Machina Ex Dea Joan Rothschild, 1983 **Machina Ex Dea** Joan Rothschild, 1993 **Gender Division of Labor in Korea** Hyoungh Cho, Pil-wha Chang, 1994 Women in Engineering Margaret E. Layne, 2009-06-05

Women in Engineering introduces the visionary women who opened the door for today's female engineers. *Pioneers and Trailblazers* introduces the visionary women who opened the door for today's female engineers. *Pioneers* such as Emily Roebling, Kate Gleason, Edith Clarke, and Katherine Stinson come to life in this anthology of essays, articles, lectures, and reports. In this book, the significant contributions women have made to engineering in areas as diverse as construction, management, environmental protection, and industrial efficiency are finally placed in their proper historical context. *Studies on women engineers in the 1920s and in the years following World War II* underscore how far women have progressed in engineering and how far they have to go. With selections that span a century of historical and social analysis, *Women in Engineering: Pioneers and Trailblazers* and its companion volume *Women in Engineering: Professional Life* present a range of perspectives on women in engineering that will be of interest to historians, engineers, educators, and students. About the Author: Margaret E. Layne, P.E., is project director of *Advance VT*, a program created at Virginia Tech to increase the participation and advancement of women in academic science and engineering careers.

Technologies of the Gendered Body Anne Marie Balsamo, 1996 This book looks at the representation of the body in culture from a feminist perspective. Subjects covered include bodybuilding, cosmetic surgery, and cyberculture.

Learning Mathematics Prof. Leone Burton, 2012-10-12 *Learning Mathematics* brings together a collection of interrelated and forward-looking chapters by internationally recognized experts that explores changes in the theories and practices of learning and teaching mathematics. The authors reject a traditional transmission view of the teaching of mathematics which has proved so ineffective for learning. In its place, they offer information gathered from research and from practice about effects on the learners seeking to create and negotiate meaning. Learners are presented as actively attempting to make sense of the mathematics they encounter, and learners, teachers, and researchers are offered examples of how such sense-making activities incorporated into mathematics classrooms impact on coming to know. The book celebrates both diversity in the range of different perspectives, contributions, and topics, and unity in the linking chapters and themes. It will be fascinating reading for those mathematics educators who are eager to engage with a socio-cultural perspective in order to better understand the complexity of learning mathematics.

Feminists Who Changed America, 1963-1975 Barbara J. Love, 2006-09-22 Documenting key feminists who ignited the second-wave women's movement, Barbara J. Love's *Feminists Who Changed America, 1963-1975* will be the first comprehensive directory to document many of the founders and leaders, including both well-known and grassroots organizers of the second-wave women's movement. It tells the stories of more than two thousand individual women and a few notable men who together reignited the women's movement and made permanent changes to entrenched customs and laws. The biographical entries on these pioneering feminists represent their many factions, all parts

of the country all races and ethnic groups and all political ideologies Nancy Cott's foreword discusses the movement in relation to the earlier first wave and presents a brief overview of the second wave in the context of other contemporaneous social movements
