Miracles and Wonders Michael E. Goodich, 2017-03-02 Beginning in the late twelfth century scholastic theologians

such as William of Auvergne Thomas Aquinas and Engelbert of Admont attempted to provide a rational foundation to the Christian belief in miracles bolstered by the Aristotelian theory of natural law Similarly in this period a tension appeared to exist in the recording of miracles between the desire to exalt the Faith and the need to guarantee believability in the face of opposition from heretics Jews and other sceptics As miracles became an increasingly standard part of evidence leading to canonization the canon lawyers notaries and theologians charged with determining the authenticity of miracles were eventually issued with a list of questions to which witnesses to the event were asked to respond a virtual template against which any miracle could be measured Michael Goodich explores this changing perception of the miracle in medieval Western society He employs a wealth of primary sources including canonization dossiers and contemporary hagiographical Vitae and miracle collections philosophical theological treatises sermons and canon law and ancillary sources dealing with the procedure of canonization He compares and contrasts popular and learned understanding of the miraculous and explores the relationship between reason and revelation in the medieval understanding of miracles The desire to provide a more rational foundation to the Christian belief in miracles is linked to the rise of heresy and other forms of disbelief and finally the application of the rules of evidence in the examination of miracles in the central Middle Ages is scrutinized This absorbing book will appeal to scholars working in the fields of medieval history religious and ecclesiastical history canon law and all those with an interest in hagiography

Jeeves, 2021-02-25 As we try to understand ourselves and the world we live in all too often we look first to science and then if gaps remain in our understanding we try to fill the gaps with reference to God and our faith Such a god of the gaps approach has a long history and is sadly alive and well today This book was written to provide an alternative approach posing this basic question How can educated Christians maintain their intellectual honesty and at the same time be faithful both to Scripture and to science This book provides examples of some of the liveliest science vs faith issues today and suggests ways to think constructively about each of them
