My Grandchildren:

Storms of My Grandchildren James Hansen, 2011-01-04 _____ When the history of the climate crisis is written Hansen will be seen as the scientist with the most powerful and consistent voice calling for intelligent action to preserve our planet's environment Al Gore Few people know more about climate change than James Hansen This unnerving and fluently written book is the definitive one to read BBC Wildlife Anyone concerned about the world our children and grandchildren must inherit owes it to themselves to read this book Irish Times _____ An urgent and provocative call to action from the world's leading climate scientist Dr James Hansen the world's leading scientist on climate issues speaks out with the full truth about global warming the planet is hurtling to a climatic point of no return Hansen whose climate predictions have come to pass again and again beginning in the 1980s when he first warned US Congress about global warming is the single most credible voice on the subject worldwide He paints a devastating but all too realistic picture of what will happen if we continue to follow the course we're on But he is also a hard headed optimist and shows that there is still time to take the urgent strong action needed to save humanity _____ James Hansen gives us the opportunity to watch a scientist who is sick of silence and compromise a scientist at the breaking point the point at which he is willing to sacrifice his credibility to make a stand to avert disaster LA Times
