degradation, and the loss of local knowledge and biodiversity. SFNs offer a critical alternative by emphasizing small batch production, environmental sustainability, and social equity, yet there remains a significant gap in understanding their full impact and potential. This research topic aims to collate comprehensive research on Sustainable Food Networks (SFNs) with specific objectives.

identifying various SFN initiatives across different territories evaluating their spatial dimensions in global contexts and assessing policies that can enhance the social economic and environmental sustainability of food value chains Key questions include how alternative values are propagated within SFNs the critical spatial nodes for these values the role of urban and peri urban agriculture and the interplay between territorial conditions and SFN performance Additionally the research seeks to understand how SFNs compete with hegemonic value chains and the potential role of public policy in strengthening these networks To gather further insights into the complexities and potentials of SFNs we welcome articles addressing but not limited to the following themes The propagation and transfer of alternative values within SFNs Identification of critical spatial nodes for the reproduction of these values Roles of urban and peri urban agriculture in SFNs Relationships between territorial conditions governance and SFN performance Strategies employed by SFNs to tackle competition from corporate value chains The impact of SFNs on the surge of local organic and healthy food outlets The role of public policy in supporting and strengthening SFNs
